

Contents

1	Introduction	1
1.1	Progress in Somatic Cell Reprogramming	1
1.1.1	Nuclear Transfer of Somatic Cells	1
1.1.2	Induced Pluripotent Stem Cells	4
1.2	Research and Application of Stem Cells in Regenerative Medicine	9
1.2.1	In Vitro Differentiation of Stem Cells	11
1.2.2	Application of Stem Cells	15
	References	20
2	Establishment of ESC Lines Derived from Mice, Rats, and Primate	27
2.1	Introduction	27
2.2	Materials and Methods	29
2.2.1	The Experimental Animals	29
2.2.2	Discarded Embryos	29
2.2.3	Generation of Mouse Embryonic Stem Cells	29
2.2.4	Generation of Rat Embryonic Stem Cells	29
2.2.5	Generation of Human Embryonic Stem Cells	30
2.2.6	Karyotype Analysis	30
2.2.7	Alkaline Phosphatase Staining	30
2.2.8	Immunofluorescence Staining of Embryonic Stem Cells	30
2.2.9	RT-PCR Detection of Gene Expression in Embryonic Stem Cells	31
2.2.10	Bisulfite Treatment	31
2.2.11	Teratoma Formation	31
2.2.12	Blastocyst Injection (Chimeras and Tetraploid Complementation)	32
2.3	Results	32
2.3.1	Production of Live Mouse Derived from Mouse ESC with Tetraploid Embryo	32
2.3.2	Establishment of Rat BN ESC	33
2.3.3	Generation of Human ESC	35

2.4	Discussion	36
2.4.1	Significant Difference Between Mouse and Rat ESCs	36
2.4.2	Difference Between Mouse ESC and Human ESC	37
	References	38
3	Establishment of Highly Efficient Somatic Cell Reprogramming System to Generate iPSC Lines	41
3.1	Introduction	41
3.2	Materials and Methods	43
3.2.1	Experimental Animals	43
3.2.2	Cell Culture	44
3.2.3	Virus Package and Transfection	44
3.2.4	iPSC Induction and Cell Lines Generation	44
3.2.5	Flow Cytometry Analysis of iPSC	44
3.2.6	Karyotype Analysis	46
3.2.7	The Formation of Teratoma	46
3.2.8	Diploid and Tetraploid Blastocyst Injection	47
3.2.9	Southern Blot Analysis	47
3.3	Results	47
3.3.1	Induction of iPSC by Transfection of Four Factors	47
3.3.2	Knockout Serum Replacement Improves iPSC Induction Efficiency	48
3.3.3	iPSC Retain Pluripotency	48
3.4	Discussion	49
3.4.1	KOSR Enhance Reprogramming Efficiency of iPSC	49
3.4.2	Mechanism of the Enhancing Effect of KOSR on iPSC Induction	49
	References	50
4	Pluripotency of iPSC and Underlining Mechanism	53
4.1	Introduction	53
4.2	Materials and Methods	55
4.2.1	Experimental Animal	55
4.2.2	Cell Culture	55
4.2.3	Virus Packaging and Transfection	55
4.2.4	iPSC Induction and Establishment	55
4.2.5	Karyotype Analysis	56
4.2.6	Differentiation of iPSCs into Neural Stem Cells and Myocardial Cells	56
4.2.7	Teratoma Formation	56
4.2.8	Diploid and Tetraploid Blastocyst Injection	56
4.2.9	Microarray Analysis	56
4.2.10	Southern Blot Analysis	57
4.2.11	Simple Sequence Length Polymorphism	57

4.3	Results	57
4.3.1	Generation of Mouse Embryonic Fibroblast-Derived iPSC . . .	57
4.3.2	Production of Live iPSC Mouse with Tetraploid Complementation	59
4.3.3	Comparative Study of Gene Expression Between MEF-iPSC and ESC	61
4.3.4	Generation of Tail Tip Fibroblasts and Neural Stem Cells-Derived iPSC	61
4.3.5	iPS Mouse Generated from NSC-iPSC and TTF-iPSC	63
4.3.6	Whole-Genome cDNA Analysis of iPSC	67
4.3.7	Differentiation of iPSC into Neurons and Cardiomyocytes . .	67
4.4	Discussion	69
4.4.1	Type of Donor Cells Influence iPSC Induction Efficiency . . .	69
4.4.2	Pluripotent State of iPSC Induced by Various Techniques . .	72
	References	73
5	Developmental Potential of Mouse iPSC	75
5.1	Introduction	75
5.2	Materials and Methods	77
5.2.1	Animals	77
5.2.2	Cell Culture	77
5.2.3	Small RNA Microarray Analysis	77
5.2.4	GO Analysis	77
5.3	Results	78
5.3.1	Deep Sequencing of microRNA (miRNA) Revealed Its Role in Regulating Pluripotency	78
5.3.2	<i>Dlk1-Dio3</i> Region as a Critical Marker to Identify if iPSC Induced by Three Factors are Fully Reprogrammed . .	81
5.3.3	Aberrant Expression of <i>Dlk1-Dio3</i> Region Cannot be Rescued by Nuclear Transfer	84
5.4	Discussion	84
5.4.1	Prediction of the Target Genes of miRNA	84
5.4.2	Dynamic Changes of <i>Dlk1-Dio3</i> Region During Somatic Cell Reprogramming	86
	References	88
6	Conclusion	91

Studies of Pluripotency in Embryonic Stem Cells and
Induced Pluripotent Stem Cells

Zhao, X.

2014, XV, 92 p. 21 illus., 18 illus. in color., Hardcover

ISBN: 978-94-017-8818-2
