

Contents

1	Resource Allocation and Trade-Offs in Carbon Gain of Leaves Under Changing Environment	1
	Kouki Hikosaka, Yuko Yasumura, Onno Muller, and Riichi Oguchi	
2	Ecophysiological Aspects of Phloem Transport in Trees	25
	Teemu Hölttä, Maurizio Mencuccini, and Eero Nikinmaa	
3	Mycorrhizae and Global Change	37
	Michael F. Allen, Kuni Kitajima, and Rebecca R. Hernandez	
4	Dynamic Stomatal Changes	61
	Hartmut Kaiser and Elena Paoletti	
5	The Regulation of Osmotic Potential in Trees	83
	Andrew Merchant	
6	Ecophysiology of Long-Distance Water Transport in Trees	99
	Hanno Richter and Silvia Kikuta	
7	Forest Trees Under Air Pollution as a Factor of Climate Change	117
	Rainer Matyssek, Alessandra R. Kozovits, Jörg-Peter Schnitzler, Hans Pretzsch, Jochen Dieler, and Gerhard Wieser	
8	Influence of Atmospheric and Climate Change on Tree Defence Chemicals	165
	Jason Q.D. Goodger and Ian E. Woodrow	
9	Control over Growth in Cold Climates	191
	Sergio Rossi, Annie Deslauriers, Carlo Lupi, and Hubert Morin	
10	Treelines in a Changing Global Environment	221
	Gerhard Wieser, Friedrich-Karl Holtmeier, and William K. Smith	

11 The Future of Trees in a Changing Climate: Synopsis	265
Nancy Grulke and Michael Tausz	
Index	281

Trees in a Changing Environment

Ecophysiology, Adaptation, and Future Survival

Tausz, M.; Grulke, N. (Eds.)

2014, XII, 287 p. 54 illus., 13 illus. in color., Hardcover

ISBN: 978-94-017-9099-4
