

Contents

1	The Early Development of Inorganic Clathrates	1
	Michel Pouchard and Christian Cros	
2	Solid State Chemistry of Clathrate Phases: Crystal Structure, Chemical Bonding and Preparation Routes	35
	Michael Baitinger, Bodo Böhme, Alim Ormeci and Yuri Grin	
3	Synthetic Approaches to Intermetallic Clathrates	65
	Matt Beekman and George S. Nolas	
4	Semiconductor Clathrates: In Situ Studies of Their High Pressure, Variable Temperature and Synthesis Behavior	91
	D. Machon, P. F. McMillan, A. San-Miguel, P. Barnes and P. T. Hutchins	
5	Chemistry and Physics of Inverse (Cationic) Clathrates and Tin Anionic Clathrates.	125
	Andrei V. Shevelkov, Kirill A. Kovnir and Julia V. Zaikina	
6	Inorganic Clathrates for Thermoelectric Applications	169
	Stevce Stefanoski, Matt Beekman and George S. Nolas	
7	High Pressure Synthesis of Superconducting Silicon Clathrates and Related Compounds	193
	Shoji Yamanaka	
8	Light Element Group 13–14 Clathrate Phases	227
	Susan M. Kauzlarich and Fan Sui	
9	Structural and Physical Properties of Rare-Earth Clathrates	249
	Silke Paschen, Matthias Ikeda, Stevce Stefanoski and George S. Nolas	

10 Mechanical Properties of Intermetallic Clathrates	277
M. Falmbigl, S. Puchegger and P. Rogl	
Index	327

The Physics and Chemistry of Inorganic Clathrates

Nolas, G.S. (Ed.)

2014, XIV, 332 p. 140 illus., 42 illus. in color., Hardcover

ISBN: 978-94-017-9126-7
