
Contents

1	Evolution of Integrin I Domains	1
	Mark S. Johnson and Bhanupratap Singh Chouhan	
2	Integrin $\alpha 1\beta 1$	21
	Humphrey Gardner	
3	$\alpha 2\beta 1$ Integrin	41
	Aasakiran Madamanchi, Samuel A. Santoro, and Mary M. Zutter	
4	Integrin $\alpha 10\beta 1$: A Collagen Receptor Critical in Skeletal Development	61
	Evy Lundgren-Åkerlund and Attila Aszòdi	
5	Integrin $\alpha 11\beta 1$: A Major Collagen Receptor on Fibroblastic Cells.	73
	Cédric Zeltz, Ning Lu, and Donald Gullberg	
6	Regulation of Integrin Activity by Phosphorylation	85
	Carl G. Gahmberg, Mikaela Grönholm, and Liisa M. Uotila	
7	Integrin $\alpha E\beta 7$: Molecular Features and Functional Significance in the Immune System	97
	Gregg A. Hadley and Jonathan M. G. Higgins	
8	Structural Aspects of Integrins	111
	Robert C. Liddington	
9	Integrin Recognition Motifs in the Human Collagens.	127
	Samir Hamaia and Richard W. Farndale	

10 Cellular Signaling by Collagen-Binding Integrins.	143
Jyrki Heino	
11 The Therapeutic Potential of I-Domain Integrins.	157
Marian Brennan and Dermot Cox	
Index	179

I Domain Integrins

Gullberg, D. (Ed.)

2014, XIV, 179 p. 50 illus., 32 illus. in color., Hardcover

ISBN: 978-94-017-9152-6
