
Contents

Part I General Applications

- 1 Active, Dormant, or on the Path to Elimination:
What Does a Senescent Cell Do?** 3
Ittai Ben-Porath
- 2 Hypoxia and Tumor Dormancy: Can the Two Tango?** 13
Aparna R. Sertil
- 3 Progeroid Syndromes: Role of Accelerated
Fibroblast Senescence and p38 Activation** 25
Terence Davis
- 4 Induction of Cancer Cell Senescence: Role of Caffeic Acid
3,4-Dihydroxy-Phenethyl Ester** 41
Jian Luo, Xiaolong Tang, and Anliang Dong

Part II Role in Breast Cancer

- 5 Various Factors Contributing to Tumor Dormancy:
Therapeutic Implications in Breast Cancer** 51
Natalia Krawczyk, Malgorzata Banys, Hans Neubauer,
and Tanja Fehm
- 6 Progression of Hormone-Dependent Mammary
Tumors After Dormancy: Role of Wnt Pathway** 59
Albana Gattelli, Martín C. Abba, Julián Naipauer,
M. Victoria Goddio, Johanna M. Tocci,
Nancy E. Hynes, and Edith C. Kordon

Part III Role in Ovarian Cancer

- 7 Chemoresistance, Dormancy and Recurrence in Platinum
Drug Therapy of Ovarian Cancers** 79
Tamara A. Kalir and D. Stave Kohtz

8 The Role of Angiogenesis, Growth Arrest and Autophagy in Human Ovarian Cancer Xenograft Models for Tumor Dormancy..... 99
Margie N. Sutton, Zhen Lu, and Robert C. Bast Jr.

Part IV Role in Leukemia

9 Regulation of the Promyelocytic Leukemia Protein and Its Role in Premature Senescence 113
Alan W. Lau, Adriana E. Tron, and Wenyi Wei

Part V Role in Cardiovascular Disease

10 Cardiac Senescence and Autophagy 125
Ken Shinmura

Index..... 139

Tumor Dormancy, Quiescence, and Senescence, Vol. 3

Aging, Cancer, and Noncancer Pathologies

Hayat, M.A. (Ed.)

2014, XXVI, 144 p. 19 illus. in color., Hardcover
