Contents

1 Introduction 1
1.1 Some Preliminaries on Random Variables and Distributions . . . 1
1.2 Some Useful Mathematical Results 3

2 Normal Distribution 7
2.1 Normal Distribution 7
2.1.1 Definition (Normal Distribution) 8
2.1.2 Definition (Standard Normal Distribution) 8
2.1.3 Some Properties of the Normal Distribution 9
2.1.4 Percentiles 13
2.2 Different Forms of Normal Distribution 14
2.2.1 Generalized Normal Distribution 14
2.2.2 Half Normal Distribution 18
2.2.3 Some Properties of the Half-Normal Distribution 20
2.2.4 Folded Normal Distribution 28
2.2.5 Truncated Distributions 33
2.2.6 Inverse Normal (Gaussian) Distribution (IGD) 38
2.2.7 Skew Normal Distributions 40
2.3 Goodness-of-Fit Test (Test For Normality) 44
2.3.1 χ^2(Chi-Squared) Test 45
2.3.2 Kolmogorov-Smirnov (K-S) Test 45
2.3.3 Anderson-Darling (A-D) Test 46
2.3.4 The Shapiro-Wilk Test for Normality 47
2.3.5 Applications 48
2.4 Summary 50

3 Student's *t* Distribution 51
3.1 Student's *t* Distribution 51
3.2 Some Properties of the Student's *t* Distribution 55
3.2.1 Mode 56
3.2.2 Moments 57

3.2.3 Mean, Variance, and Coefficients of Skewness and Kurtosis . . . 57
3.2.4 Mean Deviation and Coefficient of Variation of a Student's *t* Random Variable . . . 58
3.2.5 Moment Generating Function . . . 58
3.2.6 Entropy . . . 58
3.2.7 Characteristic Function . . . 58
3.3 Percentiles . . . 60
3.4 Different Forms of *t* Distribution . . . 60
3.4.1 Half *t* Distribution . . . 61
3.4.2 Skew *t* Distribution . . . 61
3.5 Summary . . . 61

4 Sum, Product and Ratio for the Normal Random Variables . . . 63
4.1 Introduction . . . 63
4.1.1 Definition (Distribution of a Sum) . . . 64
4.1.2 Definition (Distribution of a Product) . . . 64
4.1.3 Definition (Distribution of a Ratio) . . . 65
4.1.4 Mean and Variance of the Sum and Product of Independent Random Variables . . . 65
4.2 Distribution of the Sum of Independent Normal Random Variables . . . 66
4.3 Distribution of the Product of Independent Normal Random Variables . . . 67
4.4 Distribution of the Ratio of Independent Normal Random Variables . . . 71
4.5 Distributions of the Sum, Product and Ratio of Dependent Normal Variables . . . 75
4.5.1 Some Basic Definitions . . . 76
4.5.2 Distributions of the Sums and Differences of Dependent (Correlated) Normal Random Variables . . . 77
4.5.3 Distributions of the Products and Ratios of Dependent (Correlated) Normal . . . 78
4.6 Summary . . . 79

5 Sum, Product and Ratio for the Student's *t* Random Variables . . . 81
5.1 Distribution of the Sum of Independent Student's *t* Random Variables . . . 81
5.2 Distribution of the Product of Independent Student's *t* Random Variables . . . 85
5.3 Distribution of the Ratio of Independent Student's *t* Random Variables . . . 88

5.4 Distributions of the Sums, Differences, Products and Ratios of Dependent (Correlated) Student t Random Variables 90
5.5 Summary 91

6 Sum, Product and Ratio for the Normal and Student's t Random Variables 93
6.1 Distribution of the Sum of Normal and Student's t Random Variables 94
6.1.1 Kendall's Pdf for the Sum $X + Y$ 94
6.1.2 Nason's Pdfs for the Sum $X + Y$, Based on Sphered Student's t Density 94
6.1.3 Some New Results on the Pdfs for the Sum $X + Y$ 96
6.2 Distribution of the Product of Normal and Student's t Random Variables 98
6.2.1 Derivation of the Pdf for the Product of Normal and Student's t Random Variables 98
6.3 Distribution of the Ratio of Normal and Student's t Random Variables 100
6.3.1 Derivation of the Pdf for the Ratio of Normal and Student's t Random Variables 100
6.4 Summary 101

7 Product of the Normal and Student's t Densities 103
7.1 Introduction 103
7.1.1 Some Useful Lemmas 103
7.2 Product of the Densities of Normal and Student's t Random Variables 104
7.2.1 Expressions for the Normalizing Constant and PDF 104
7.2.2 Derivation of the CDF 106
7.3 Some Properties of the Symmetric Distribution 107
7.3.1 Mode 107
7.3.2 Moments 107
7.3.3 Mean, Variance, and Coefficients of Skewness, and Kurtosis 108
7.4 Entropy 109
7.5 Percentage Points 110
7.6 Summary 111

8 Characterizations of Normal Distribution 113
8.1 Introduction 113
8.2 Characterizations of Normal Distribution 113
8.3 Summary 127

9 Characterizations of Student's *t* Distribution 129
9.1 Introduction 129
9.2 Characterizations of Student's *t* Distribution 129
9.3 Summary 141

10 Concluding Remarks and Some Future Research 143
