

Contents

1	Topological Manifolds	1
1.1	Manifolds and Some Examples	1
1.2	Basic Properties of the Long Line	6
1.3	Some Standard Manifold Constructions	12
	References	19
2	Edge of the World: When Are Manifolds Metrisable?	21
2.1	Definitions	21
2.2	Conditions Equivalent to Metrisability	27
	References	34
3	Geometric Tools	37
3.1	A Countable Union of Open n -Cells	37
3.2	Collaring the Boundary of a Metrisable Manifold	42
3.3	Handlebodies	46
	References	48
4	Type I Manifolds and the Bagpipe Theorem	49
4.1	Type I Manifolds	49
4.2	The Nyikos Bagpipe Theorem	52
4.3	The Cardinality of ω -Bounded, Non-metrisable Manifolds	59
	References	62
5	Homeomorphisms and Dynamics on Non-metrisable Manifolds	63
5.1	Continuous Flows	63
5.2	Discrete Flows	65
	References	86

6	Are Perfectly Normal Manifolds Metrisable?	87
6.1	A Perfectly Normal Manifold Which Is not Metrisable	87
6.2	Every Perfectly Normal Manifold Is Metrisable	95
	References.	100
7	Smooth Manifolds.	101
7.1	Smooth Manifolds.	101
7.2	Smooth Structures on the Long Line	105
7.3	Exotic Differential Structures on the Long Plane.	115
	References.	127
8	Foliations on Non-metrisable Manifolds	129
8.1	Examples of Foliations	130
8.2	Black Holes	136
8.3	Foliating a Long Cylinder	142
8.4	Foliating the Long Plane	145
	References.	152
9	Non-Hausdorff Manifolds and Foliations	153
9.1	Non-Hausdorff Manifolds	153
9.2	Foliations of the Plane.	161
	References.	165
	Appendix A: Topological Preliminaries.	167
	Appendix B: Set Theory Preliminaries	185
	Index	199

Non-metrisable Manifolds

Gauld, D.

2014, XVI, 203 p. 51 illus., 6 illus. in color., Hardcover

ISBN: 978-981-287-256-2
