

Contents

1	Introduction	1
1.1	Background of the Research	1
1.2	Rationality of the Research	2
1.3	The Study Area	4
	References	9
2	Sea Level Research: Methods and Techniques	11
2.1	Introduction	11
2.2	Sea Level Changes from Geological Records	11
2.2.1	Sea-Level Index Points	11
2.3	Sea Level Changes from Tide Gauge Data	30
	References	31
3	Global Sea-Level Changes Scenarios During the Holocene	35
3.1	Introduction	35
3.2	Different Thoughts and Scenarios of Global Sea Level Change During the Holocene	35
	References	47
4	Landforms Development in Bangladesh	51
4.1	Historical Evolution of Bangladesh Since Mesozoic Era	51
4.2	Delta Formation and Landform Development in Response to Sea Level Changes During Quaternary Period	53
4.2.1	Early Development: 18000–7000 cal year BP	53
4.2.2	Late Development: 7000 cal year BP to Present	56
4.2.3	Physiographic Regions in Bangladesh	57
	References	59
5	Sea Level Changes Scenarios During Holocene in Bangladesh	61
5.1	Phase 1 (Approximately 7500 years BP)	61
5.2	Phase 2 (at Approximately 6500 years BP)	64
5.3	Phase 3 (Approximately 6000 years BP)	64
5.4	Phase 4 (Between Approximately 5500 and 5000 years BP)	65

5.5	Phase 5 (Between Approximately 5000 and 1500 years BP)	66
5.6	Paleo-Coastline of Bangladesh During Early to Middle Holocene	67
	References	69
6	Discussions and Conclusion	71
6.1	Recent Pattern and Future Projection of Sea Level Change in the World with Reference to Bangladesh	74
	References	76

Holocene Sea-level Scenarios in Bangladesh

Rashid, T.

2014, VI, 78 p. 24 illus., 15 illus. in color., Softcover

ISBN: 978-981-4560-98-6
