

Contents

1	Brief Historical Introduction	1
1.1	Fourier Series and Fourier Transforms	1
1.2	Gabor Transforms	4
1.3	The Wigner–Ville Distribution and Time–Frequency Signal Analysis	6
1.4	Wavelet Transforms	10
1.5	Wavelet Bases and Multiresolution Analysis	19
1.6	Applications of Wavelet Transforms	26
2	Hilbert Spaces and Orthonormal Systems	29
2.1	Introduction	29
2.2	Normed Spaces	30
2.3	The L^p Spaces	33
2.4	Generalized Functions with Examples	38
2.5	Definition and Examples of an Inner Product Space	48
2.6	Norm in an Inner Product Space	51
2.7	Definition and Examples of Hilbert Spaces	54
2.8	Strong and Weak Convergences	59
2.9	Orthogonal and Orthonormal Systems	61
2.10	Properties of Orthonormal Systems	66
2.11	Trigonometric Fourier Series	75
2.12	Orthogonal Complements and the Projection Theorem	79
2.13	Linear Functionals and the Riesz Representation Theorem	84
2.14	Separable Hilbert Spaces	86
2.15	Linear Operators on Hilbert Spaces	88
2.16	Eigenvalues and Eigenvectors of an Operator	106
2.17	Exercises	116
3	Fourier Transforms and Their Applications	129
3.1	Introduction	129
3.2	Fourier Transforms in $L^1(\mathbb{R})$	130
3.3	Basic Properties of Fourier Transforms	135

3.4	Fourier Transforms in $L^2(\mathbb{R})$	149
3.5	Discrete Fourier Transforms	164
3.6	Fast Fourier Transforms.....	169
3.7	Poisson's Summation Formula	173
3.8	The Shannon Sampling Theorem and Gibbs' Phenomenon.....	179
3.9	Heisenberg's Uncertainty Principle	190
3.10	Applications of Fourier Transforms in Mathematical Statistics....	192
3.11	Applications of Fourier Transforms to Ordinary Differential Equations	199
3.12	Solutions of Integral Equations	203
3.13	Solutions of Partial Differential Equations.....	206
3.14	Applications of Multiple Fourier Transforms to Partial Differential Equations	218
3.15	Construction of Green's Functions by the Fourier Transform Method	223
3.16	Exercises	236
4	The Gabor Transform and Time–Frequency Signal Analysis	243
4.1	Introduction.....	243
4.2	Classification of Signals and the Joint Time–Frequency Analysis of Signals.....	244
4.3	Definition and Examples of the Gabor Transform	248
4.4	Basic Properties of Gabor Transforms	252
4.5	Frames and Frame Operators	257
4.6	Discrete Gabor Transforms and the Gabor Representation Problem.....	265
4.7	The Zak Transform and Time–Frequency Signal Analysis	268
4.8	Basic Properties of Zak Transforms	271
4.9	Applications of Zak Transforms and the Balian–Low Theorem ...	277
4.10	Exercises	284
5	The Wigner–Ville Distribution and Time–Frequency Signal Analysis	287
5.1	Introduction.....	287
5.2	Definition and Examples of the WVD	288
5.3	Basic Properties of the WVD	297
5.4	The WVD of Analytic Signals and Band-Limited Signals	305
5.5	Definitions and Examples of the Woodward Ambiguity Functions	309
5.6	Basic Properties of Ambiguity Functions	316
5.7	The Ambiguity Transformation and Its Properties	322
5.8	Discrete WVDs	326
5.9	Cohen's Class of Time–Frequency Distributions	330
5.10	Exercises	333

6	The Wavelet Transforms and Their Basic Properties	337
6.1	Introduction	337
6.2	Continuous Wavelet Transforms and Examples	340
6.3	Basic Properties of Wavelet Transforms	351
6.4	The Discrete Wavelet Transforms	354
6.5	Orthonormal Wavelets	364
6.6	Exercises	370
7	Multiresolution Analysis and Construction of Wavelets	375
7.1	Introduction	375
7.2	Definition of MRA and Examples	376
7.3	Properties of Scaling Functions and Orthonormal Wavelet Bases	383
7.4	Construction of Orthonormal Wavelets	401
7.5	Daubechies' Wavelets and Algorithms	416
7.6	Discrete Wavelet Transforms and Mallat's Pyramid Algorithm	433
7.7	Exercises	437
8	Extensions of Multiresolution Analysis	441
8.1	Introduction	441
8.2	p -MRA on a Half-Line \mathbb{R}^+	442
8.3	Nonuniform MRA	463
9	Newland's Harmonic Wavelets	475
9.1	Introduction	475
9.2	Harmonic Wavelets	475
9.3	Properties of Harmonic Scaling Functions	481
9.4	Wavelet Expansions and Parseval's Formula	484
9.5	Concluding Remarks	485
9.6	Exercises	486
10	Wavelet Transform Analysis of Turbulence	489
10.1	Introduction	489
10.2	Fourier Transforms in Turbulence and the Navier–Stokes Equations	492
10.3	Fractals, Multifractals, and Singularities in Turbulence	500
10.4	Farge's Wavelet Transform Analysis of Turbulence	506
10.5	Adaptive Wavelet Method for Analysis of Turbulent Flows	509
10.6	Meneveau's Wavelet Analysis of Turbulence	512
	Answers and Hints for Selected Exercises	517
	Bibliography	531
	Index	545

Wavelet Transforms and Their Applications

Debnath, L.; Shah, F.

2015, XV, 553 p. 60 illus., Hardcover

ISBN: 978-0-8176-8417-4

A product of Birkhäuser Basel
