1	Introduction	1
1.1	On the Origin and History of S -Variable Approach	1
1.2	On the Denomination S -Variable LMI	3
1.3	Other Denominations Used in Existing Literature	6
1.4	Overview of Selected Topics	6
	References	7
2	Robust Performance Analysis of LTI Systems	9
2.1	Introduction	9
2.2	Robust Stability Analysis of Uncertain LTI Systems	9
2.3	Robust Stability Analysis Using S -Variable Approach	14
2.4	Lemmas for SV-LMI Derivation	19
2.5	SV-LMI Results for Robust Performance Analysis Problems	23
2.5.1	Robust Regional Pole Location Analysis	24
2.5.2	Robust H_2 Performance Analysis	32
2.5.3	Robust H_∞ Performance Analysis	37
2.5.4	Robust Impulse-to-Peak Performance Analysis	41
2.6	Numerical Examples	45
2.6.1	Quarter-Car Suspension Example	45
2.6.2	Stability of Randomly Generated Examples	48
2.7	Conclusions	59
	References	59
3	Descriptor Case and System Augmentation	61
3.1	Robust Stability of Systems in Descriptor Form	61
3.1.1	Systems in Descriptor Form	61
3.1.2	Stability	63
3.1.3	Uncertain Descriptor Systems	66
3.1.4	S -Variable Results for Robust Stability	68
3.1.5	Performances	70

3.2	Reducing Size of SV-LMIs	73
3.2.1	Removing Parameter Independent Rows	73
3.2.2	Removing Some Parameter Independent Columns	75
3.3	System Augmentation and Conservatism Reduction	78
3.3.1	Source of Conservatism	78
3.3.2	Preliminary Discussions About Conservatism Reduction	80
3.3.3	Robust Stability	83
3.3.4	Regional Finite Pole Location	87
3.3.5	L_2 -induced Norm Performance	88
3.4	Exactness Verification	91
3.5	Numerical Examples	95
3.5.1	Quarter-Car Suspension Example	95
3.5.2	Randomly Generated Examples	97
3.5.3	Satellite Example	99
3.6	Conclusion	104
	References	105
4	Robust State-Feedback Synthesis for LTI Systems	107
4.1	Introduction	107
4.2	Preliminaries	107
4.3	Stabilization of Discrete-Time Systems	109
4.3.1	Recursive and Variational Representations	109
4.3.2	LMIs for Stabilization	111
4.3.3	More LMIs Parameterized by Schur Stable Matrices	113
4.3.4	Conclusions on the State-Feedback Stabilization of Discrete-Time Systems	114
4.4	The Continuous-Time Case	115
4.4.1	LMIs Parameterized by Hurwitz Stable Matrices	115
4.4.2	An Unsolved Issue	116
4.5	Pole Location in Subregions of the Complex Plane	117
4.5.1	The Multiperformance Pole Location Problem	117
4.5.2	LMIs Parameterized by a Matrix Pencil	118
4.5.3	LMIs for Pole Location in Convex Regions	121
4.5.4	Pole Location in Intersections of Regions	122
4.5.5	Heuristic Algorithms	124
4.6	Numerical Examples on Quarter-Car Suspension Model	126
4.6.1	Intersection of Interiors of Two Discs	126
4.6.2	Intersection of the Interior of a Disc and Exterior of Another	130
4.6.3	Intersection of a Disc and of a Half Plane	132
4.7	Conclusion	136
	References	137

7 Robust Performance Analysis of Discrete-Time	
Periodic Systems	199
7.1 Introduction	199
7.2 Stability Analysis of Linear Periodic Systems	199
7.2.1 Definition and Basic Results	199
7.2.2 Robust Stability Analysis Using SV-LMIs	201
7.3 H_2 Performance Analysis of Linear Periodic Systems	207
7.3.1 Lifting-Based Treatment	207
7.3.2 Definition of H_2 Norm and Basic Results	208
7.3.3 Robust H_2 Performance Analysis Using SV-LMIs	210
7.4 H_∞ Performance Analysis of Linear Periodic Systems	216
7.4.1 Definition and Basic Results	216
7.4.2 Robust H_∞ Performance Analysis Using SV-LMIs	218
7.5 Numerical Examples	222
7.5.1 Robust Stability Analysis	223
7.5.2 Robust H_∞ Performance Analysis	224
References	226
8 Robust Controller Synthesis of Periodic Discrete-Time Systems . . .	229
8.1 Introduction	229
8.2 Dual System	230
8.3 Stabilizing Periodic State-Feedback Controller Synthesis	231
8.3.1 Basic Results	231
8.3.2 Robust Stabilizing Controller Synthesis Using SV-LMIs	233
8.3.3 Difficulties in Controller Synthesis Using Rectangular SVs	234
8.4 H_2 Controller Synthesis for Linear Periodic Systems	235
8.4.1 Basic Results	235
8.4.2 Robust H_2 Controller Synthesis Using SV-LMI	236
8.5 H_∞ Controller Synthesis for Linear Periodic Systems	238
8.5.1 Basic Results	238
8.5.2 Robust H_∞ Controller Synthesis Using SV-LMI	238
8.6 Numerical Examples	240
8.6.1 Robust Stabilizing Controller Synthesis	241
8.6.2 Robust H_2 Controller Synthesis	242
8.6.3 Robust H_∞ Controller Synthesis	243
