## Part I Voltage Control Resources

<b>1 Relationship Between Voltage and Active and Reactive Powers .....</b>	<b>3</b>
1.1 Grid Short Lines.....	3
1.1.1 Reactive Power Transfer.....	5
1.1.2 Losses .....	6
1.2 Reactive Loads .....	7
1.3 Grid Medium-Long Length Lines.....	8
1.4 Grid as a Combination of Loads and Lines.....	10
References .....	11
<b>2 Equipment for Voltage and Reactive Power Control.....</b>	<b>13</b>
2.1 Introduction.....	13
2.2 Reactive Power Compensation Devices.....	14
2.2.1 Shunt Capacitors.....	14
2.2.2 Mechanically Switched Capacitors (MSC) .....	15
2.2.3 Shunt Reactors .....	16
2.2.4 Mechanically Switched Reactors (MSR).....	17
2.2.5 Multiple Compensation Device Operating Point.....	18
2.3 Voltage and Reactive Power Continuous Control Devices .....	20
2.3.1 Synchronous Generators.....	20
2.3.2 Synchronous Compensators.....	30
2.3.3 SVG: Static VAR Generators.....	32
2.3.4 Static VAR Compensators (SVCs) .....	41
2.3.5 Static Compensators (STATCOMs).....	44
2.3.6 Unified Power Flow Control (UPFC).....	49
2.4 Voltage and Reactive Power Discrete Control Devices:	
On-load Tap-changing Transformers.....	62
2.4.1 Generalities .....	62
2.4.2 Output Voltage Dependence on Current Turns Ratio .....	63
2.4.3 Static Characteristic of the Transformer .....	65

2.4.4	Link of Voltage, Reactive Power and Turns Ratio in OLTC Transformer Applications .....	70
2.4.5	Regulating Transformers .....	76
2.5	Conclusion.....	78
	References .....	79
<b>3</b>	<b>Grid Voltage and Reactive Power Control .....</b>	<b>81</b>
3.1	General Considerations .....	81
3.2	Voltage-Reactive Power Manual Control.....	85
3.2.1	Manual Voltage Control by Reactive Power Flow .....	86
3.2.2	Manual Voltage Control by Network Topology Modification .....	86
3.3	Voltage-Reactive Power Automatic Control .....	86
3.3.1	Automatic Voltage Control by OLTC Transformer.....	87
3.3.2	Automatic Voltage Control (AVR) of Generator Stator Edges .....	90
3.3.3	Automatic Voltage Control by Generator Line Drop Compensation (Compounding).....	99
3.3.4	Generalities on Automatic High Side Voltage Control at a Substation.....	106
3.3.5	Automatic High Side Voltage Control at a Power Plant .....	108
3.3.6	Automatic Voltage-Reactive Power Control by SVC .....	118
3.3.7	Automatic Voltage-Reactive Power Control by STATCOM .....	133
3.3.8	Automatic Voltage-Reactive Power Control by UPFC.....	148
3.4	Conclusion.....	156
	References .....	157

**Part II Wide Area Voltage Control**

<b>4</b>	<b>Grid Hierarchical Voltage Regulation.....</b>	<b>161</b>
4.1	Structure of the Hierarchy .....	161
4.1.1	Generalities .....	161
4.1.2	Basic SVR and TVR Concepts .....	165
4.1.3	Primary Voltage Regulation.....	166
4.1.4	Secondary Voltage Regulation: Architecture and Modelling.....	170
4.1.5	Tertiary Voltage Regulation .....	186
4.2	SVR Control Areas.....	190
4.2.1	Procedure to Select Pilot Nodes and Define Control Areas .....	190
4.2.2	Procedure to Select Control Generators .....	193
4.2.3	Power Flow and Optimal Power Flow Computation in the Presence of Secondary Voltage Regulation .....	195

4.2.4	Examples of Pilot Node and Control Power Station Selection .....	196
4.2.5	Examples of Control Apparatuses Required by SVR .....	210
4.2.6	SVR Dynamic Performance During Tests in Real Grids .....	221
4.2.7	General Considerations on Practical Issues .....	228
4.3	Conclusion .....	229
	References .....	230
<b>5</b>	<b>Examples of Hierarchical Voltage Control Systems Throughout the World .....</b>	<b>233</b>
5.1	French Hierarchical Voltage Control System .....	233
5.1.1	General Overview .....	233
5.1.2	Original Secondary Voltage Regulation and Its Limits .....	234
5.1.3	Coordinated Secondary Voltage Control (CSVC) .....	237
5.1.4	Performance and Results of Simulations .....	240
5.1.5	Final Comments on French Hierarchical Voltage Control Power System .....	240
5.2	Italian Hierarchical Voltage Control System .....	242
5.2.1	General Overview .....	242
5.2.2	Power System Operation Improvement .....	244
5.2.3	Final Remarks on Italian Hierarchical Voltage Control System .....	248
5.3	Brazilian Hierarchical Voltage Control System .....	248
5.3.1	General Overview .....	248
5.3.2	Results of Study Simulations .....	250
5.3.3	Conclusions on the Brazilian Voltage Control System .....	254
5.4	Romanian Hierarchical Voltage Control System .....	255
5.4.1	Characteristics of the Studied System .....	255
5.4.2	SVR Area Selection .....	255
5.5	Chinese Hierarchical Voltage Control System .....	260
	References .....	261
<b>6</b>	<b>SVR Dynamic Tests with Contingencies .....</b>	<b>263</b>
6.1	Tests Without Contingencies in Large Power Systems .....	263
6.1.1	Tests on Italian Hierarchical Voltage Control System .....	264
6.1.2	Tests on South Korean Hierarchical Voltage Control System .....	267
6.1.3	Tests on South African Hierarchical Voltage Control System .....	267
6.2	Tests with Contingencies in Large Power Systems .....	282
6.2.1	Tests on Line-Opening .....	282
6.2.2	Tests on Generator Tripping .....	290
	References .....	296

<b>7</b>	<b>Economics of Voltage Ancillary Service</b>	297
7.1	General Overview	297
7.2	Cost/Benefit Analysis of Voltage Service	299
7.2.1	Generation Costs	299
7.2.2	Transmission Costs	301
7.2.3	Voltage-VAR Control Benefits	302
7.2.4	SVR-TVR Cost/Benefit Illustrative Case	307
7.3	Economic Performance Recognition of Voltage Service	308
7.3.1	Voltage Service with SVR: Role Played by Power Plant Voltage and Reactive Power Regulator (SQR)	310
7.3.2	Voltage Service Indicators	311
7.3.3	Simplicity, Correctness and Indubitableness of Proposed Indicators	315
	References	316
<b>8</b>	<b>Voltage Stability</b>	319
8.1	General Overview on Stability	319
8.2	Electrical Power System Stability	321
8.2.1	Transient Stability	322
8.2.2	Steady-State Stability	326
8.2.3	Generator AVR Contribution to Steady-State Stability	328
8.2.4	SVR Contribution to Angle Stability	334
8.3	Voltage Stability: Introduction	341
8.3.1	Relationship Between Load Power and Network Voltage	343
8.3.2	Distinguishing Voltage Instability from Voltage Collapse	382
8.3.3	Voltage Instability and Bifurcation Analysis	389
	References	399
<b>9</b>	<b>Voltage Instability Indicators</b>	401
9.1	Introduction	402
9.2	Off-line Voltage Instability Indicators	404
9.2.1	Basics of Off-line Indices Based on Jacobian Singular Values	406
9.2.2	Basics of Off-line Indices Based on Load Margin	409
9.2.3	Final Comment	410
9.3	Real-time PMU-based Voltage Instability Indicators	411
9.3.1	Introduction	411
9.3.2	Thevenin Equivalent Identification Algorithm	413
9.3.3	Description of Proposed Real-time Identification Algorithm	418
9.3.4	Sensitivity Analysis of the Identification Method	421
9.3.5	Algorithm Application to Dynamic Thevenin Equivalent	426
9.3.6	Algorithm Application to the Italian 380/20-kV Network	430

9.4	Real-time Voltage Instability Indicators V-WAR-based .....	439
9.4.1	The Real-time and On-line Index .....	440
9.4.2	Voltage Stability Index Definition .....	441
9.4.3	Voltage Stability Index Computation and Meaning.....	441
9.4.4	Crucial Role Played by Tertiary Voltage Regulation .....	442
9.4.5	Voltage Stability Index Control Function .....	443
9.4.6	Functional Performances .....	443
9.4.7	Comparison with Off-line Voltage Stability Indices.....	448
9.5	Real-time Voltage Instability Indicators Based on Grid Area Reactive Power Injection.....	450
9.6	A Variety of Real-time Voltage Instability Indicators Based on Phasor Measurements Units Data.....	451
9.6.1	Real-time Indices Based on the Thevenin Equivalent Identification Method .....	452
9.6.2	Index Performance in Front of Load Increase .....	455
9.6.3	Index Performance in Front of Large Perturbations .....	459
9.7	Final Remarks .....	462
	References .....	463
<b>10</b>	<b>Voltage Control on Distribution Smart Grids .....</b>	<b>465</b>
10.1	Introduction.....	465
10.1.1	Generalities .....	466
10.1.2	Chapter Objective.....	467
10.2	Generalities on Medium Voltage Grid and Primary Cabin Schemes.....	468
10.3	Generalities of Primary Cabin Voltage Control .....	470
10.4	PCVR Basic Control Schemes .....	473
10.4.1	OLTC Operation in Presence of PCVR.....	473
10.4.2	Islanded Grid Voltage Regulation .....	475
10.4.3	Automatic Voltage Regulation of HV or MV PC Bus Bars .....	475
10.4.4	Block Diagrams of PCVR Control Functions.....	477
10.5	Automatic Reactive Power Flow Regulation on the PC HV Bus Bar .....	479
10.6	Analysis of PCVR and PCQR Control Logics and Results .....	481
10.6.1	Case of Reactive Power Flow Entering Feeder by HV Bus Bar .....	484
10.6.2	Case of Reactive Power Flow Sent by Feeder into PC HV Bus Bar .....	487
10.6.3	OLTC Tap Control by PC-CC Operating as PCVR .....	489
10.6.4	OLTC Control by PC-CC During PCQR Operation .....	491
10.7	Conclusions.....	493
	References .....	494

<b>11 Wide Area Voltage Protection .....</b>	<b>497</b>
11.1 Introduction .....	498
11.2 Area Voltage Protection Based on SVR-TVR and Real-Time Indicators .....	501
11.2.1 Basics of Real-time SVR-TVR $VSI_j(t)$ Index Computing .....	502
11.2.2 Basics of Real-time V-WAR and V-WAP Coordination....	503
11.2.3 Wide Area Voltage Stability Protection Philosophy Based on SVR-TVR $VSI_j(t)$ .....	505
11.2.4 Simulation Results of V-WAP Based on SVR-TVR $VSI_j(t)$ .....	508
11.3 Area Voltage Protection Based on Reactive Power Inflow Real-time Voltage Stability Indicator .....	512
11.3.1 Basics of Real-time $VSI_i(t)$ Index Linked to V-WAP Referring to a Power System Area-i: .....	517
11.3.2 Wide Area Voltage Stability Protection Philosophy Based on $dQ_{in\_tot}(t)$ Indicator .....	518
11.3.3 Simulation Results of V-WAP Based on $dQ_{in\_tot}(t)$ .....	520
11.4 Area Voltage Protection Based on PMU and Related Real-time Voltage Stability Indicator .....	528
11.4.1 Basics of Real-time $VSI-PMU(t)$ Index Linked to V-WAP .....	529
11.4.2 Wide Area Voltage Stability Protection Philosophy Based on $VSI-PMU(t)$ .....	531
11.4.3 V-WAP Based on $VSI-PMU(t)$ Simulation Results.....	533
11.5 Area Voltage Protection Based on System Jacobian Computing Combined with OEL and OLTC Real-time Information .....	537
11.6 Conclusions .....	539
References .....	541
<b>Appendix .....</b>	<b>543</b>
Appendix A.....	543
Synchronous Machine Ideal Model .....	543
Generator Operating on a Large Power System.....	546
Reference.....	554
<b>Index.....</b>	<b>555</b>

Voltage Control and Protection in Electrical Power  
Systems

From System Components to Wide-Area Control

Corsi, S.

2015, XXVIII, 557 p. 405 illus., 337 illus. in color.,

Hardcover

ISBN: 978-1-4471-6635-1
