

Contents

Part I Fundamentals

1	Introduction	3
1.1	Uncertainty	3
1.1.1	Effects of Uncertainty	3
1.2	A Brief History	4
1.3	Basic Probabilistic Models	5
1.3.1	An Example	6
1.4	Probabilistic Graphical Models	8
1.5	Representation, Inference, and Learning	10
1.6	Applications	11
1.7	Overview of the Book	12
1.8	Additional Reading	13
	References	13
2	Probability Theory	15
2.1	Introduction	15
2.2	Basic Rules	16
2.3	Random Variables	18
2.3.1	Two-Dimensional Random Variables	21
2.4	Information Theory	23
2.5	Additional Reading	25
2.6	Exercises	25
	References	26
3	Graph Theory	27
3.1	Definitions	27
3.2	Types of Graphs	28
3.3	Trajectories and Circuits	29
3.4	Graph Isomorphism	30
3.5	Trees	31

3.6	Cliques	33
3.7	Perfect Ordering	34
3.8	Ordering and Triangulation Algorithms	35
3.8.1	Maximum Cardinality Search	35
3.8.2	Graph Filling	36
3.9	Additional Reading	37
3.10	Exercises	37
	References.	38

Part II Probabilistic Models

4	Bayesian Classifiers	41
4.1	Introduction	41
4.1.1	Classifier Evaluation	42
4.2	Bayesian Classifier	42
4.2.1	Naive Bayes Classifier.	43
4.3	Alternative Models: TAN, BAN	46
4.4	Semi-Naive Bayesian Classifiers	48
4.5	Multidimensional Bayesian Classifiers	50
4.5.1	Multidimensional Bayesian Network Classifiers	51
4.5.2	Bayesian Chain Classifiers	52
4.6	Hierarchical Classification	54
4.6.1	Chained Path Evaluation	55
4.7	Applications.	56
4.7.1	Visual Skin Detection	56
4.7.2	HIV Drug Selection	58
4.8	Additional Reading	60
4.9	Exercises	60
	References.	61
5	Hidden Markov Models	63
5.1	Introduction	63
5.2	Markov Chains.	64
5.2.1	Parameter Estimation.	66
5.2.2	Convergence	67
5.3	Hidden Markov Models.	68
5.3.1	Evaluation	70
5.3.2	State Estimation	72
5.3.3	Learning	74
5.3.4	Extensions	76
5.4	Applications.	77
5.4.1	PageRank	78
5.4.2	Gesture Recognition	78

5.5	Additional Reading	80
5.6	Exercises	80
	References.	81
6	Markov Random Fields	83
6.1	Introduction	83
6.2	Markov Networks	84
6.2.1	Regular Markov Random Fields	86
6.3	Gibbs Random Fields	88
6.4	Inference	88
6.5	Parameter Estimation.	90
6.5.1	Parameter Estimation with Labeled Data	90
6.6	Conditional Random Fields	92
6.7	Applications.	93
6.7.1	Image Smoothing	93
6.7.2	Improving Image Annotation	95
6.8	Additional Reading	98
6.9	Exercises	98
	References.	99
7	Bayesian Networks: Representation and Inference	101
7.1	Introduction	101
7.2	Representation	102
7.2.1	Structure	103
7.2.2	Parameters	106
7.3	Inference	111
7.3.1	Singly Connected Networks: Belief Propagation	112
7.3.2	Multiple Connected Networks	116
7.3.3	Approximate Inference	124
7.3.4	Most Probable Explanation	126
7.3.5	Continuous Variables	127
7.4	Applications.	129
7.4.1	Information Validation.	129
7.4.2	Reliability Analysis.	132
7.5	Additional Reading	134
7.6	Exercises	135
	References.	135
8	Bayesian Networks: Learning	137
8.1	Introduction	137
8.2	Parameter Learning	137
8.2.1	Smoothing	137
8.2.2	Parameter Uncertainty	138

8.2.3	Missing Data	139
8.2.4	Discretization	142
8.3	Structure Learning	143
8.3.1	Tree Learning	144
8.3.2	Learning a Polytree	146
8.3.3	Search and Score Techniques	147
8.3.4	Independence Tests Techniques	152
8.4	Combining Expert Knowledge and Data	153
8.5	Applications	154
8.5.1	Air Pollution Model for Mexico City	154
8.6	Additional Reading	157
8.7	Exercises	157
	References	159
9	Dynamic and Temporal Bayesian Networks	161
9.1	Introduction	161
9.2	Dynamic Bayesian Networks	161
9.2.1	Inference	163
9.2.2	Learning	163
9.3	Temporal Event Networks	164
9.3.1	Temporal Nodes Bayesian Networks	165
9.4	Applications	169
9.4.1	DBN: Gesture Recognition	169
9.4.2	TNBN: Predicting HIV Mutational Pathways	173
9.5	Additional Reading	176
9.6	Exercises	176
	References	177
 Part III Decision Models		
10	Decision Graphs	181
10.1	Introduction	181
10.2	Decision Theory	181
10.2.1	Fundamentals	182
10.3	Decision Trees	185
10.4	Influence Diagrams	187
10.4.1	Modeling	187
10.4.2	Evaluation	188
10.4.3	Extensions	192
10.5	Applications	193
10.5.1	Decision-Theoretic Caregiver	193

10.6	Additional Reading	196
10.7	Exercises	196
	References.	197
11	Markov Decision Processes	199
11.1	Introduction	199
11.2	Modeling	199
11.3	Evaluation	202
	11.3.1 Value Iteration	202
	11.3.2 Policy Iteration	203
11.4	Factored MDPs.	204
	11.4.1 Abstraction	206
	11.4.2 Decomposition	206
11.5	Partially Observable Markov Decision Processes.	207
11.6	Applications.	208
	11.6.1 Power Plant Operation.	208
	11.6.2 Robot Task Coordination	210
11.7	Additional Reading	214
11.8	Exercises	214
	References.	215

Part IV Relational and Causal Models

12	Relational Probabilistic Graphical Models	219
12.1	Introduction	219
12.2	Logic	220
	12.2.1 Propositional Logic	220
	12.2.2 First-Order Predicate Logic	221
12.3	Probabilistic Relational Models.	223
	12.3.1 Inference	225
	12.3.2 Learning	225
12.4	Markov Logic Networks	225
	12.4.1 Inference	227
	12.4.2 Learning	227
12.5	Applications.	228
	12.5.1 Student Modeling	228
12.6	Probabilistic Relational Student Model	228
	12.6.1 Visual Grammars	231
12.7	Additional Reading	233
12.8	Exercises	233
	References.	234

13 Graphical Causal Models	237
13.1 Introduction	237
13.2 Causal Bayesian Networks	238
13.3 Causal Reasoning	240
13.3.1 Prediction	240
13.3.2 Counterfactuals	241
13.4 Learning Causal Models	242
13.5 Applications	244
13.5.1 Learning a Causal Model for ADHD	244
13.6 Additional Reading	245
13.7 Exercises	245
References	246
Glossary	247
Index	251

Probabilistic Graphical Models

Principles and Applications

Sugar, L.E.

2015, XXIV, 253 p. 117 illus., 4 illus. in color., Hardcover

ISBN: 978-1-4471-6698-6
