

Contents

- 1 The Solar System..... 1**
 - The Solar System Family: An Overview 1
 - Orbital and Rotational Dynamics..... 13
 - Resonances..... 17
 - Migration and Collisions..... 19
- 2 The Terrestrial Planets 21**
 - General View..... 21
 - Earth..... 25
 - The Moon..... 30
 - Mercury..... 40
 - Venus..... 44
 - Mars 58
 - Some Problems of Our Neighbor Planets’ Evolution 86
- 3 The Giant Planets..... 93**
 - General View..... 93
 - Jupiter..... 96
 - Saturn 99
 - Uranus 101
 - Neptune 104
 - Atmospheric Dynamics..... 107
 - Satellites and Rings..... 111
 - Satellites 111
 - Rings 125
- 4 Small Bodies 131**
 - Nature and Dynamics..... 131
 - Asteroids 132
 - Comets 141

Interplanetary Dust.....	148
Meteorites	148
Migration and Implications.....	150
5 The Sun and Heliosphere	157
The Sun As a Star: General Properties	157
Structure and Energy.....	160
Composition.....	168
Solar Activity	169
Heliosphere	173
6 Stars: Birth, Lifetime, and Death	177
General View.....	177
Birth	182
Evolution and Death.....	190
7 Extrasolar Planets.....	205
Brief History	205
Methods of Detection.....	208
Properties of Exoplanets	212
Dynamics of Exoplanets	218
Further Study	220
8 Planetary Systems: Origin and Evolution	225
Basic Remarks	225
Prerequisites.....	229
Protoplanetary Accretion Disks	234
Disk Formation: Observations, Scenario, Model.....	234
Dust in Disk	238
Chronology of Disk Evolution and Cosmochemical Constraints	242
Planetary System Formation	245
Model of Primary Body Formation.....	245
Further Evolution	247
Problem of Angular Momentum Transfer	248
Planetary System Dynamics	250
Multiples	252
The Problems to Be Solved.....	254
9 Astrobiology: Basic Concepts	259
Some Historical Highlights.....	259
Prerequisites and Constraints.....	262
Tentative Models of the Origin of Life	268
Evolution.....	272
10 The Structure of the Universe.....	279
View of the Universe.....	279
Galaxies: Formation and Dynamics.....	292

11 Cosmology: The Origin and Fate of the Universe.....	295
Brief History	295
Hubble's Law	297
Evolution and Fate of the Universe.....	301
Standard Model and Superstring (M) Theory.....	308
Main Interactions and Elementary Particles	308
Standard Model and Symmetry Principles	309
Symmetry Breaking and the Higgs Boson.....	311
Grand Unification.....	313
Superstring Theory.....	314
Modern View of the Universe: The Multiverse and Wormholes	315
 Conclusions.....	 319
 Additional Reading	 323
 Index.....	 327
