

# Table of Contents

<b>1. Introduction . . . . .</b>	<b>1</b>
1.1. Historical Background . . . . .	1
1.1.1. Relation Between Polymer Science and Mechanics . . . . .	6
1.1.2. Perspective and Scope of This Text . . . . .	10
1.2. Review Questions . . . . .	14
<b>2. Stress and Strain Analysis and Measurement . . . . .</b>	<b>15</b>
2.1. Some Important and Useful Definitions . . . . .	15
2.2. Elementary Definitions of Stress, Strain and Material Properties . . . . .	17
2.3. Typical Stress-Strain Properties . . . . .	23
2.4. Idealized Stress-Strain Diagrams . . . . .	27
2.5. Mathematical Definitions of Stress, Strain and Material Characteristics . . . . .	28
2.6. Principal Stresses . . . . .	40
2.7. Deviatoric and Dilatational Components of Stress and Strain . . . . .	42
2.8. Failure (Rupture or Yield) Theories . . . . .	47
2.9. Atomic Bonding Model for Theoretical Mechanical Properties . . . . .	50
2.10. Review Questions . . . . .	53
2.11. Problems . . . . .	54
<b>3. Characteristics, Applications and Properties of Polymers . . .</b>	<b>57</b>
3.1. General Classification and Types of Polymers . . . . .	57
3.2. Typical Applications . . . . .	63
3.3. Mechanical Properties of Polymers . . . . .	68
3.3.1. Examples of Stress-Strain Behavior of Various Polymers . . . . .	70
3.4. An Introduction to Polymer Viscoelastic Properties and Characterization . . . . .	78
3.4.1. Relaxation and Creep Tests . . . . .	78
3.4.2. Isochronous Modulus Versus Temperature Behavior . . . . .	82
3.4.3. Isochronous Stress-Strain Behavior: Linearity . . .	85

3.5.	Phenomenological Mechanical Models . . . . .	87
3.5.1.	Differential Stress-Strain Relations and Solutions for a Maxwell Fluid . . . . .	90
3.5.2.	Differential Stress-Strain Relations and Solutions for a Kelvin Solid . . . . .	95
3.5.3.	Creep of a Three Parameter Solid and a Four Parameter Fluid . . . . .	97
3.6.	Review Questions . . . . .	98
3.7.	Problems . . . . .	99
<b>4.</b>	<b>Polymerization and Classification . . . . .</b>	<b>101</b>
4.1.	Polymer Bonding . . . . .	101
4.2.	Polymerization . . . . .	105
4.3.	Classification by Bonding Structure Between Chains and Morphology of Chains . . . . .	109
4.4.	Molecular Configurations . . . . .	112
4.4.1.	Isomers . . . . .	112
4.4.2.	Copolymers . . . . .	115
4.4.3.	Molecular Conformations . . . . .	117
4.5.	Random Walk Analysis of Chain End-to-End Distance . . . . .	120
4.6.	Morphology . . . . .	124
4.7.	Molecular Weight . . . . .	133
4.8.	Methods for the Measurement of Molecular Weight . . . .	141
4.9.	Polymer Synthesis Methods . . . . .	148
4.10.	Spectrography . . . . .	154
4.11.	Microscopes/Microscopy . . . . .	157
4.12.	Review Questions . . . . .	165
4.13.	Problems . . . . .	166
<b>5.</b>	<b>Differential Constitutive Equations . . . . .</b>	<b>169</b>
5.1.	Methods for the Development of Differential Equations for Mechanical Models . . . . .	170
5.2.	A Note on Realistic Creep and Relaxation Testing . . . .	175
5.3.	Generalized Maxwell and Kelvin Models . . . . .	178
5.3.1.	A Caution on the Use of Generalized Differential Equations . . . . .	186
5.3.2.	Description of Parameters for Various Elementary Mechanical Models . . . . .	187
5.4.	Alfrey's Correspondence Principle . . . . .	190

5.5.	Dynamic Properties: Steady State Oscillation Testing . . .	191
5.5.1.	Examples of Storage and Loss Moduli and Damping Ratios . . . . .	201
5.5.2.	Molecular Mechanisms Associated with Dynamic Properties . . . . .	205
5.5.3.	Other Instruments to Determine Dynamic Properties . . . . .	207
5.6.	Review Questions . . . . .	208
5.7.	Problems . . . . .	209
<b>6.</b>	<b>Hereditary Integral Representations of Stress and Strain . . .</b>	<b>211</b>
6.1.	Boltzmann Superposition Principle . . . . .	211
6.2.	Linearity . . . . .	218
6.3.	Spectral Representation of Viscoelastic Materials . . . . .	219
6.4.	Interrelations Among Various Viscoelastic Properties . . .	222
6.5.	Review Questions . . . . .	229
6.6.	Problems . . . . .	229
<b>7.</b>	<b>Time and Temperature Behavior of Polymers . . . . .</b>	<b>231</b>
7.1.	Effect of Temperature on Viscoelastic Properties of Amorphous Polymers . . . . .	232
7.2.	Development of Time Temperature-Superposition- Principle (TTSP) Master Curves . . . . .	235
7.2.1.	Kinetic Theory of Polymers . . . . .	238
7.2.2.	WLF Equation for the Shift Factor . . . . .	241
7.2.3.	Mathematical Development of the TTSP . . . . .	245
7.2.4.	Potential Error for Lack of Vertical Shift . . . . .	252
7.3.	Exponential Series Representation of Master Curves . . .	252
7.3.1.	Numerical Approach to Prony Series Representation . . . . .	256
7.3.2.	Determination of the Relaxation Modulus from a Relaxation Spectrum . . . . .	261
7.4.	Constitutive Law with Effective Time . . . . .	265
7.5.	Molecular Mechanisms Associated with Viscoelastic Response . . . . .	267
7.6.	Entropy Effects and Rubber Elasticity . . . . .	268
7.7.	Physical and Chemical Aging . . . . .	275
7.8.	Review Questions . . . . .	282
7.9.	Problems . . . . .	282

<b>8. Elementary Viscoelastic Stress Analysis for Bars and Beams . . . . .</b>	<b>287</b>
8.1. Fundamental Concepts . . . . .	287
8.2. Analysis of Axially Loaded Bars . . . . .	289
8.3. Analysis of Circular Cylinder Bars in Torsion . . . . .	294
8.4. Analysis of Prismatic Beams in Pure Bending . . . . .	296
8.4.1. Stress Analysis of Beams in Bending . . . . .	296
8.4.2. Deformation Analysis of Beams in Bending . . . . .	297
8.5. Stresses and Deformation in Beams for Conditions Other Than Pure Bending . . . . .	301
8.6. Shear Stresses and Deflections in Beams . . . . .	309
8.7. Review Questions . . . . .	309
8.8. Problems . . . . .	310
<b>9. Viscoelastic Stress Analysis in Two and Three Dimensions . .</b>	<b>311</b>
9.1. Elastic Stress-Strain Equations . . . . .	311
9.2. Viscoelastic Stress-Strain Relations . . . . .	313
9.3. Relationship Between Viscoelastic Moduli (Compliances) . . . . .	315
9.4. Frequently Encountered Assumptions in Viscoelastic Stress Analysis . . . . .	316
9.5. General Viscoelastic Correspondence Principle . . . . .	318
9.5.1. Governing Equations and Solutions for Linear Elasticity . . . . .	318
9.5.2. Governing Equations and Solutions for Linear Viscoelasticity . . . . .	320
9.6. Thick Wall Cylinder and Other Problems . . . . .	323
9.6.1. Elasticity Solution of a Thick Wall Cylinder . . . . .	323
9.6.2. Elasticity Solution for a Reinforced Thick Wall Cylinder (Solid Propellant Rocket Problem) . . . . .	326
9.6.3. Viscoelasticity Solution for a Reinforced Thick Wall Cylinder (Solid Propellant Rocket Problem) . . . . .	328
9.7. Solutions Using Broadband Bulk, Shear and Poisson's Ratio Measured Functions . . . . .	334
9.8. Review Questions . . . . .	336
9.9. Problems . . . . .	336
<b>10. Nonlinear Viscoelasticity . . . . .</b>	<b>339</b>
10.1. Types of Nonlinearities . . . . .	339
10.2. Approaches to Nonlinear Viscoelastic Behavior . . . . .	344

10.3.	The Schapery Single-Integral Nonlinear Model . . . . .	350
10.3.1.	Preliminary Considerations . . . . .	350
10.3.2.	The Schapery Equation . . . . .	353
10.3.3.	Determining Material Parameters from a Creep and Creep Recovery Test . . . . .	361
10.4.	Empirical Approach To Time-Stress-Superposition (TSSP) . . . . .	370
10.5.	Review Questions . . . . .	375
10.6.	Problems . . . . .	376
<b>11.</b>	<b>Rate and Time-Dependent Failure: Mechanisms and Predictive Models . . . . .</b>	<b>379</b>
11.1.	Failure Mechanisms in Polymers . . . . .	380
11.1.1.	Atomic Bond Separation Mechanisms . . . . .	381
11.1.2.	Shear Bands . . . . .	384
11.1.3.	Crazing . . . . .	387
11.2.	Rate Dependent Yielding . . . . .	389
11.3.	Delayed or Time Dependent Failure of Polymers . . . . .	395
11.3.1.	A Mathematical Model for Viscoelastic- Plastic Behavior . . . . .	398
11.3.2.	Analytical Approaches to Creep Rupture . . . . .	407
11.4.	Review Questions . . . . .	427
11.5.	Problems . . . . .	427
	<b>Appendix A: Step and Singularity Functions . . . . .</b>	<b>429</b>
	<b>Appendix B: Transforms . . . . .</b>	<b>433</b>
	<b>Appendix C: Durability and Accelerated Life Predictions of Structural Polymers . . . . .</b>	<b>437</b>
	<b>Appendix D: Herbert Leaderman: A Master of Polymer Physics and Mechanics . . . . .</b>	<b>449</b>
	<b>References . . . . .</b>	<b>455</b>
	<b>Author Index . . . . .</b>	<b>473</b>
	<b>Subject Index . . . . .</b>	<b>479</b>

Polymer Engineering Science and Viscoelasticity

An Introduction

Brinson, H.F.; Brinson, L.C.

2015, XVII, 482 p. 266 illus., 82 illus. in color.,

Hardcover

ISBN: 978-1-4899-7484-6
