

# Contents

<b>1</b>	<b>Introduction .....</b>	<b>1</b>
1.1	Concept .....	1
1.2	Nodes.....	3
1.3	Elements.....	3
1.4	Direct Approach .....	4
1.4.1	Linear Spring.....	5
1.4.2	Heat Flow .....	6
1.4.3	Assembly of the Global System of Equations.....	7
1.4.4	Solution of the Global System of Equations .....	11
1.4.5	Boundary Conditions .....	12
<b>2</b>	<b>Fundamentals of ANSYS.....</b>	<b>15</b>
2.1	Useful Definitions .....	15
2.2	Before an ANSYS Session .....	16
2.2.1	Analysis Discipline.....	16
2.2.2	Time Dependence.....	17
2.2.3	Nonlinearity.....	18
2.2.4	Practical Modeling Considerations .....	19
2.3	Organization of ANSYS Software .....	25
2.4	ANSYS Analysis Approach.....	25
2.4.1	ANSYS Preprocessor .....	26
2.4.2	ANSYS Solution Processor.....	26
2.4.3	ANSYS General Postprocessor .....	26
2.4.4	ANSYS Time History Postprocessor .....	26
2.5	ANSYS File Structure .....	26
2.5.1	Database File.....	27
2.5.2	Log File .....	27
2.6	Error File .....	27
2.6.1	Results Files .....	28
2.7	Description of ANSYS Menus and Windows .....	28
2.7.1	Utility Menu .....	28
2.7.2	Main Menu .....	30

2.7.3	Toolbar .....	30
2.7.4	Input Field .....	30
2.7.5	Graphics Window .....	30
2.7.6	Output Window .....	30
2.8	Using the ANSYS Help System .....	31
2.8.1	Help Contents .....	31
2.8.2	Help Index .....	32
2.8.3	Search in Help .....	32
2.8.4	Verification Manual .....	33
<b>3</b>	<b>Fundamentals of Discretization .....</b>	<b>35</b>
3.1	Local and Global Numbering .....	35
3.2	Approximation Functions .....	35
3.3	Coordinate Systems .....	40
3.3.1	Generalized Coordinates .....	40
3.3.2	Global Coordinates .....	40
3.3.3	Local Coordinates .....	40
3.3.4	Natural Coordinates .....	41
3.4	Shape Functions .....	47
3.4.1	Linear Line Element with Two Nodes .....	50
3.4.2	Quadratic Line Element with Three Nodes: Centroidal Coordinate .....	52
3.4.3	Linear Triangular Element with Three Nodes: Global Coordinate .....	53
3.4.4	Quadratic Triangular Element with Six Nodes .....	55
3.4.5	Linear Quadrilateral Element with Four Nodes: Centroidal Coordinate .....	57
3.5	Isoparametric Elements: Curved Boundaries .....	59
3.6	Numerical Evaluation of Integrals .....	63
3.6.1	Line Integrals .....	63
3.6.2	Triangular Area Integrals .....	67
3.6.3	Quadrilateral Area Integrals .....	69
3.7	Problems .....	72
<b>4</b>	<b>ANSYS Preprocessor .....</b>	<b>75</b>
4.1	Fundamentals of Modeling .....	75
4.2	Modeling Operations .....	75
4.2.1	Title .....	76
4.2.2	Elements .....	76
4.2.3	Real Constants .....	82
4.2.4	Material Properties .....	84
4.2.5	Element Attributes .....	86
4.2.6	Interaction with the Graphics Window: Picking Entities .....	87
4.2.7	Coordinate Systems .....	90

4.2.8	Working Plane .....	92
4.3	Solid Modeling .....	95
4.3.1	Bottom-up Approach: Entities .....	96
4.3.2	Top-Down Approach: Primitives .....	102
4.4	Boolean Operators .....	107
4.4.1	Adding .....	108
4.4.2	Subtracting .....	108
4.4.3	Overlap .....	110
4.4.4	Gluing .....	110
4.4.5	Dividing .....	111
4.5	Additional Operations .....	113
4.5.1	Extrusion .....	113
4.5.2	Moving and Copying .....	117
4.5.3	Keeping/Deleting Original Entities .....	119
4.5.4	Listing Entities .....	120
4.5.5	Deleting Entities .....	120
4.6	Viewing a Model .....	121
4.6.1	Plotting: PanZoom, and Rotate Functions .....	121
4.6.2	Plotting/Listing Entities .....	123
4.6.3	Numbers in the Graphics Window .....	124
4.7	Meshing .....	125
4.7.1	Automatic Meshing .....	125
4.7.2	Manipulation of the Mesh .....	132
4.8	Selecting and Components .....	133
4.8.1	Selecting Operations .....	133
4.8.2	Components .....	136
<b>5</b>	<b>ANSYS Solution and Postprocessing .....</b>	<b>139</b>
5.1	Overview .....	139
5.2	Solution .....	140
5.2.1	Analysis Options/Solution Controls .....	141
5.2.2	Boundary Conditions .....	143
5.2.3	Initial Conditions .....	144
5.2.4	Body Loads .....	144
5.2.5	Solution in Single and Multiple Load Steps .....	145
5.2.6	Failure to Obtain Solution .....	148
5.3	Postprocessing .....	149
5.3.1	General Postprocessor .....	150
5.3.2	Time History Postprocessor .....	150
5.3.3	Read Results .....	151
5.3.4	Plot Results .....	153
5.3.5	Element Tables .....	156
5.3.6	List Results .....	159
5.4	Example: One-dimensional Transient Heat Transfer .....	159

<b>6</b>	<b>Finite Element Equations</b> .....	177
6.1	Method of Weighted Residuals .....	177
6.1.1	Example: One-Dimensional Differential Equation with Line Elements .....	179
6.1.2	Example: Two-Dimensional Differential Equation with Linear Triangular Elements .....	187
6.1.3	Example: Two-Dimensional Differential Equation with Linear Quadrilateral Elements .....	203
6.2	Principle of Minimum Potential Energy .....	221
6.2.1	Example: One-Dimensional Analysis with Line Elements .....	228
6.2.2	Two-Dimensional Structural Analysis .....	234
6.3	Problems .....	272
<b>7</b>	<b>Use of Commands in ANSYS</b> .....	281
7.1	Basic ANSYS Commands .....	281
7.1.1	Operators and Functions .....	285
7.1.2	Defining Parameters .....	286
7.2	A Typical Input File .....	290
7.3	Selecting Operations .....	292
7.4	Extracting Information from ANSYS .....	297
7.5	Programming with ANSYS .....	300
7.5.1	DO Loops .....	300
7.5.2	IF Statements .....	302
7.5.3	/OUTPUT and *VWRITE Commands .....	304
7.6	Macro Files .....	306
7.7	Useful Resources .....	308
7.7.1	Using the Log File for Programming .....	308
7.7.2	Using the Verification Problems for Programming .....	310
<b>8</b>	<b>Linear Structural Analysis</b> .....	313
8.1	Static Analysis .....	313
8.1.1	Trusses .....	313
8.1.2	Beams .....	320
8.1.3	Three-Dimensional Problems .....	325
8.1.4	Two-Dimensional Idealizations .....	329
8.1.5	Plates and Shells .....	355
8.2	Linear Buckling Analysis .....	383
8.3	Thermomechanical Analysis .....	392
8.4	Fracture Mechanics Analysis .....	400
8.5	Dynamic Analysis .....	411
8.5.1	Modal Analysis .....	413
8.5.2	Harmonic Analysis .....	423
8.5.3	Transient Analysis .....	437

<b>9 Linear Analysis of Field Problems</b>	455
9.1 Heat Transfer Problems	455
9.1.1 Steady-state Analysis	456
9.1.2 Transient Analysis	497
9.1.3 Radiation Analysis	519
9.2 Moisture Diffusion	525
<b>10 Nonlinear Structural Analysis</b>	539
10.1 Geometric Nonlinearity	542
10.1.1 Large Deformation Analysis of a Plate	543
10.1.2 Post-buckling Analysis of a Plate with a Hole	546
10.2 Material Nonlinearity	551
10.2.1 Plastic Deformation of an Aluminum Sphere	552
10.2.2 Plastic Deformation of an Aluminum Cylinder	555
10.2.3 Stress Analysis of a Reinforced Viscoelastic Cylinder	562
10.2.4 Viscoplasticity Analysis of a Eutectic Solder Cylinder	566
10.2.5 Combined Plasticity and Creep	572
10.3 Contact	579
10.3.1 Contact Analysis of a Block Dropping on a Beam	581
10.3.2 Simulation of a Nano-Indentation Test	587
<b>11 Advanced Topics in ANSYS</b>	595
11.1 Coupled Degrees of Freedom	595
11.2 Constraint Equations	597
11.3 Submodeling	603
11.4 Substructuring: Superelements	609
11.4.1 Generation Pass	612
11.4.2 Use Pass	618
11.4.3 Expansion Pass	620
11.5 Interacting with External Files	621
11.5.1 Reading an Input File	622
11.5.2 Writing Data to External ASCII Files	622
11.5.3 Executing an External File	625
11.5.4 Modifying ANSYS Results	627
11.6 Modifying the ANSYS GUI	628
11.6.1 GUI Development Demonstration	635
11.6.2 GUI Modification for Obtaining a Random Load Profile	643
11.6.3 Function Block for Selecting Elements Using a Pick Menu	648
