Contents

1 Convolution 1
1.1 Convolution 1
1.2 FIR Digital Filter. 5
1.3 Calculation of the Filter Output. 7
1.4 Fourier Transform of the Convolution 8
1.5 Circular (Periodic) Convolution. 12
1.6 Calculation of Filter Output by FFT Technique. 14
1.7 Determination of Filter Coefficients from Frequency Responses. 16
1.8 Exercise 21

2 Correlation 23
2.1 Similarity of Two Sequences of Numbers. 23
2.2 Cross-Correlation Function 25
2.3 Cross-Correlation Function Between Input and Output Signals of a Transfer System 28
2.4 Auto-Correlation Function 30
2.5 Analysis of Sequences by Auto-Correlation Functions 32
2.6 Short-Term Auto-Correlation Function. 35
2.7 Auto-Correlations of Sequences of Complex Numbers 38
2.8 Fourier Transforms of Auto-Correlation Functions. 39
2.9 Calculation of Auto-Correlation Functions by the FFT. 41
2.10 Discussions of Stability and Estimation Precision 45
2.11 DFT of Cross-Correlation Functions 48
2.12 Exercise 51

3 Cross-Spectrum Method. 53
3.1 System and Its Input and Output 53
3.2 Principle of the Cross-Spectrum Method 54
3.3 Estimation of Transfer Functions. 56

3.4 Circular Convolution and Time Windows . . . 59
3.5 Causality and Input Sequence . . . 63
3.6 Utilization of Circular Convolution . . . 65
3.6.1 Duplex Random Signal Source . . . 66
3.6.2 Periodic Swept-Sine Signal . . . 67
3.7 Deformation of Impulse Response . . . 69
3.7.1 Deduction of the Deformation Function . . . 70
3.7.2 The Deformation Functions of Actual Time Windows . . . 73
3.7.3 Impulse Response Estimation Without Amplitude Deformation . . . 77
3.8 Coherence Function . . . 79
3.9 Exercise . . . 84

4 Cepstrum Analysis . . . 85
4.1 Propagation Time Difference and Spectrum . . . 85
4.2 DFT of Logarithmic Periodogram . . . 88
4.3 Estimation of the Time Period of Waveform . . . 92
4.4 Application of Period Estimation . . . 94
4.5 Estimation of a Gross Pattern of a Transfer Function . . . 97
4.6 Exercise . . . 103

5 Hilbert Transform . . . 105
5.1 Envelopes of Cosine Waves . . . 105
5.2 Orthogonal Wave to the Cosine Wave . . . 107
5.3 Discrete Cosine Waves and Orthogonal Waves . . . 108
5.4 Generation of Orthogonal Waveforms . . . 111
5.5 Hilbert Transform . . . 113
5.6 Real and Imaginary Parts of Transfer Functions . . . 115
5.7 Envelopes and Orthogonal Functions . . . 116
5.8 Amplitude Modulation . . . 119
5.9 Instantaneous Frequency . . . 122
5.10 Frequency Modulation . . . 125
5.11 Exercise . . . 129

6 Two-Dimensional Transform . . . 131
6.1 Extension to Two-Dimensional Discrete Fourier Transforms . . . 131
6.2 Two-Dimensional Inverse Discrete Fourier Transform . . . 133
6.3 Examples of Two-Dimensional DFT and IDFT . . . 135
6.4 Two-Dimensional Discrete Cosine Transforms (2D DCT) . . . 138
6.4.1 DCT-I . . . 138
6.4.2 DCT-II . . . 139
6.4.3 DCT-III . . . 141
6.4.4 DCT-IV . . . 142

6.5 DCT of Gray Images 143
6.6 Data Compression 145
6.7 Exercise 151

Appendix 153
