<b>1</b>	<b>Overview of the Handbook</b>	<b>1</b>
	Michael C. Fu	
	References	6
<b>2</b>	<b>Discrete Optimization via Simulation</b>	<b>9</b>
	L. Jeff Hong, Barry L. Nelson, and Jie Xu	
2.1	Introduction	9
2.2	Optimality Conditions	13
2.3	Ranking and Selection	16
2.4	Ordinal Optimization	22
2.5	Globally Convergent Random Search Algorithms	25
2.6	Locally Convergent Random Search Algorithms	33
2.7	Algorithm Enhancements	39
2.8	Using Commercial Solvers	39
2.8.1	Preliminary Experiment to Control Sampling Variability	40
2.8.2	Restarting the Optimization	40
2.8.3	Statistical Clean Up After Search	41
	References	41
<b>3</b>	<b>Ranking and Selection: Efficient Simulation Budget Allocation</b>	<b>45</b>
	Chun-Hung Chen, Stephen E. Chick, Loo Hay Lee, and Nugroho A. Pujowidianto	
3.1	Introduction	45
3.1.1	Intuitive Explanations of Simulation Budget Allocation	46
3.1.2	Overview of Ranking and Selection (R&S)	47
3.1.3	Organization	49
3.2	Problem Formulation and Selection Procedures	49
3.2.1	Problem Formulation of Selecting the Best	49
3.2.2	A Generic Algorithm for Selection Procedures	51
3.2.3	General Concepts for <i>OCBA</i> and <i>EVI</i>	52

3.3	Optimal Computing Budget Allocation ( <i>OCBA</i> )	54
3.3.1	Maximization of <i>PCS</i>	54
3.3.2	Asymptotic Allocation Rule	54
3.3.3	Sequential Heuristic Algorithm for Allocation	55
3.3.4	Numerical Results	57
3.3.5	Minimization of <i>EOC</i>	59
3.3.6	Other Variants	60
3.4	Expected Value of Information ( <i>EVI</i> )	63
3.4.1	Linear Loss ( <i>LL</i> )	64
3.4.2	Small-Sample <i>EVI</i> Allocation Rule ( <i>LL<sub>1</sub></i> )	68
3.4.3	Stopping Rules	69
3.4.4	Numerical Results for <i>LL</i> and <i>LL<sub>1</sub></i>	70
3.4.5	Economics of Selection Procedures ( <i>ESP</i> )	72
3.4.6	Other Variants of <i>EVI</i>	76
3.5	Conclusion	77
	References	78
<b>4</b>	<b>Response Surface Methodology</b>	81
	Jack P.C. Kleijnen	
4.1	Introduction	81
4.2	RSM Basics	83
4.3	RSM in Simulation	87
4.4	Adapted Steepest Descent ( <i>ASD</i> )	88
4.5	Multiple Responses: Generalized RSM	89
4.6	Testing an Estimated Optimum in GRSM: KKT Conditions	93
4.7	Robust Optimization	98
4.8	Conclusions	102
	References	102
<b>5</b>	<b>Stochastic Gradient Estimation</b>	105
	Michael C. Fu	
5.1	Introduction	105
5.2	Indirect Gradient Estimators	108
5.2.1	Finite Differences	109
5.2.2	Simultaneous Perturbation	110
5.3	Direct Gradient Estimators	111
5.3.1	Derivatives of Random Variables	115
5.3.2	Derivatives of Measures	116
5.3.3	Input Distribution Examples	118
5.3.4	Output Examples	125
5.3.5	Rudimentary Theory	132
5.3.6	Guidelines for the Practitioner	135
5.4	Quantile Sensitivity Estimation	136
5.5	New Approaches for Using Direct Stochastic Gradients in Simulation Optimization	139
5.5.1	Direct Gradient Augmented Regression ( <i>DiGAR</i> )	139

5.5.2	Stochastic Kriging with Gradients (SKG) .....	141
5.5.3	Gradient Extrapolated Stochastic Kriging (GESK) .....	142
5.5.4	Secant-Tangents AveRaged Stochastic Approximation (STAR-SA) .....	144
5.6	Concluding Remarks .....	145
	References .....	145
<b>6</b>	<b>An Overview of Stochastic Approximation</b> .....	<b>149</b>
	Marie Chau and Michael C. Fu	
6.1	Introduction .....	149
6.2	Classical Methods .....	153
6.2.1	Robbins–Monro (RM) Algorithm .....	153
6.2.2	Kiefer–Wolfowitz (KW) Algorithm .....	154
6.3	Well-Known Variants .....	156
6.3.1	Kesten’s Rule .....	156
6.3.2	Averaging Iterates .....	157
6.3.3	Varying Bounds .....	158
6.3.4	Simultaneous Perturbation Stochastic Approximation (SPSA) .....	160
6.4	Recent Modifications .....	161
6.4.1	Scaled-and-Shifted Kiefer–Wolfowitz (SSKW) .....	162
6.4.2	Robust Stochastic Approximation (RSA) .....	164
6.4.3	Accelerated Stochastic Approximation (AC-SA) for Strongly Convex Functions .....	165
6.4.4	Accelerated Stochastic Approximation (AC-SA) for Convex Functions .....	168
6.4.5	Secant-Tangents AveRaged Stochastic Approximation (STAR-SA) .....	169
6.5	Numerical Experiments .....	170
6.6	Concluding Remarks .....	175
	References .....	176
<b>7</b>	<b>Stochastic Approximation Methods and Their Finite-Time Convergence Properties</b> .....	<b>179</b>
	Saeed Ghadimi and Guanghui Lan	
7.1	Introduction .....	179
7.2	Convex Stochastic Optimization .....	182
7.2.1	Robust SA Method for Nonsmooth Stochastic Convex Optimization .....	183
7.2.2	Accelerated SA Methods for Nonsmooth and Smooth Stochastic Optimization .....	185
7.2.3	Accelerated SA Methods for Strongly Convex Optimization .....	191
7.3	Nonconvex Stochastic Optimization .....	195
7.4	Randomized Stochastic Zeroth-Order (SZO) Methods .....	200

7.5	Summary	204
	References	205
<b>8</b>	<b>A Guide to Sample Average Approximation</b>	207
	Sujin Kim, Raghu Pasupathy, and Shane G. Henderson	
8.1	Introduction	207
8.2	When Is SAA Appropriate?	210
8.3	Detecting When SAA Is Appropriate	216
8.4	Known Properties	221
8.4.1	Almost Sure Convergence	222
8.4.2	Convergence Rates for the SAA Method	225
8.4.3	The SAA Method in the Nonconvex Case	228
8.5	SAA Implementation	230
8.5.1	Sample Size Choice	231
8.5.2	Refined SAA Methods	232
8.6	Asymptotic Efficiency Calculation	234
8.6.1	Asymptotic Rates for Stochastic Approximation	235
8.6.2	Asymptotic Rates for the SAA Method	236
8.6.3	Asymptotic Rates for the RA Method	238
8.7	Conclusions	240
	References	241
<b>9</b>	<b>Stochastic Constraints and Variance Reduction Techniques</b>	245
	Tito Homem-de-Mello and Güzin Bayraksan	
9.1	Introduction	245
9.2	Problems with Stochastic Constraints	248
9.2.1	Problems with General Expected-Value Constraints	249
9.2.2	Problems with Probabilistic Constraints	253
9.2.3	Problems with Stochastic Dominance Constraints	256
9.3	Variance Reduction Techniques	260
9.3.1	Antithetic Variates	261
9.3.2	Latin Hypercube Sampling	262
9.3.3	Quasi-Monte Carlo	265
9.3.4	Importance Sampling	267
9.3.5	Control Variates	269
9.4	Conclusions	270
