

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Conventional Noise and Vibration Diagnoses	2
1.2	Holography	3
1.3	Acoustical Holography	3
1.4	Near-Field Acoustical Holography	4
1.5	Fourier Transform-Based NAH	5
1.6	Boundary Element Method-Based NAH	7
1.7	Helmholtz Equation Least-Squares Method-Based NAH	9
<b>2</b>	<b>The Spherical Wave Functions</b>	<b>11</b>
2.1	The Helmholtz Equation Under the Spherical Coordinates	11
2.2	Solution to $R(kr)$	12
2.3	Solution to $\Theta(\theta)$	16
2.4	Solution to $\Phi(\phi)$	18
2.5	Solution to $\hat{p}(r, \theta, \phi; \omega)$	20
<b>3</b>	<b>The Helmholtz Equation Least-Squares Method</b>	<b>27</b>
3.1	The HELS Formulations	28
3.2	Reconstructing the Radiated Acoustic Field	31
3.3	Predicting the Radiated Acoustic Field	37
3.4	Error Analyses	42
3.5	Regularization	46
3.6	Regularization Through Truncation of the Expansion Functions	47
3.7	Other Regularization Techniques	50
<b>4</b>	<b>Validity of the HELS Method</b>	<b>63</b>
4.1	Rayleigh Hypothesis	63
4.2	The Rayleigh Series Versus HELS Formulations	67

4.3	Justification of the HELS Formulations . . . . .	69
4.4	Significance of the Justification . . . . .	77
<b>5</b>	<b>Implementation of the HELS-Based NAH . . . . .</b>	<b>81</b>
5.1	Guidelines for Implementing the HELS Method . . . . .	82
5.2	Practical Considerations in Implementing the HELS Method . . . . .	88
5.3	Test Configuration . . . . .	89
5.4	Test Environment . . . . .	92
5.5	Clarifications . . . . .	96
<b>6</b>	<b>Combined Helmholtz Equation Least-Squares (CHELS) Method . . . . .</b>	<b>101</b>
6.1	The Helmholtz Integral Theory . . . . .	102
6.2	Nonuniqueness Difficulties . . . . .	109
6.3	Discrete Helmholtz Integral Formulations . . . . .	114
6.4	The Combined Helmholtz Equation Least-Squares Method . . . .	116
6.5	Applications of the CHELS Method . . . . .	118
<b>7</b>	<b>Hybrid NAH . . . . .</b>	<b>129</b>
7.1	Modified HELS . . . . .	129
7.2	Hybrid NAH . . . . .	131
7.3	Reconstructing Acoustic Fields Using the Hybrid NAH . . . . .	134
<b>8</b>	<b>Equivalent Sources Using HELS . . . . .</b>	<b>145</b>
8.1	Localized Spherical Waves . . . . .	146
8.2	Distributed Spherical Waves . . . . .	147
8.3	Distributed Point Sources . . . . .	149
8.4	Regularization for LSW, DSW, and DPS Expansions . . . . .	150
8.5	Performances of LSW, DSW, and DPS Expansions . . . . .	151
8.6	Locations of the Auxiliary Sources . . . . .	154
8.7	Condition Number of the Transfer Matrices . . . . .	155
8.8	Effect of Measurement Number . . . . .	156
8.9	Choice of Regularization . . . . .	159
<b>9</b>	<b>Transient HELS . . . . .</b>	<b>163</b>
9.1	Transient Acoustic Radiation . . . . .	165
9.2	Residue Theorem . . . . .	171
9.3	Extension to Arbitrary Time-Dependent Excitations . . . . .	174
9.4	Transient NAH Formulations . . . . .	176
9.4.1	Reconstruction Through BEM-Based NAH . . . . .	176
9.4.2	Reconstruction Through HELS-Based NAH . . . . .	178
9.4.3	Transient NAH Formulations . . . . .	179
9.4.4	Applications of the Transient NAH Formulations . . . . .	180

<b>10 Panel Acoustic Contribution Analysis Using HELS . . . . .</b>	<b>195</b>
10.1 The HELS-Based Panel Acoustic Contribution Analysis . . . . .	196
10.2 Procedures for Conducting HELS-Based Panel Acoustic Contributions Analyses . . . . .	200
10.3 Stories of Panel Acoustic Contributions Analyses . . . . .	203
10.3.1 Story 1: Sound Transmission Paths . . . . .	203
10.3.2 Story 2: Panel Acoustic Contribution Analyses . . . . .	207
10.3.3 Story 3: Engine Block Noise Analyses . . . . .	212
<b>References . . . . .</b>	<b>221</b>
<b>Index . . . . .</b>	<b>229</b>

The Helmholtz Equation Least Squares Method  
For Reconstructing and Predicting Acoustic Radiation

WU, S.

2015, XIII, 233 p. 82 illus., 61 illus. in color., Hardcover

ISBN: 978-1-4939-1639-9
