
Contents

1 Introduction.....	1
Objectives of Production Logging.....	1
Reservoir Performance.....	1
Completion Problems.....	2
Production and Injection Profiles.....	2
Gauging Treatment Effectiveness	2
Petroleum Reservoirs	2
Modern Production Logging Tools	4
Tools for Formation Properties	4
Tools for Fluid Typing and Monitoring	5
Tools for Completion Inspection.....	6
Quick Reference to Production Logging Tools.....	6
Bibliography	7
2 Cased-Hole Logging Environment	9
Planning a Production Logging Job.....	9
Pressure-Control Equipment.....	9
The Borehole Environment.....	11
Choosing Production Logs.....	12
Conveyance Methods	13
Answers to Text Questions	15
3 Reservoir Fluid Properties	17
PVT Refresher Course	17
Single-Component Hydrocarbon System	18
Multicomponent Hydrocarbon System	19
Oil Reservoirs	21
Condensate Reservoirs.....	21
Dry-Gas Reservoir	22
Composition of Natural Oils and Gases.....	23
Fluid Properties	24
Water	25
Gas	30
Oil	38

Oil Formation Volume Factor	39
Practical Applications	45
Answers to Text Questions	48
Appendix: Standard pressures and temperatures	50
Bibliography	50
4 Flow Regimes.....	51
Laminar and Turbulent Flow.....	51
Unit Conversions.....	54
Velocity	54
Flow Rate	55
Flow Regimes	55
Holdup.....	56
Bibliography	60
Answers to Text Questions	60
5 Flowmeters.....	61
Applications	61
Packer and Basket Flowmeters	62
Continuous Flowmeters	65
Full-Bore Flowmeters	67
Combination Tools.....	67
Interpretation of Flowmeter Surveys	68
Measurements in Deviated Holes	72
Measurements in Horizontal Holes.....	73
Oxygen Activation Logging.....	74
Radioactive Tracers and Thermometers.....	76
Bibliography	77
Answers to Text Question	77
6 Radioactive Tracer Logs.....	79
Applications	79
Well Treatment.....	79
Tracer Ejector Tool	80
Velocity Shot.....	80
Timed-Run Analysis	83
Choice of Radioactive Tracer Materials.....	85
Monitoring Natural Radioactive Deposits	86
Carbon Dioxide Injection.....	87
Bibliography	87
Answers to Text Questions	88
7 Fluid Identification	89
Tools Available.....	89
Gradiomanometer	90
Fluid Density Tool (Gamma Ray Absorption).....	93
Resonator (Vibrator)	95

Capacitance (Dielectric) Tools	96
Array Capacitance Tools	96
Fluid Resistivity Measurements	97
Optical Fluid Density	99
Fluid Sampler	100
Manometer	101
Other Measurements	103
Bibliography	104
Answers to Text Question	104
8 Temperature Logging	105
Resistance Temperature Detector (RTD)	105
Thermistors	106
Diodes	106
Fundamentals	107
Bottomhole Temperature Extrapolation	109
Cement-Top Evaluation	110
Lost-Circulation Zones	111
Temperature Profiles in Production and Injection Wells	112
General	112
Liquid Production	113
Gas Production	113
Water Injection	114
Gas Injection	115
Logging Techniques	116
Shut-In Temperature Surveys	116
Differential-Temperature Surveys	117
Radial Differential-Temperature Tool	119
Bibliography	122
Answer to Text Question	122
9 Noise Logging	123
Tools Available	123
Operating Principle	124
Interpretation	127
Noise and Temperature Combinations	129
Noise and Flowmeter Combinations	130
Fiber Optic Sensors	130
Bibliography	131
10 Interpretation	133
Holdup Equations	133
Practical Applications	135
Flowmeter and Gradiomanometer Combinations	136
Bibliography	141
Answers to Text Questions	141

11 Formation Evaluation Through Casing	143
Tools and Techniques Available.....	143
Resistivity Through Casing.....	143
The Gamma Ray Log.....	144
Origin of Natural Gamma Rays	145
Abundance of Naturally Occurring Radioactive Minerals.....	146
Operating Principle of Gamma ray Tools	147
Calibration of Gamma Ray Detectors and Logs	148
Time Constants	149
Perturbing Effects on Gamma Ray Logs	150
Estimating Shale Content from Gamma Ray Logs.....	150
Gamma Ray Spectroscopy	152
Interpretation of Natural Gamma Ray Spectra Logs	153
Pulsed Neutron Logging	156
Principle of Measurement.....	156
Log Presentations.....	158
Capture Cross Sections	162
Basic Interpretation.....	163
Shaly Formations	166
Finding Interpretation Parameters.....	168
Reservoir Monitoring Time-Lapse Technique	174
Log-Inject-Log.....	175
Departure Curves	176
Depth of Investigation.....	177
Inelastic Gamma Ray Logging	177
Carbon/Oxygen Logging	178
C/O Logging for TOC.....	179
Cased-Hole Wireline Formation Tester	181
Appendix 1: Interpretation of Pulsed Neutron Logs	
Using the Dual-Water Method	182
Finding Parameters	183
Finding ϕ_T and V_{dc}	185
Solving for ϕ_e and S_{we}	185
Appendix 2: Radioactive Elements, Minerals, and Rocks.....	186
Bibliography	190
Answers to Text Questions	192
12 Cement Bond Logging	195
Principles of Oil-Well Cementing.....	195
Principles of Cement Bond Logging.....	198
Tools Available.....	201
Operating Principles.....	201
Amplitude Measurement.....	202
Travel-Time Measurement.....	203
Wave-Train Display	203

Δt Stretching	205
Cycle Skipping.....	206
Gating Systems	207
Deviated Holes and Eccentered Tools.....	208
Interpretation.....	209
Cement Compressive Strength.....	209
Partial Cementation.....	211
Wave-Train Signatures.....	212
Free Pipe	212
Free Pipe in Deviated Hole	214
Well-Cemented Pipe	215
Quick-Look for Conventional CBL Interpretation	216
Microannulus/Channeling.....	216
Radial Differential Temperature Logging.....	218
Ultrasonic Cement Bond Logging	218
Log Quality Control.....	223
Appendix: Frequently Used Casing Dimensions.....	223
Bibliography	226
Answers to Text Questions	226
13 Casing Inspection	227
Caliper Logs.....	227
Tubing Profiles.....	227
Casing Profiles	229
Electrical-Potential Logs.....	231
Electromagnetic Devices.....	232
Electromagnetic Thickness Tool (ETT).....	232
Pipe Analysis Log (PAL)	234
Flux Leakage.....	235
Eddy Currents	236
Tool Principle.....	236
Interpretation.....	238
Borehole Televiewers.....	241
Bibliography	243
14 Well and Field Monitoring	245
Fiber Optic Sensing.....	245
DTS Applications.....	246
Advantages of Fiber Optic Sensors.....	246
Disadvantages of Fiber Optic Sensors	247
Types of Fiber Optics.....	247
Operating Principle	248
Rayleigh Scattering.....	248
Brillouin Scattering.....	249
Raman Scattering.....	249

Practical Applications of Light Scattering in DTS	250
DAS (DSTS or DTSS) Applications.....	251
Fiber Optic Placement.....	252
Types of DTS/DAS Installations.....	253
DTS Applications.....	254
Combining DTS with Microseismic (MSM)	256
DAS Applications	257
Thermocouple vs. DTS Measurements.....	260
Bibliography	260
 Appendices: Production Logging—Charts and Tables	 263
Appendix A: Conversion Factors Between Metric, API, and US Measures	263
Appendix B: Average Fluid Velocity Versus Tubing Size	268
Appendix C: Average Fluid Velocity Versus Casing Size	269
Appendix D: Average Fluid Velocity.....	271
Appendix E: Quick Guide to Biphasic Flow Interpretation.....	274
General Bibliography.....	274
 Index.....	 277

Cased-Hole Log Analysis and Reservoir Performance
Monitoring

Bateman, R.M.

2015, XVI, 284 p. 221 illus., 73 illus. in color., Hardcover

ISBN: 978-1-4939-2067-9
