

Contents

1	Introduction	1
1.1	Linear Ordinary Differential Equations.	2
1.2	Simple Linear Delay Differential Equations	4
1.3	An Example from Population Dynamics	7
1.4	An Example from Mechanical Engineering.	10
1.5	Scopes and Synopsis	12

Part I Theory

2	Notation and Basics	17
2.1	Notation.	17
2.2	The Cauchy Problem.	19
2.3	Stability of Solutions.	20
3	Stability of Linear Autonomous Equations.	23
3.1	The Solution Operator Semigroup and the Infinitesimal Generator.	24
3.2	Spectral Properties and the Characteristic Equation	27
3.3	Linearization and Equilibria	31
4	Stability of Linear Periodic Equations	35
4.1	The Evolution Operator and the Monodromy Operator.	36
4.2	Linearization and Periodic Solutions	39

Part II Numerical Analysis

5	The Infinitesimal Generator Approach.	45
5.1	The Pseudospectral Differentiation Method.	45
5.2	The Piecewise Pseudospectral Differentiation Method	48
5.3	Convergence Analysis	50

5.3.1	A Related Collocation Problem	51
5.3.2	Convergence of the Eigenvalues	57
5.3.3	Quadrature for Distributed Delays	62
5.4	Convergence of the Piecewise Method	64
5.5	Other Methods	64
6	The Solution Operator Approach	67
6.1	The Pseudospectral Collocation Method	68
6.1.1	Discretization of X	68
6.1.2	Discretization of X^+	70
6.1.3	Discretization of T	71
6.2	The Collocation Equation	72
6.3	Convergence Analysis	76
6.3.1	Convergence of the Eigenvalues of $\hat{T}_N$	79
6.3.2	Convergence of the Eigenvalues of $\hat{T}_{M,N}$	83
6.3.3	Quadrature for Distributed Delays	85
6.4	Other Methods	86
 Part III Implementation and Applications		
7	MATLAB Implementation	89
7.1	Introducing the Model in MATLAB	89
7.2	The Infinitesimal Generator Approach	93
7.2.1	A Single Discrete Delay	95
7.2.2	A Single Distributed Delay	96
7.2.3	The Piecewise Method	97
7.3	The Solution Operator Approach	101
7.3.1	The Meshes	103
7.3.2	The Matrix $T_M^{(1)}$	105
7.3.3	The Matrix $T_{M,N}^{(2)}$	108
7.3.4	The Matrix $U_{M,N}^{(1)}$	110
7.3.5	The Matrix $U_N^{(2)}$	115
8	Applications	117
8.1	Test Cases	117
8.1.1	Test 1: Linear Autonomous Equations with a Discrete Delay	117
8.1.2	Test 2: Linear Autonomous Equations with Multiple Discrete Delays	123
8.1.3	Test 3: Linear Autonomous Equations with a Distributed Delay	124

8.1.4	Test 4: Linear Autonomous Systems	126
8.1.5	Test 5: Linear Periodic Equations	127
8.1.6	Test 6: Linearized Periodic Equations	129
8.2	Equilibria in Population Dynamics	130
8.3	Periodic Problems in Engineering	137
