# Contents

<i>Preface</i> . . . . .	<i>v</i>
<i>Contributors</i> . . . . .	<i>xi</i>
PART I IN VITRO CHEMICAL GENETIC SCREENING	
1 Identification of Therapeutic Small-Molecule Leads in Cultured Cells Using Multiplexed Pathway Reporter Readouts. . . . .	3
<i>Ozlem Kulak, Kiyoshi Yamaguchi, and Lawrence Lum</i>	
2 Applying the Logic of Genetic Interaction to Discover Small Molecules That Functionally Interact with Human Disease Alleles . . . . .	15
<i>Ari D. Brettman, Pauline H. Tan, Khoa Tran, and Stanley Y. Shaw</i>	
3 Construction and Application of a Photo-Cross-Linked Chemical Array . . . . .	29
<i>Yasumitsu Kondoh, Kaori Honda, and Hiroyuki Osada</i>	
4 High Content Screening for Modulators of Cardiac Differentiation in Human Pluripotent Stem Cells . . . . .	43
<i>Sean Spiering, Herman Davidovics, Paul J. Bushway, Mark Mercola, and Erik Willems</i>	
5 Small-Molecule High-Throughput Screening Utilizing <i>Xenopus</i> Egg Extract . . . . .	63
<i>Matthew R. Broadus, P. Renee Yew, Stephen R. Hann, and Ethan Lee</i>	
PART II IN VIVO CHEMICAL GENETIC SCREENING	
6 Fission Yeast-Based High-Throughput Screens for PKA Pathway Inhibitors and Activators. . . . .	77
<i>Ana Santos de Medeiros, Grace Kwak, Jordan Vanderhooft, Sam Rivera, Rachel Gottlieb, and Charles S. Hoffman</i>	
7 A Method for High-Throughput Analysis of Chronological Aging in <i>Schizosaccharomyces pombe</i> . . . . .	93
<i>Jessica Stephan and Ann E. Ehrenhofer-Murray</i>	
8 Protocols for the Routine Screening of Drug Sensitivity in the Human Parasite <i>Trichomonas vaginalis</i> . . . . .	103
<i>Manal J. Natto, Anthonius A. Eze, and Harry P. de Koning</i>	
9 Chemical Genetic Screens Using <i>Arabidopsis thaliana</i> Seedlings Grown on Solid Medium . . . . .	111
<i>Thanh Theresa Dinh and Xuemei Chen</i>	
10 Small-Molecule Screening Using <i>Drosophila</i> Models of Human Neurological Disorders. . . . .	127
<i>Mickael Poidevin, Feiran Zhang, and Peng Jin</i>	

11	High-Throughput Small-Molecule Screening in <i>Caenorhabditis elegans</i> . . . . .	139
	<i>Sunitha Rangaraju, Gregory M. Solis, and Michael Petrascheck</i>	
12	Whole-Organism Screening for Modulators of Fasting Metabolism Using Transgenic Zebrafish. . . . .	157
	<i>Philipp Gut and Didier T.R. Stainier</i>	
13	High Content Screening for Modulators of Cardiovascular or Global Developmental Pathways in Zebrafish . . . . .	167
	<i>Charles H. Williams and Charles C. Hong</i>	

### PART III SMALL MOLECULES IN CHEMICAL BIOLOGY

14	Extraction Methods of Natural Products from Traditional Chinese Medicines . . . . .	177
	<i>Jingyu Zhang, Jianying Han, Ayokunmi Oyeleye, Miaomiao Liu, Xueting Liu, and Lixin Zhang</i>	
15	Bioassay-Guided Identification of Bioactive Molecules from Traditional Chinese Medicines . . . . .	187
	<i>Jianying Han, Jingyu Zhang, Wenni He, Pei Huang, Ayokunmi Oyeleye, Xueting Liu, and Lixin Zhang</i>	
16	NMR Screening in Fragment-Based Drug Design: A Practical Guide. . . . .	197
	<i>Hai-Young Kim and Daniel F. Wyss</i>	
17	Practical Strategies for Small-Molecule Probe Development in Chemical Biology . . . . .	209
	<i>Jonathan E. Hempel and Charles C. Hong</i>	
18	Principal Component Analysis as a Tool for Library Design: A Case Study Investigating Natural Products, Brand-Name Drugs, Natural Product-Like Libraries, and Drug-Like Libraries. . . . .	225
	<i>Todd A. Wenderski, Christopher F. Stratton, Renato A. Bauer, Felix Kopp, and Derek S. Tan</i>	
19	Small-Molecule Library Screening by Docking with PyRx . . . . .	243
	<i>Sargis Dallakyan and Arthur J. Olson</i>	

### PART IV SMALL MOLECULE TARGET IDENTIFICATION

20	Fluorous Photoaffinity Labeling to Probe Protein-Small Molecule Interactions . . . . .	253
	<i>Weigang Huang and Qisheng Zhang</i>	
21	Identification of the Targets of Biologically Active Small Molecules Using Quantitative Proteomics . . . . .	263
	<i>Glòria Vendrell-Navarro, Andreas Brockmeyer, Herbert Waldmann, Petra Janning, and Slava Ziegler</i>	
22	Drug Affinity Responsive Target Stability (DARTS) for Small-Molecule Target Identification . . . . .	287
	<i>Melody Y. Pai, Brett Lomenick, Heejun Hwang, Robert Schiestl, William McBride, Joseph A. Loo, and Jing Huang</i>	

23	Chemical Genomic Profiling via Barcode Sequencing to Predict Compound Mode of Action . . . . .	299
	<i>Jeff S. Piotrowski, Scott W. Simpkins, Sheena C. Li, Raamesh Deshpande, Sean J. McIlwain, Irene M. Ong, Chad L. Myers, Charlie Boone, and Raymond J. Andersen</i>	
24	Image-Based Prediction of Drug Target in Yeast . . . . .	319
	<i>Shinsuke Ohnuki, Hiroki Okada, and Yoshikazu Ohya</i>	
	<i>Index</i> . . . . .	329

Chemical Biology

Methods and Protocols

Hempel, J.E.; Williams, C.H.; Hong, C.C. (Eds.)

2015, XIV, 333 p. 65 illus., 40 illus. in color., Hardcover

ISBN: 978-1-4939-2268-0
