

Contents

1 Fungal Secondary Metabolites in the “OMICS” Era	1
Susanne Zeilinger, Carlos García-Estrada and Juan-Francisco Martín	
2 Key Players in the Regulation of Fungal Secondary Metabolism	13
Benjamin P. Knox and Nancy P. Keller	
3 Epigenetics of Fungal Secondary Metabolism Related Genes	29
Ming-Yueh Wu and Jae-Hyuk Yu	
4 Genome Mining for Fungal Secondary Metabolic Gene Clusters	43
Grayson T. Wawrzyn, Mark A. Held, Sarah E. Bloch and Claudia Schmidt-Dannert	
5 Metagenomics and Metatranscriptomics for the Exploration of Natural Products from Soil Fungi	67
Irshad Ul Haq and Jan Dirk van Elsas	
6 Metabolomics and Secondary Metabolite Profiling of Filamentous Fungi	81
Bernhard Kluger, Sylvia Lehner and Rainer Schuhmacher	
7 Fungal Chemotaxonomy	103
Jens C. Frisvad	
8 Endophytic Fungi as a Source of Novel Metabolites	123
Fernanda O. Chagas, Andrés Mauricio Caraballo-Rodriguez and Mônica T. Pupo	

9 Fungal Secondary Metabolism in the Light of Animal–Fungus Interactions: From Mechanism to Ecological Function	177
Marko Rohlfs	
10 <i>Fusarium</i> Mycotoxins and Their Role in Plant–Pathogen Interactions	199
Gerhard Adam, Gerlinde Wiesenberger and Ulrich Güldener	
11 Biosynthesis and Molecular Genetics of Peptaibiotics—Fungal Peptides Containing Alpha, Alpha-Dialkyl Amino Acids	235
Xiao-Yan Song, Bin-Bin Xie, Xiu-Lan Chen and Yu-Zhong Zhang	
Index	253

Biosynthesis and Molecular Genetics of Fungal

Secondary Metabolites, Volume 2

Zeilinger, S.; Martín, J.-F.; García-Estrada, C. (Eds.)

2015, XI, 256 p. 35 illus., 14 illus. in color., Hardcover

ISBN: 978-1-4939-2530-8
