Contents

Preface . . . . . *v*
Contributors . . . . . *ix*

1 State of the Art in Cell–Cell Fusion 1
Lena Willkomm and Wilhelm Bloch

2 Fusion in Cancer: An Explanatory Model for Aneuploidy, Metastasis Formation, and Drug Resistance 21
Marieke Mohr, Kurt S. Zaenker, and Thomas Dittmar

3 Mouse Embryos' Fusion for the Tetraploid Complementation Assay 41
Marina Gertsenstein

4 Generation of Mouse Chimeras with High Contribution of Tetraploid Embryonic Stem Cells and Embryonic Stem Cell-Fibroblast Hybrid Cells 61
Natalia M. Matveeva, Elena A. Kizilova, and Oleg L. Serov

5 Microfluidic Systems for Cell Pairing and Fusion 73
Burak Dura and Joel Voldman

6 Chromosome Tracking in Fused Cells by Single Nucleotide Polymorphisms 95
Azra Fatima, Jürgen Hescheler, and Tomo Šarić

7 Fusion of Mesenchymal Stem Cells and Islet Cells for Cell Therapy 107
Shoichiro Sumi and Goichi Yanai

8 Detection of Fusion Events in Mammalian Skeletal Muscle 115
Frank Suhr

9 FISH Detection of X and Y Chromosomes in Combination with Immunofluorescence to Study Contribution of Transplanted Cells to Skeletal Muscle Fibers 131
Anna Strömberg and Monika Jansson

10 Using Phosphatidylserine Exposure on Apoptotic Cells to Stimulate Myoblast Fusion 141
Amelia E. Hochreiter-Hufford, Sanja Arandjelovic, and Kodi S. Ravichandran

11 Tracing Myoblast Fusion in *Drosophila* Embryos by Fluorescent Actin Probes 149
Shruti Haralalka and Susan M. Abmayr

12 Analyzing Cell Fusion Events Within the Central Nervous System Using Bone Marrow Chimerism 165
Kevin Kemp and Kelly Hares

13 Cell Fusion Between Dendritic Cells and Whole Tumor Cells 185
Shigeo Koido and Jianlin Gong

14 Membrane Nanotube Formation in Osteoclastogenesis 193
Toshio Kukita, Akira Takahashi, Jing-Qi Zhang, and Akiko Kukita

15 Modified Adherence Method (MAM) for Electrofusion of Anchorage-Dependent Cells 203
Marko Ušaj and Maša Kandušer

16 FRET in the Analysis of In Vitro Cell–Cell Fusion by Flow Cytometry 217
Guillermo Gómez-Icazbalceta, Mirna Berenice Ruiz-Rivera, Edmundo Lamoyi, and Leonor Huerta

17 Dual Split Protein (DSP) Assay to Monitor Cell–Cell Membrane Fusion 229
Shuhei Nakane and Zene Matsuda

18 Photoconvertible Fluorescent Protein-Based Live Imaging of Mitochondrial Fusion 237
Geoffrey C. Owens and David B. Edelman
