

Contents

1	Introduction	1
1.1	Research Objective	1
1.2	Background	1
1.3	Overview of Previous Incidents	2
1.4	Overview of Photovoltaic (PV) Systems	6
2	Structural Loading	9
3	Wind Loads	13
4	Hail	23
5	Snow	27
6	Debris Accumulation	29
7	Seismic	31
8	Fire Hazards	37
8.1	Flammability of Components	37
8.2	Ignition Hazards	41
9	Electrical Hazards Associated with Fire Fighting Operations	47
9.1	Overview of Hazards	47
9.2	Mitigation Measures	48
9.2.1	Electrically Active PV Systems	51
9.2.2	Suppression Tactics	54
9.2.3	Ventilation Tactics	55

10	Weather-Related Maintenance Considerations	57
11	Compilation of Best Practices	59
11.1	Structural Loading	59
11.2	Wind Loads	59
11.3	Hail	60
11.4	Snow	61
11.5	Debris Accumulation.	61
11.6	Seismic	61
11.7	Fire Hazards.	62
	11.7.1 Flammability of Components	62
	11.7.2 Ignition Hazards	63
11.8	Electrical Hazards Associated with Fire Fighting Operations. . .	65
11.9	Weather-Related Maintenance Considerations	67
12	Hazard Gap Analysis	69
12.1	General Knowledge Gaps.	69
12.2	Testing and Calculation Gaps.	70
12.3	Structural and Wind Loads.	70
12.4	Hail Impact Forces	70
12.5	Snow Loads	71
12.6	Seismic Hazards	71
12.7	Fire Hazards.	71
	References.	73

Best Practices for Commercial Roof-Mounted
Photovoltaic System Installation

Wills, R.F.; Milke, J.A.; Royle, S.; Steranka, K.

2015, XIV, 76 p. 14 illus., Softcover

ISBN: 978-1-4939-2882-8
