

About the Editors

Mirko HH Schmidt, Univ.-Prof. Dr. Dr., is a professor of anatomy and biochemistry at the Institute of Microscopic Anatomy and Neurobiology, Mainz, Germany. He received his PhD in biochemistry from the University of Lübeck, Germany, and studied molecular signaling processes as a postdoc at the Hermelin Brain Tumor Center, Detroit, MI, USA, and at the Institute of Biochemistry II, Frankfurt/Main, Germany. His research group ‘Molecular Signal Transduction’ focuses on the degeneration of signaling pathways in the diseased brain, and was located at the Institute of Neurology (Edinger Institute), Frankfurt, before moving to Mainz. Prof. Schmidt has received numerous fellowships and awards for his research on translational molecular medicine.

Stefan Liebner, Ph.D., is currently a research group leader at the Institute of Neurology (Edinger Institute), Johann Wolfgang Goethe University Clinic, Frankfurt/Main, Germany. After receiving his PhD in cell biology at the Eberhard Karls University Tübingen, he investigated the role of endothelial β -catenin for vascular development at the Italian Foundation for Cancer Research (FIRC) Institute of Molecular Oncology (IFOM), Milan, Italy, as a postdoctoral fellow. His research focus is on molecular mechanisms of blood–brain barrier development, maintenance, and dysfunction. Dr. Liebner has received numerous fellowships and awards, is an active member of the International Brain Barriers Society (IBBS) and European Vascular Biology Society (EVBM), and acts as an academic editor of PLoS ONE and ISRN Vascular Medicine.

Endothelial Signaling in Development and Disease

Schmidt, M.H.; Liebner, S. (Eds.)

2015, XIV, 401 p. 49 illus., 48 illus. in color., Hardcover

ISBN: 978-1-4939-2906-1
