Preface	vii
Introduction	1
1 Stable Pairs and Their Moduli	
1.1 The curve case	3
1.2 Minimal model program: main definitions and results	5
1.3 Minimal model program and one-parameter degenerations	10
1.4 Moduli of stable varieties	14
1.5 Moduli of stable pairs (X, B) with $B \neq 0$	17
1.6 Moduli of stable varieties and pairs: known cases	21
2 Stable Toric Varieties	
2.1 Projective toric varieties and polytopes	23
2.2 Stable toric varieties and tilings	26
2.3 Linear systems on toric and stable toric varieties	28
2.4 Stable toric varieties over a projective variety $\mathbf{V}$	30
2.5 Stable toric pairs vs stable toric varieties over $\mathbb{P}^{n-1}$	32
2.6 Singularities of stable toric varieties	32
2.7 One-parameter degenerations	34
2.8 Toric varieties associated to hyperplane arrangements	38
3 Matroids	
3.1 Vector (or representable) matroids	43
3.2 Abstract matroids	45
3.3 Connected components of a matroid	47
3.4 Matroids of rank 1	49
3.5 Matroids of rank 2	49
3.6 Matroids of rank 3	50
3.7 Flats	53
3.8 Restrictions and contractions	53
3.9 Dual matroids	54
3.10 Regular matroids and degenerations of abelian varieties	54

4 Matroid Polytopes and Tilings

4.1	Base polytope and independent set polytope	60
4.2	Facets and faces	62
4.3	Matroid polytopes and log canonical singularities	63
4.4	Cuts of polytopes and log canonical singularities	64
4.5	Matroid tilings	66
4.6	Rank-2 case	66
4.7	Rank-3 case	68
4.8	Tropical projective spaces and Dressians	72
4.9	Dual matroid polytopes and dual tilings	73
4.10	Mnev's universality theorem	74

5 Weighted Stable Hyperplane Arrangements

5.1	GIT and VGIT	75
5.2	Semi-log canonical singularities and GIT	80
5.3	Weighted shas	81
5.4	Moduli spaces of shas	83
5.5	Geography of the moduli spaces of shas	84
5.6	Shas of dimension 1	85
5.7	Shas of dimension 2	86

6 Abelian Galois Covers

6.1	The yoga of cyclic and abelian Galois covers	93
6.2	Special K3 surfaces	96
6.3	Numerical Campedelli surfaces	99
6.4	Kulikov surfaces	99

Bibliography	101
-------------------------------	-----

Moduli of Weighted Hyperplane Arrangements

Alexeev, V. - Bini, G.; Lahoz, M.; Macrì, E.; Stellari, P.

(Eds.)

2015, VII, 104 p. 50 illus., 16 illus. in color., Softcover

ISBN: 978-3-0348-0914-6

A product of Birkhäuser Basel
