DFG Priority Research Program “Integrated Analysis of Interglacial Climate Dynamics” (INTERDYNAMIC)	1
Michael Schulz and André Paul	
Comparison of Climate and Carbon Cycle Dynamics During Late Quaternary Interglacials	7
Thomas Kleinen, Elena Bezrukova, Victor Brovkin, Hubertus Fischer, Steffi Hildebrandt, Stefanie Müller, Matthias Prange, Rima Rachmayani, Jochen Schmitt, Robert Schneider, Michael Schulz and Pavel Tarasov	
Global Synthesis of Sea-Surface Temperature Trends During Marine Isotope Stage 11	13
Yvonne Milker, Rima Rachmayani, Manuel F.G. Weinkauf, Matthias Prange, Markus Raitzsch, Michael Schulz and Michal Kučera	
Climate Sensitivity During and Between Interglacials	19
Manfred Mudelsee and Gerrit Lohmann	
What Ends an Interglacial? Feedbacks Between Tropical Rainfall, Atlantic Climate and Ice Sheets During the Last Interglacial	25
Aline Govin, Benjamin Blazey, Matthias Prange and André Paul	
Evaluation of Eemian and Holocene Climate Trends: Combining Marine Archives with Climate Modelling	31
Gerrit Lohmann, Ralph Schneider, Johann H. Jungclauss, Guillaume Leduc, Nils Fischer, Madlene Pfeiffer and Thomas Laepple	
Holocene Environmental Variability in the Arctic Gateway	37
Robert F. Spielhagen, Juliane Müller, Axel Wagner, Kirstin Werner, Gerrit Lohmann, Matthias Prange and Rüdiger Stein	

Detecting Holocene Changes in the Atlantic Meridional Overturning Circulation: Integration of Proxy Data and Climate Simulations	43
Audrey Morley, David Heslop, Carsten Rühlemann, Stefan Mulitza, André Paul and Michael Schulz	
Phase-Shift Between Surface Ocean Warming, Evaporation and Changes of Continental Ice Volume During Termination I Observed at Tropical Ocean Sediment Cores	49
Anton Eisenhauer, Christian Horn, Dirk Nürnberg, Thomas Blanz and Dieter Garbe-Schönberg	
Loop Current Variability—Its Relation to Meridional Overturning Circulation and the Impact of Mississippi Discharge	55
Dirk Nürnberg, André Bahr, Tanja Mildner and Carsten Eden	
Hydroclimatic Variability in the Panama Bight Region During Termination 1 and the Holocene	63
Matthias Prange, Silke Steph, Huadong Liu, Lloyd D. Keigwin and Michael Schulz	
Control of Seasonality and Interannual to Centennial Climate Variability in the Caribbean During the Holocene—Combining Coral Records, Stalagmite Records and Climate Models	69
Thomas Felis, Denis Scholz, Gerrit Lohmann, Cyril Giry, Claudia Fensterer, Wei Wei and Augusto Mangini	
The Southern Westerlies During the Holocene: Paleoenvironmental Reconstructions from Chilean Lake, Fjord, and Ocean Margin Sediments Combined with Climate Modeling	75
Frank Lamy, Matthias Prange, Helge W. Arz, Vidya Varma, Jerome Kaiser, Rolf Kilian, Jens Hefter, Albert Benthien and Gesine Mollenhauer	
Mineral Dust Variability in Antarctic Ice for Different Climate Conditions	83
Anna Wegner, Natalia Sudarchikova, Hubertus Fischer and Uwe Mikolajewicz	
Model-Data Synthesis of Monsoon Amplitudes for the Holocene and Eemian	89
Birgit Schneider, Ralph R. Schneider, Yiming Wang and Vyacheslav Khon	

Vegetation, Climate, Man—Holocene Variability in Monsoonal Central Asia	97
Anne Dallmeyer, Ulrike Herzschuh, Martin Claussen, Jian Ni, Yongbo Wang, Steffen Mischke and Xianyong Cao	
Global Land Use and Technological Evolution Simulations to Quantify Interactions Between Climate and Pre-industrial Cultures	103
Carsten Lemmen, Kerstin Haberkorn, Richard Blender, Klaus Fraedrich and Kai W. Wirtz	
North-West African Hydrologic Changes in the Holocene: A Combined Isotopic Data and Model Approach	109
Enno Schefuß, Martin Werner, Britta Beckmann, Barbara Haese and Gerrit Lohmann	
Holocene Climate Dynamics, Biogeochemical Cycles and Ecosystem Variability in the Eastern Mediterranean Sea	115
Gerhard Schmiedl, Fanny Adloff, Kay-Christian Emeis, Rosina Grimm, Michal Kucera, Ernst Maier-Reimer, Uwe Mikolajewicz, Jürgen Möbius and Katharina Müller-Navarra	
Environmental and Climate Dynamics During the Last Two Glacial Terminations and Interglacials in the Black Sea/Northern Anatolian Region	121
Helge W. Arz, Lyudmila S. Shumilovskikh, Antje Wegwerth, Dominik Fleitmann and Hermann Behling	
Seasonal Reconstruction of Summer Precipitation Variability and Dating of Flood Events for the Millennium Between 3250 and 2250 Years BC for the Main Region, Southern Germany . . .	127
Johannes Schoenbein, Alexander Land, Michael Friedrich, Rüdiger Glaser and Manfred Kueppers	
Precipitation in the Past Millennium in Europe—Extension to Roman Times	133
Juan Jose Gómez-Navarro, Johannes P. Werner, Sebastian Wagner, Eduardo Zorita and Jürg Luterbacher	

Integrated Analysis of Interglacial Climate Dynamics
(INTERDYNAMIC)

Schulz, M.; Paul, A. (Eds.)

2015, VII, 139 p. 41 illus., 37 illus. in color., Softcover
