

Contents

1	Brief Review of the Membrane Structure Context	1
1.1	Historical Evolution	1
1.2	Design Approach	2
1.3	Mechanical Tests for Coated Fabrics and Foils	4
	References	5
2	The Design, Analysis and Construction of Tensile Fabric Structures	9
2.1	Architectural Fabric and Foils	9
2.1.1	Fibres	10
2.1.2	Coatings	12
2.1.3	Coated Fabrics	14
2.1.4	Open Mesh Fabrics	17
2.1.5	Foils	17
2.2	The Architecture of Membrane Structures	19
2.2.1	Tension Structures: Definition and Classification	20
2.2.2	Tensioned Membranes and Conventional Roofing Forms	23
2.2.3	The Design Process	25
2.2.4	The Manufacturing Process	28
2.3	Testing Standards and Designing Codes	29
	References	32
3	Biaxial Testing Apparatuses and Procedures	35
3.1	Mechanical Data Required During the Realisation of Architectural Tensioned Covers	35
3.2	The Testing Procedures	36
3.2.1	Uniaxial Tests	38
3.2.2	Bursting Test	39
3.2.3	Cylinder Test	39
3.2.4	Plane Biaxial Tensile Test	40

3.2.5	In-plane Biaxial Shear Test	45
3.2.6	Plane Biaxial Tear Test.	47
3.3	The Biaxial Testing Machines Currently in Use	47
3.3.1	Symmetrical Loading Systems	49
3.3.2	Floating Frame	52
3.3.3	Rigid Square Frame with Batteries of Independent Servomotors	53
3.4	Inter-Laboratory Comparisons	54
3.4.1	The Round Robin Exercise	54
3.4.2	The European Laboratories Involved	55
3.4.3	The Case Study: The New Juventus' Stadium in Turin	60
3.4.4	Methodology	60
3.4.5	Results	62
3.4.6	Analysis and Comparison	65
3.4.7	Inter-laboratory Comparisons Available in Literature . . .	68
	References	69
4	The Development of Biaxial Testing Devices and Procedures for Architectural Fabrics	73
4.1	Technical Requirements	73
4.1.1	Frame Shape and Stiffness	74
4.1.2	Sample Shape and Dimensions	74
4.1.3	Clamping System	77
4.1.4	Maximum Actuator Stroke	81
4.1.5	Loading Profile	83
4.1.6	Force Transmission System	86
4.1.7	Measure of the Force	87
4.1.8	Measure of the Strain	90
4.1.9	Temperature and Humidity Conditions	92
4.1.10	Control System	94
4.1.11	Calibration	95
4.2	The Development of a Testing Protocol	97
4.2.1	Scope	97
4.2.2	Definitions	100
4.2.3	Principle	100
4.2.4	Apparatus Description	100
4.2.5	Atmosphere for Conditioning and Testing	101
4.2.6	Sampling and Preparation of Test Pieces	102
4.2.7	Procedure	103
4.2.8	Representation and Implementation of Test Results	106
4.2.9	Testing Report Contents	114
	References	117

5	Recent Applications and Potentialities	119
5.1	Strain Controlled Biaxial Tests	119
5.1.1	A Simple Case of Installation of a Flat Membrane in Terms of Strains	120
5.1.2	The Testing Setup	121
5.1.3	Experimental Results	122
5.2	Biaxial Behaviour of Flexible Solar Cells	124
5.2.1	State of the Art	127
5.2.2	Methodology and Experimental Setup	128
5.2.3	Results, Analysis and Discussion	129
	References	134
6	Conclusions	135
	Index	137

Biaxial Testing for Fabrics and Foils

Optimizing Devices and Procedures

Beccarelli, P.

2015, IX, 138 p. 59 illus., 4 illus. in color., Softcover

ISBN: 978-3-319-02227-7
