1	Introduction	1
1.1	Early Investigations	1
1.2	Classification Schemes	4
1.3	Proposed Subdivisions	6
	References	9

Part I Geological Setting and Physiography

2	Geological Setting of Himalaya	13
2.1	Tibetan Plateau	13
2.2	Indus–Tsangpo Suture Zone	15
2.3	Himalayan Orogen	15
2.4	Ganga Foreland Basin	16
2.5	Basement Structure of Ganga Basin	16
2.6	Unstable River Courses	19
	References	20
3	Physiography of Nepal	23
3.1	Terai	23
3.1.1	Upper Terai or Bhabar Zone	23
3.1.2	Middle Terai or Marshy Land	23
3.1.3	Lower Terai or Gangetic Alluvium	24
3.2	Siwaliks and Dun Valleys	24
3.3	Mahabharat Range	29
3.4	Midlands	30
3.5	Fore Himalaya	30
3.6	Great Himalayan Range	31
3.7	Inner Himalayan Valleys	31
3.8	Tibetan Marginal Ranges	32
	References	32

Part II Geology of Neighboring Regions

4	Northwest Himalaya	37
4.1	Medlicott's Classification	37
4.1.1	Infra-Blaini or Simla Slates	37
4.1.2	Blaini Formation	37
4.1.3	Infra-Krol Formation	38
4.1.4	Krol Formation	38
4.1.5	Metamorphic Equivalents of Infra-Krol and Krol Formations	38
4.1.6	Subathu Formation	39

4.1.7	Dagshai and Kasauli Formations	39
4.1.8	Siwaliks	39
4.2	Oldham's Investigations in Jaunsar and Bawar	39
4.2.1	Jaunsars and Chakrata Formation	39
4.2.2	Deoban Formation	40
4.2.3	Mandhali and Bawar Formations	40
4.3	Proposal of Nappes in Simla Area by Pilgrim and West	41
4.3.1	Thrusts and Nappes	41
4.3.2	Jutogh Formation	41
4.3.3	Chaur Gneissose Granite	41
4.3.4	Chail Formation	42
4.3.5	Jagas (Jaunsar) Formation	42
4.3.6	Naldera Limestone and Simla Slates	43
4.3.7	Shali Limestone	43
4.3.8	Opinions at Variance	43
4.4	Auden on the Krol Belt	44
4.4.1	Simla Slates	44
4.4.2	Mandhali Formation (Lower Jaunsar)	45
4.4.3	Chandpur Formation (Middle Jaunsar)	45
4.4.4	Nagthat Formation (Upper Jaunsar)	45
4.4.5	Blaini Formation	45
4.4.6	Infra-Krol Formation	45
4.4.7	Krol Sandstone	45
4.4.8	Krol Limestones	46
4.4.9	Tal Formation	46
4.4.10	Subathu Formation	46
4.4.11	Dagshai Formation	47
4.4.12	Kasauli Formation	47
4.4.13	Lower Siwaliks (Nahans)	47
4.4.14	Dolerites and Associated Rocks	47
4.5	Shali Window: West's Version	47
4.5.1	Shali Thrust	47
4.5.2	Lower Shali Limestone	47
4.5.3	Shali Slates and Chail Formation	47
4.5.4	Upper Shali Limestone	47
4.6	Further Investigations in Simla–Krol Belt	47
4.6.1	Tiuni Formation	48
4.6.2	Deoban Formation	48
4.6.3	Simla Group	48
4.6.4	Mandhali Formation	49
4.7	Pre-Tertiary Outliers in the Sub-Himalaya	49
4.8	Lithostratigraphic Correlation and Other Issues	49
4.8.1	Correlation of Simla Slates and Allied Rocks	49
4.8.2	Correlation of Blaini Boulderbeds and Other Unfossiliferous Lesser Himalayan Rocks	50
4.8.3	Correlation of Carbonate Sequences	50
4.8.4	Depositional Environment of Simla Slates and Allied Rocks . . .	50
4.8.5	Depositional Environment of Krol Formation and Related Rocks	50
4.8.6	Subathu–Dagshai Passage-Beds	50
	References	51
5	Southeast Himalaya and Adjacent Indian Peninsula	53
5.1	Gondwanas of Indian Peninsula	53
5.1.1	Lower Gondwanas (?Carboniferous–Permian: 280–245 Ma)	53

5.1.2	Damudas (Permian)	54
5.1.3	Middle Gondwanas (Triassic: 245–208 Ma)	55
5.1.4	Upper Gondwanas (Jurassic–Early Cretaceous: 208–110 Ma)	55
5.2	Lesser Himalayan Sequence	55
5.2.1	Daling and Shumar Groups	56
5.2.2	Baxa Formation	56
5.2.3	Diuri Formation	56
5.2.4	Setikhola Formation (Permian)	56
5.2.5	Damudas	57
5.3	Higher Himalayan Crystallines	57
5.3.1	Lime-Silicate Inclusions in Darjeeling Gneiss	58
5.3.2	Pegmatites and Basic Sills	58
5.4	Inverted Metamorphism	58
5.5	Proposition of a Huge Recumbent Fold	58
5.6	Folded Tethyan Rocks	58
5.7	Interrupted Siwalik Belt	59
5.8	South-Tilted Alluvial Terraces	59
5.9	Frontal Anticline	59
	References	61

Part III Lesser Himalaya

6	Introduction to Lesser Himalaya	65
6.1	Pioneer Investigations in Nepal	67
6.2	The Great Controversy	67
6.3	Distribution of Lesser Himalayan Sequence	68
6.3.1	Tectonic Windows	68
6.3.2	Inner Zone	70
6.3.3	Intermediate Zone	70
6.3.4	Outer Zone	70
6.3.5	Older Sedimentary Slices in the Siwalik Belt	70
6.4	Classifying Lesser Himalayan Rocks	70
6.4.1	Augen Gneisses	71
6.4.2	Igneous Rocks	72
6.4.3	Carbonate Sequences	73
6.5	Correlation of Unfossiliferous Sequences	73
6.6	Gondwanas and Coal	74
6.7	Inverted Metamorphism	74
6.8	Structure of Inner Zone	75
6.9	Structure of Intermediate Zone	75
6.10	Structure of Outer Zone	75
6.11	Main Boundary Thrust	76

8.4.2	Sharda Group.	98
8.4.3	Kubhinde Complex	100
8.4.4	Antiformal Closure of Mokhla	101
8.4.5	Dailekh Group	102
8.4.6	Folds of Chhera Khola	104
8.4.7	Budar Thrust Termination	104
8.4.8	Frontal Imbricate Zone	104
8.4.9	Daban Supergroup	105
8.5	Outer Lesser Himalaya of Dang, Sallyan, and Piuthan.	105
8.5.1	Sharda Group.	105
8.5.2	Correlation and Comparison of Sharda Group	108
8.5.3	Gwar Group.	111
8.5.4	Tosh Group	122
	References.	124
9	Lesser Himalaya of Gandaki Region	125
9.1	Inner Zone of Gorkha	125
9.1.1	Kuncha Formation	125
9.1.2	Garnetiferous Schists and Gneisses	125
9.1.3	Graphitic Schists and Marbles	126
9.1.4	Higher Himalayan Sequence.	127
9.1.5	Structure of Inner Zone	127
9.1.6	Nepheline Syenites	129
9.2	Intermediate Zone of Kusma–Syangja	131
9.2.1	Kuncha Formation	131
9.2.2	Naudanda Quartzite.	131
9.2.3	Nayagaun Formation	131
9.2.4	Nourpul Formation	134
9.2.5	Dhading Dolomite	134
9.2.6	Benighat Slates.	134
9.2.7	Sorek Formation.	135
9.2.8	Dhanpure Limestone	136
9.2.9	Sisne Formation	136
9.2.10	Amile Formation	136
9.2.11	Dumri Formation	136
9.2.12	Structure of Intermediate Zone	137
9.3	Outer Zone of Kali Gandaki and Palpa	137
9.3.1	Heklang Formation	137
9.3.2	Virkot Formation	137
9.3.3	Chappani Formation	140
9.3.4	Khoraidi Formation.	141
9.3.5	Saidi Khola Formation	141
9.3.6	Ramdighat Formation	141
9.3.7	Kerabari Formation.	143
9.4	Stratigraphy of Tansen Group.	144
9.4.1	Sisne Formation	144
9.4.2	Taltung Formation	147
9.4.3	Amile Formation	148
9.4.4	Bhainskati Formation	149

9.4.5	Dumri Formation	150
9.5	Structure of Outer Zone.	151
	References.	151
10	Lesser Himalaya of Bagmati–Gosainkund Region.	153
10.1	Intermediate Zone and Mahabharat Range	153

Part VI Siwaliks

27 Introduction to Siwaliks	371
27.1 Early Investigations in India and Pakistan	372
27.2 Stratigraphic Classification of Northwest Sub-Himalaya	373
27.3 The Threefold Classification of Siwaliks	373
27.3.1 Lower Siwaliks	373
27.3.2 Middle Siwaliks	374
27.3.3 Upper Siwaliks	374
27.4 Problems of Threefold Usage and Terminology	374
27.5 Other Classifications	375
27.6 Investigations in Nepal	375
27.7 Fossil Occurrence	376
27.7.1 Fossils from the Nepalese Siwaliks	377
27.8 Depositional Environment and Sedimentation Rates	379
References	381
28 Siwaliks of Mahakali–Seti Region	385
28.1 Lower Siwaliks	385
28.2 Middle Siwaliks	386
28.3 Upper Siwaliks and Kalena Alluvial Fan	388
28.4 Gravel Veneer East of Budar	388
28.5 Structure of the Siwalik Belt	389
References	390
29 Siwaliks of Karnali–Bheri Region	391
29.1 Bankas Formation	391
29.2 Chor Khola Formation	392
29.2.1 Jungli Khola Member	392
29.2.2 Shivgarhi Member	393
29.3 Surai Khola Formation	394
29.4 Dobata Formation	398
29.5 Dhan Khola Formation	402
29.6 Petrography of Sandstones	403
29.7 Structures	407
References	408
30 Siwaliks of Gandaki Region	409
30.1 Arung Khola Formation	409
30.2 Binai Khola Formation	412
30.3 Chitwan Formation	414
30.4 Deorali Formation	414
30.5 Sandstone Petrography	414
30.6 Paleocurrents	414
30.7 Fossil Occurrence	416
30.8 Paleomagnetism and Regional Correlation	417
30.9 Structure	417
References	417
31 Siwaliks of Bagmati–Gosainkund Region	419
31.1 Lithostratigraphy	419
31.2 Lithofacies	421
31.3 Structure	423
31.4 Discontinuous Lesser Himalayan Belt	425
References	426

32	Siwaliks of Koshi Region.	427
32.1	Lithostratigraphy.	427
32.2	Structure	429
32.3	Development of Siwalik Wedge	430
	References.	431
33	Siwaliks of Arun–Tamar Region	433
33.1	Lesser Himalayan Sequence	433

 Part VII Terai, Intermontane Basins, and Neotectonics		
34	Terai and Intermontane Basins	441
34.1	Subsurface Configuration of Terai.	441
34.2	Dang and Deukhuri Valley Fills	441
34.2.1	Tectonic Interpretations	445
34.3	Sediments of Pokhara and Neighborhood.	445
34.3.1	Origin of Lakes	448
34.3.2	Tectonic Implications	448
34.4	Kathmandu Basin Fill	448
34.4.1	Paleoclimate in Kathmandu Valley	453
34.5	Thakkhola–Mustang Graben.	453
34.5.1	Dangarjong Fault Zone	457
34.5.2	Tectonic and Environmental Interpretations	457
	References.	457
35	Neotectonics	461
35.1	Orogeny and Mountain Building.	461
35.2	Neotectonic Movements in the Northwest Himalaya and Bhutan.	463
35.3	Active Faults in Nepal.	463
35.3.1	Rangun Khola Active Fault	464
35.3.2	Talphi Active Fault.	464
35.3.3	Surkhet–Ghorahi Active Fault	464
35.3.4	Pressure Ridge Along Main Boundary Active Fault.	466
35.3.5	Bari Gad Fault	466
35.3.6	Kolphu Khola Fault	466
35.3.7	Tilted Fanglomerates in the Goyeng Khola, East Nepal	466
35.4	Change in Drainage of Major Rivers.	467
35.5	Elevated River Terraces.	467
35.6	Rupture Due to Great Assam Earthquake of 1897.	468
35.7	Deformation Related to the Great Kangra Earthquake of 1905	469
35.8	Measuring Neotectonic Movements.	471
35.9	Microseismicity in Nepal.	473
35.10	A Comparison with the Subduction Zone.	473
	References.	475
36	Conclusions	479
36.1	Lesser Himalaya.	479
36.2	Higher Himalaya	481
36.2.1	Some Remarks on Inverted Metamorphism	482
36.3	Tethys Himalaya.	483

36.4	Siwaliks.	484
36.5	Neotectonics.	484
36.6	East Versus West Himalaya	485
36.7	Some Anomalies.	485
