

Contents

1	Introduction	1
	Aniello Riccio and Tomas Ireman	

Part I Detailed Methodologies for Damage Growth in Aerospace Composites

2	Detailed Methodologies for Integrated Delamination Growth and Fiber-Matrix Damage Progression Simulation	9
	Aniello Riccio, Elisa Pietropaoli and Antonio Raimondo	
3	Delamination and Debonding Growth in Composite Structures	63
	Javier San Millán and Iñaki Armendáriz	
4	Delamination Growth in Composite Plates Under Fatigue Loading Conditions	89
	Aniello Riccio, Andrea Sellitto and Rocco Ricchiuto	
5	Influence of Intralaminar Damage on the Delamination Crack Evolution	107
	Cédric Huchette, Thomas Vandellos and Frédéric Laurin	
6	Microdamage Modeling in Laminates	141
	Janis Varna	

Part II Fast Methodologies for Damage Growth in Aerospace Composites

7	Finite Element Study of Delaminations in Notched Composites	177
	Sören Nilsson, Alann André and Anders Bredberg	

8	Effect of the Damage Extension Through the Thickness on the Calculation of the Residual Strength of Impacted Composite Laminates	187
	Sören Nilsson, Anders Bredberg and Tonny Nyman	
9	A Fast Numerical Methodology for Delamination Growth Initiation Simulation	199
	Aniello Riccio and Michele Damiano	

Part III Manufacturing and Testing

10	An Experimental Study on the Strength of Out of Plane Loaded Composite Structures	223
	Sören Nilsson, Alann André and Anders Bredberg	
11	Buckling and Collapse Tests Using Advanced Measurement Systems	231
	Richard Degenhardt	
12	Vacuum Infusion Manufacturing of CFRP Panels with Induced Delamination	249
	Vincenza Antonucci and Mauro Zarrelli	
13	Lock-in Thermography to Detect Delamination in Carbon Fibres Reinforced Polymers	263
	Carosena Meola and Giovanni Maria Carlomagno	

Damage Growth in Aerospace Composites

Riccio, A. (Ed.)

2015, VI, 279 p. 210 illus., 14 illus. in color., Hardcover

ISBN: 978-3-319-04003-5
