

# Contents

## Part I Theoretical Foundations

|  |           |
|--|-----------|
| <b>Higgs/Electroweak in the SM and the MSSM .....</b>  | <b>3</b>  |
| Sven Heinemeyer  |           |
| <b>Introduction to Flavour Physics .....</b>   | <b>35</b> |
| Yuval Grossman   |           |
| <b>Beyond the Standard Model Phenomenology<br/>and the ElectroWeak Symmetry Breaking .....</b> | <b>81</b> |
| Giacomo Cacciapaglia   |           |

## Part II Experimental Results from the Large Hadron Collider

|  |            |
|--|------------|
| <b>Probing the Standard Model at Hadron Colliders .....</b>        | <b>125</b> |
| Peter Mättig   |            |
| <b>Higgs Boson Searches .....</b>                                  | <b>173</b> |
| William Murray   |            |
| <b>Flavour Physics in the LHC Era.....</b>                         | <b>203</b> |
| Tim Gershon  |            |
| <b>Searches for New Physics at the Large Hadron Collider .....</b> | <b>239</b> |
| Jeffrey D. Richman   |            |

**Part III Tools**

|   |     |
|---|-----|
| <b>Monte Carlo Event Generators</b> .....       | 287 |
| Michael H. Seymour and Marilyn Marx             |     |
| <b>Statistics for Searches at the LHC</b> ..... | 321 |
| Glen Cowan                                      |     |
