Contents

1 The Theory of Elasticity in the 19th Century 1
1.1 Theory of Elasticity and Continuum Mechanics 1
1.1.1 The Classical Molecular Model 3
1.1.1.1 The Components of Stress 7
1.1.1.2 The Component of Strains and the Constitutive Relationships 8
1.1.2 Internal Criticisms Toward the Classical Molecular Model 13
1.1.3 Substitutes for the Classical Molecular Model 17
1.1.3.1 Cauchy's Phenomenological Approach 17
1.1.3.2 Green's Energetic Approach 22
1.1.3.3 Differences in the Theories of Elasticity 24
1.1.4 The Perspective of Crystallography 25
1.1.5 Continuum Mechanics in the Second Half of the 19th Century 31
1.2 Theory of Structures 35
1.2.1 Statically Indeterminate Systems 37
1.2.2 The Method of Forces 39
1.2.3 The Method of Displacements 42
1.2.4 Variational Methods 47
1.2.5 Applications of Variational Methods 50
1.2.5.1 James Clerk Maxwell and the Method of Forces 50
1.2.5.2 James H. Cotterill and the Minimum of Energy Expended in Distorting 54
1.2.6 Perfecting of the Method of Forces 56
1.2.6.1 Lévy's Global Compatibility 56
1.2.6.2 Mohr and the Principle of Virtual Work 59

1.3 The Italian Contribution . . . 66
1.3.1 First Studies in the Theory of Elasticity . . . 70
1.3.2 Continuum Mechanics . . . 71
1.3.3 Mechanics of Structures . . . 73
References . . . 76

2 An Aristocratic Scholar . . . 83
2.1 Introduction . . . 83
2.2 The Principles of Piola's Mechanics . . . 86
2.3 Papers on Continuum Mechanics . . . 89
2.3.1 1832. *La meccanica de' corpi naturalmente estesi trattata col calcolo delle variazioni* . . . 93
2.3.2 1836. *Nuova analisi per tutte le questioni della meccanica molecolare* . . . 100
2.3.3 1848. *Intorno alle equazioni fondamentali del movimento di corpi qualsivogliono* . . . 104
2.3.4 1856. *Di un principio controverso della meccanica analitica di lagrange e delle sue molteplici applicazioni* . . . 109
2.3.5 Solidification Principle and Generalised Forces . . . 109
2.4 Piola's Stress Tensors and Theorem . . . 113
2.4.1 A Modern Interpretation of Piola's Contributions . . . 114
2.4.2 The Piola-Kirchhoff Stress Tensors . . . 116
References . . . 119

3 The Mathematicians of the Risorgimento . . . 123
3.1 Enrico Betti . . . 123
3.1.1 The Principles of the Theory of Elasticity . . . 127
3.1.1.1 Infinitesimal Strains . . . 127
3.1.1.2 Potential of the Elastic Forces . . . 129
3.1.1.3 The Principle of Virtual Work . . . 131
3.1.2 The Reciprocal Work Theorem . . . 132
3.1.3 Calculation of Displacements . . . 135
3.1.3.1 Unitary Dilatation and Infinitesimal Rotations . . . 135
3.1.3.2 The Displacements . . . 137
3.1.4 The Saint Venant Problem . . . 138
3.2 Eugenio Beltrami . . . 141
3.2.1 Non-Euclidean Geometry . . . 144
3.2.2 Sulle equazioni generali della elasticità . . . 146
3.2.3 Papers on Maxwell's Electro-Magnetic Theory . . . 149
3.2.4 Compatibility Equations . . . 153

3.2.5 Beltrami-Michell's Equations 155
3.2.6 Papers on Structural Mechanics 156
3.2.6.1 A Criterion of Failure. 156
3.2.6.2 The Equilibrium of Membranes 158
3.3 The Pupils 160
3.3.1 The School of Pisa 160
3.3.2 Beltrami's Pupils 168
References. 174

4.1 Scuole d'applicazione per gl'ingegneri. 179
4.1.1 The First Schools of Application for Engineers. 182
4.1.1.1 The School of Application in Turin and the Royal Technical Institute in Milan 182
4.1.1.2 The School of Application in Naples 184
4.1.1.3 The School of Application in Rome. 185
4.1.1.4 Curricula Studiorum. 186
4.2 The Teaching 188
4.3 Luigi Federico Menabrea 191
4.3.1 1858. *Nouveau principe sur la distribution des tensions* 194
4.3.1.1 Analysis of the Proof 195
4.3.1.2 Immediate Criticisms to the Paper of 1858 197
4.3.1.3 The Origins of Menabrea's Equation of Elasticity 200
4.3.2 1868. *Étude de statique physique* 204
4.3.2.1 The 'Inductive' Proof of the Principle 207
4.3.3 1875. *Sulla determinazione delle tensioni e delle pressioni ne' sistemi elastici* 208
4.3.4 Rombaux' Application of the Principle of Elasticity . . 210
4.3.4.1 *Condizioni di stabilità della tettoja della stazione di Arezzo* 211
4.3.4.2 The Question About the Priority 213
4.4 Carlo Alberto Castigliano. 214
4.4.1 1873. *Intorno ai sistemi elastici* 217
4.4.1.1 The Method of Displacements. 217
4.4.1.2 The Minimum of Molecular Work. 218
4.4.1.3 Mixed Structures 220
4.4.1.4 Applications 224

4.4.2 1875. *Intorno all'equilibrio dei sistemi elastici* 227
4.4.2.1 Mixed Structures 228
4.4.3 1875. *Nuova teoria intorno all'equilibrio dei sistemi elastici*. 229
4.4.3.1 The Theorem of Minimum Work as a Corollary 230
4.4.3.2 Generic Systems 231
4.4.4 1879. *Théorie de l'équilibre des systémes élastiques et ses Applications* 233
4.4.4.1 Flexible Systems 236
4.4.4.2 The Costitutive Relationship 237
4.4.4.3 Applications: The Dora Bridge 238
4.4.5 A Missing Concept: The Complementary Elastic Energy 242
4.5 Valentino Cerruti 246
4.5.1 *Sistemi elastici articolati*. A Summary 247
4.5.1.1 Counting of Equations and Constraints 247
4.5.1.2 Evaluation of External Constraint Reactions. Statically Determinate Systems 249
4.5.1.3 Redundant and Uniform Resistance Trusses 250
4.5.1.4 Final Sections 250
4.5.2 Trusses with Uniform Resistance 252
4.5.3 Statically Indeterminate Trusses 255
4.5.3.1 Poisson's and Lévy's Approaches 255
4.5.3.2 Cerruti's Contribution to Solution of Redundant Trusses 257

Strength of Materials and Theory of Elasticity in 19th Century Italy
A Brief Account of the History of Mechanics of Solids and Structures
Capecchi, D.; Ruta, G.
2015, XIII, 393 p. 49 illus., Hardcover
ISBN: 978-3-319-05523-7
