

Contents

Part I Introduction

- 1 Introduction 3**
Francesc Esteve, Lluís Godo, Siegfried Gottwald
and Franco Montagna
- 2 Petr Hájek: A Scientific Biography 21**
Zuzana Haniková

Part II Foundational Aspects of Mathematical Fuzzy Logic

- 3 The Logic of Fuzzy Set Theory: A Historical Approach. 41**
Siegfried Gottwald
- 4 Set Theory and Arithmetic in Fuzzy Logic 63**
Libor Běhounek and Zuzana Haniková
- 5 Bridges Between Contextual Linguistic Models of Vagueness
and T-Norm Based Fuzzy Logic 91**
Christian G. Fermüller and Christoph Roschger

Part III Semantics and Consequence Relation in Many-Valued Logic

- 6 Consequence and Degrees of Truth in Many-Valued Logic 117**
Josep Maria Font
- 7 The Differential Semantics of Łukasiewicz
Syntactic Consequence 143**
Daniele Mundici

8	Two Principles in Many-Valued Logic.	159
	Stefano Aguzzoli and Vincenzo Marra	

Part IV Algebra for Many-Valued Logic

9	How Do ℓ-Groups and Po-Groups Appear in Algebraic and Quantum Structures?	177
	Anatolij Dvurečenskij	
10	Semi-linear Varieties of Lattice-Ordered Algebras.	207
	Antonio Ledda, Francesco Paoli and Constantine Tsinakis	

Part V More Recent Trends

11	On Possibilistic Modal Logics Defined Over MTL-Chains	225
	Félix Bou, Francesc Esteva and Lluís Godo	
12	The Quest for the Basic Fuzzy Logic.	245
	Petr Cintula, Rostislav Horčík and Carles Noguera	
	Appendix: Bibliography of Petr Hájek	291

Petr Hájek on Mathematical Fuzzy Logic

Montagna, F. (Ed.)

2015, XII, 318 p. 9 illus., Hardcover

ISBN: 978-3-319-06232-7
