

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Loop Models and Critical Phenomena	1
1.2	Loops on the Honeycomb Lattice	3
1.3	Field Theories for Loop Models	6
1.3.1	Replica-Like Limits	6
1.3.2	Hidden Symmetry and the Appearance of $\text{CP}^{n-1}$	7
1.4	More 2D Background	8
1.4.1	Potts Model and Completely Packed Loops	9
1.4.2	Spin Chains	9
1.4.3	SLE	9
1.4.4	Coulomb Gas	10
1.5	Polymers	11
1.6	Quantum Random Geometry	12
1.7	$\text{CP}^{n-1}$ and $\text{RP}^{n-1}$ Models	13
1.8	Disordered Systems	15
1.9	This Thesis	19
1.9.1	3D Loop Models and the $\text{CP}^{n-1}$ Model	19
1.9.2	Fractal Geometry of Line Defects	20
1.9.3	2D Loop Models with Crossings	20
1.9.4	Theta-Point Polymers	21
	References	21
<b>2</b>	<b>Completely Packed Loop Models</b>	25
2.1	Introduction	25
2.2	Definitions	25
2.2.1	The 3D $L$ and $K$ Lattices	27
2.3	Lattice Field Theories	29
2.4	Continuum Descriptions	30
2.5	Correlation Functions	31
2.6	Replicas and Supersymmetry	33

2.7	Phases of the $\text{CP}^{n-1}$ Model and Loops . . . . .	34
2.8	Critical Behaviour and First Order Transitions . . . . .	36
2.8.1	Summary of Numerical Results . . . . .	37
2.8.2	The $\text{CP}^{n-1}$ Model Near $n = 2$ and $d = 4$ . . . . .	39
2.8.3	More Concrete Picture . . . . .	41
2.8.4	Nonuniqueness of the Upper Critical Dimension at $n = 2$ . . . . .	42
2.9	Joint Length Distribution in the Extended Phase . . . . .	42
2.9.1	Length Distribution for a Single Loop . . . . .	44
2.10	Unoriented Loop Models . . . . .	45
2.11	Loops in Frustrated Systems . . . . .	45
2.12	Conclusion . . . . .	48
	References . . . . .	49
<b>3</b>	<b>Topological Terms, Quantum Magnets and Deconfined Criticality . . . . .</b>	<b>51</b>
3.1	Introduction . . . . .	51
3.2	Topology and Gauge Fields in the $\text{CP}^{n-1}$ Model . . . . .	52
3.2.1	Two Dimensions: Skyrmions and the $\theta$ Term . . . . .	52
3.2.2	Three Dimensions: Hedgehogs . . . . .	53
3.2.3	Formulation as a Gauge Theory . . . . .	54
3.2.4	Noncompact $\text{CP}^{n-1}$ Model . . . . .	54
3.3	Hedgehogs on the $L$ Lattice at $p = 1/2$ . . . . .	55
3.4	Transfer Matrices and Quantum Magnets . . . . .	57
3.5	Conclusion . . . . .	60
	References . . . . .	60
<b>4</b>	<b>The Statistics of Vortex Lines . . . . .</b>	<b>63</b>
4.1	Introduction . . . . .	63
4.2	Heuristic Considerations . . . . .	64
4.3	Tricolour Percolation . . . . .	68
4.3.1	Symmetric Point . . . . .	69
4.3.2	Away from the Symmetric Point . . . . .	71
4.3.3	Wilson Loops . . . . .	73
4.4	Consequences of the $\text{CP}^0$ Description . . . . .	73
4.4.1	Crossover to Percolation . . . . .	74
4.4.2	Unoriented Vortices and Crossover to the $\text{RP}^0$ Model . . . . .	75
4.4.3	Long Range Correlations . . . . .	76
4.4.4	Vortices in the XY Model . . . . .	77
4.5	Aside: 2D Percolation . . . . .	78
4.6	Conclusion . . . . .	79
	References . . . . .	80

<b>5</b>	<b>Loop Models with Crossings in 2D</b>	83
5.1	Introduction	83
5.2	Definitions of Models	86
5.2.1	Completely-Packed Loops with Crossings	86
5.2.2	Incompletely-Packed Loops with Crossings	89
5.3	Lattice Field Theories	91
5.3.1	Lattice Field Theory for IPLC	91
5.3.2	Correlation Functions	92
5.3.3	$\mathbb{Z}_2$ Vortices and $\mathbb{Z}_2$ Fluxes	93
5.3.4	Continuum Description	95
5.3.5	Lattice Field Theory for the CPLC	96
5.3.6	Phase Diagram Boundaries and $\text{CP}^{n-1}$	97
5.3.7	Vortex Fugacity and the $\theta$ -term for $\text{CP}^{n-1}$	98
5.4	The Goldstone Phase	98
5.4.1	Correlation Functions	99
5.4.2	Spanning Number	101
5.4.3	Length Distribution	104
5.5	The Critical Lines	107
5.5.1	Critical Spanning Number, $\nu$ , and $y_{\text{irr}}$	108
5.5.2	Watermelon Correlators, $d_f$ , and Length Distribution	110
5.5.3	RG Equations in the Presence of Vortices	111
5.6	Outline of Numerical Methods	112
5.7	Outlook	113
	References	114
<b>6</b>	<b>Polymer Collapse</b>	117
6.1	Introduction	117
6.2	The Interacting Self-Avoiding Trail	118
6.3	Field Theory for the ISAT	120
6.4	Phase Diagram for the ISAT	122
6.5	More Detailed Picture of Phase Diagram	124
6.6	Generic Perturbations to the ISAT	125
6.7	Smart Walks and More General Models	126
6.8	Note on Three Dimensions	127
6.9	Conclusion	127
	References	128
<b>7</b>	<b>Outlook</b>	131
