

Contents

Part I Balancing

Vibration Sensitivity of Large Turbine Generator Shaft Trains to Unbalance	3
Shuiping Yan and Roland Sievert	
Turbomachinery High Speed Modal Balancing: Modeling and Testing of Scale Rotors	15
Matteo Bertoneri and Paola Forte	
Application of Turbine Generator Train Rotordynamic Analysis for Setting Residual Modal Unbalance Requirements for High Speed Balancing of a Single Rotor	27
Max L'vov	
Development of a New Balancing Approach for Significantly Eccentric or Bowed Rotors	39
Zlatan Racic and Marin Racic	
Conditions Required for the Elimination of Trial Runs During the Balancing of Flexible Rotors.	51
Eduardo Preciado	

Part II Blade Dynamics

Blade Vibration Measurements and Excitation Force Evaluation	65
Nicolò Bachschmid, Emanuel Pesatori, Simone Bistolfi and Steven Chatterton	

Influence of the Blades Configuration on the Dynamics of a 3-Bladed Jeffcott Rotor	79
Florian Thiery and Jan-Olov Aidanpää	
Forced Vibration of Eight Mistuned Bladed Discs on a Solid Shaft—Excitation of the Second Compressor Bladed Disc	89
Romuald Rzadkowski, Artur Maurin and Ryszard Szczepanik	
Vibration Response Analysis of Mistuned Bladed Disk Consisting of Directionally Solidified Blade	101
Yasutomo Kaneko, Kazushi Mori and Hiroharu Ooyama	
The Influence of Blade Row Dynamics on Lateral and Torsional Shaft Vibrations in Steam Turbines	113
N. Bachschmid, G. Salvini, E. Tanzi and E. Pesatori	
Explanation of the Snubbing Mechanism on Vibration Reduction by Means of Chaos Metrics	129
Steven Chatterton, Paolo Pennacchi and Andrea Vania	
Efficient Modelling of Rotor-Blade Interaction Using Substructuring	143
Fadi Dohnal, Eric Knopf and Rainer Nordmann	
Modeling Impulse Periodic Excitation of Blade Rows in Steam Turbines in Partial Arc Admission Conditions	155
N. Bachschmid, E. Tanzi, E. Pesatori and S. Bistolfi	
An Improved Microslip Model for Variable Normal Loads	169
Chiara Gastaldi and Muzio M. Gola	
Nonlinear Behavior Analysis Caused by Blade Tip Rubbing in a Rotor-Disk-Blade System	181
Hui Ma, Zhiyuan Wu, Xingyu Tai, Chaofeng Li and Bangchun Wen	
 Part III Case Histories	
Analysis of Dry Friction-Induced Stick-Slip in an Experimental Test Rig Modeling a Drill String	195
Bruno Cayres, Cesar da Fonseca, Adriano Santos and Hans I. Weber	
The Resolution of Unwanted Vibrations in Rotating Machinery.	205
R. Gordon Kirk	

Designing and Operating Rotating Machinery Free from Vibration Troubles Based on Case Studies	221
Masato Tanaka	
Keyphasor[®] Based Torsional Vibration Detection and Field Applications	233
Huageng Luo, Roengchai Chumai, Nicolas Peton and Arun Menon	
Behavior of Eccentric Rotors Through the Critical Speed Range	255
Zlatan Racic and Marin Racic	
Evaluation of Unexpected High Vibration on a High Speed Coupling Spacer	267
R.G. Kirk, K.A. Schoeneck and E.A. Memmott	
Analysis of Super-Synchronous, Sub-mesh Frequency Vibrations in a Speed Increaser Gearbox	281
C. Hunter Cloud, James M. Byrne, Minhui He, José A. Vázquez and Timothy J. Hattenbach	
Optimization of Low Frequency Balancing of GD-40 Rotor	297
Vladimir Shahrinov and Oleg Sliva	
Analysis and Experimental Test of a 200 kW Oil-Free Micro Gas Turbine Simulator	307
Bonjin Koo, Chang-Ho Kim, Jong Sung Lee, Tae Ho Kim and Kyuho Sim	
 Part IV Cracks in Rotating Shafts	
FEM Analysis of the SIF in Rotating Shafts Containing Breathing Elliptical Cracks	323
Patricia Rubio, Belén Muñoz-Abella and Lourdes Rubio	
Damping in a Parametrically Excited Cracked Rotor	335
Jerzy T. Sawicki and Zbigniew Kulesza	
Experimental and Numerical Analysis of Transversal Open Cracked Shafts Considering Beam Slenderness and Crack Depth	347
Rafael García-Illescas, Julio C. Gomez-Mancilla and Luigi Bregant	

Experimental Identification of Rotor Crack Forces	361
C. Shravankumar, R. Tiwari and A. Mahibalan	
Experimental Analysis and Validation of a Vibration-Based Technique for Crack Detection in a Shaft	373
María J. Gómez, Cristina Castejón, Juan C. García-Prada and Jesús López	
 Part V Diagnostics	
Fault Diagnosis and State Detection in Centrifugal Pumps—A Review of Applications	387
P. Beckerle, H. Schaeede and S. Rinderknecht	
Tracking the Damage Level in Rolling Element Bearings	399
Steven Chatterton, Paolo Pennacchi, Andrea Vania and Pietro Borghesani	
Order Tracking Under Run-Up and Run-Down Conditions	409
Michael D. Coats and Robert B. Randall	
A Novel Procedure for the Selection of the Frequency Band in the Envelope Analysis for Rolling Element Bearing Diagnostics	421
Steven Chatterton, Paolo Pennacchi, Andrea Vania and Pietro Borghesani	
Modelling Roller Bearing Dynamics Inducing Instantaneous Angular Speed Variations	431
Jose L. Gomez, Adeline Bourdon, Hugo André and Didier Rémond	
Non-linear Elasto-dynamic Model of Faulty Rolling Elements Bearing	443
Michele Cotogno, Enrico Pedrazzi, Marco Coconcelli and Riccardo Rubini	
Architecture of the Monitoring System for the Traction System Bearings of a Regional Locomotive	455
Steven Chatterton, Paolo Pennacchi, Andrea Vania and Pietro Borghesani	
Monitoring the Dynamic Behavior in Polar Domain for an Easier Diagnostic of Rotating Machinery	465
Jarir Mahfoud and Benjamin Defoy	

Signal Processing Techniques for the Identification of Wheels' Imbalance in Presence of Disturbances	475
Marco Tarabini, Andrea Gironacci, Roberto Panzeri and Diego Scaccabarozzi	
Use of Chaos in the Diagnostics of Rolling Element Bearings.	485
Steven Chatterton, Paolo Pennacchi, Andrea Vania and Pietro Borghesani	
Model Based Automated Diagnosis of Bearing Knock Faults in Internal Combustion Engines	497
Jian Chen and Robert Bond Randall	
Low Speed Bearings' Instantaneous Angular Speed Behavior	509
W. Moustafa, O. Cousinard, F. Bolaers, K. Ait Sghir and J.P. Dron	
Instantaneous Angular Speed Analysis, Measurement Errors and Signal Filtering	521
Marco Spagnol and Luigi Bregant	
Optimisation of SVM Methodology for Multiple Fault Taxonomy of Rolling Bearings from Acceleration Records	533
D.J. Bordoloi and Rajiv Tiwari	
Use of Acoustic Emissions for the Detection of Rub of Rotors	543
Eoin Peter Carden and Stefano Morosi	
Multi Fault Diagnosis of the Centrifugal Pump Using the Wavelet Transform and Principal Component Analysis	555
Berli Kamiel, Kris McKee, Rodney Entwistle, Ilyas Mazhar and Ian Howard	
Impact Response Characterization as Basis for Bearing Diagnostics and Prognostics	567
Andrea Sanchez Ramirez, Richard Loendersloot, Tiedo Tinga and Giuseppe D'Angelo	
Force Analysis Due to Local Defect in Rolling Bearings for Fault Diagnosis	577
Sidra Khanam, N. Tandon and J.K. Dutt	
Vibration-Based Spall Size Tracking in Rolling Element Bearings	587
Wade A. Smith, Chongqing Hu, Robert B. Randall and Zhongxiao Peng	

Part VI Electromechanical Interaction

Rotor Vibrations in Electrical Machines Due to Electromagnetic Forces.	601
Mathias Mair, Bernhard Weilharter and Katrin Ellermann	
Experimental Investigation of Structural Damping of Laminated Stacks of Electrical Machine Rotors	613
Marcel Clappier and Lothar Gaul	
Investigating Grid-Induced Turbo-Generator Vibrations: A Multidisciplinary Challenge	625
Frits Petit, Koen De Bauw, Kris Matthys and Sylvain Doucement	
Rotor Vibration Difference Among the Single and the Combined Faults Composed by Static Air-Gap Eccentricity and Rotor Interturn Short Circuit	637
Yu-Ling He, Fa-Lin Wang, Meng-Qiang Ke and Gui-Ji Tang	
Prediction of Ultimate Coupling Torque During Transient Short-Circuit Loads of Electric Motors.	649
Timo P. Holopainen	
Rotordynamic Analysis of a 2-Pole Induction Motor Considering Magnetic Excitation Due to Dynamic Rotor Eccentricity During Startup	661
Christian Bauer and Ulrich Werner	

Part VII Fault Identification

Model-Based Fault Detection on a Non-linear Rotor System	679
Ramakrishnan Ambur, Zhentao Wang, Rudolf Sebastian Schittenhelm and Stephan Rinderknecht	
Experimental Unbalance Identification by Means of Correlation Analysis and Model Order Reduction.	689
Fabio Dalmazzo Sanches and Robson Pederiva	
Fault Detection in a Rotating Machine by Using the Electromechanical Impedance Method	701
Aldemir Ap Cavalini Jr, Roberto Mendes Finzi Neto and Valder Steffen Jr	

Application of Bayesian Inference to Unbalance Identification in Rotors	711
Natalia Cezaro Tyminski and Helio Fiori de Castro	
Application of Multiple-Model Estimation Method to Rotor Fault Diagnosis	723
Lin Jia, Jianping Jing and Zhiqiang Wang	
Application of a Model-Based Method for Balancing a Large Steam Turbo-Generator Unit	735
Ionel Nistor, Philippe Voinis, Mohamed-Amine Hassini, Romain Lacombe and Paolo Pennacchi	
Unbalance Response Analysis of a Heavy Duty Gas Turbine-Generator with Rigid Coupling Offset	745
Jin Woong Ha and Dae Seok Jung	
Residual Unbalance Determination for Flexible Rotors at Operational Speed	757
Eric Knopf, Thomas Krüger and Rainer Nordmann	
Model Validation for Damage Identification and Determination of Local Damage Dynamics	769
Ryan J. Madden, Alexander H. Pesch and Jerzy T. Sawicki	
Experimental Estimation of Misalignment Effects in Rotor-Bearing-Coupling Systems	779
Mohit Lal and Rajiv Tiwari	
 Part VIII Fluid Film Bearings	
Development and Preliminary Validation of Efficient 3D Models of Tilting Pad Journal Bearings	793
Roberto Conti, Amedeo Frilli, Emanuele Galardi, Enrico Meli, Daniele Nocciolini, Luca Pugi, Andrea Rindi and Stefano Rossin	
The Effects of Temporal Fluid Inertia on Tilting Pad Journal Bearing Dynamics	805
Minhui He, C. Hunter Cloud and José A. Vázquez	
Multilobe Floating Ring Bearings for Automotive Turbochargers	821
Rob Eling, Ron van Ostayen and Daniel Rixen	

Influence of Bearing Geometry of Automotive Turbochargers on the Nonlinear Vibrations During Run-Up. 835
Elmar Woschke, Stefan Göbel, Steffen Nitzschke, Christian Daniel and Jens Strackeljan

Nonlinear Oscillations of High-Speed Rotor Systems in Semi-Floating Ring Bearings 845
Aydin Boyaci and Bernhard Schweizer

Dynamic Forced Performance of Short Length Open-Ends Squeeze Film Damper with End Grooves. 855
Luis San Andrés, Sung-Hwa Jeung and Gary Bradley

The Identification Method for Dynamic Characteristics Coefficients of Rotor Sliding Bearing Based on System Lag Angle 867
Guangfu Bin, Longkai Wang, Kun Feng and Xuejun Li

Effect of Square-Dimple Size on Dynamic Characteristics of Textured Journal Bearings. 883
Hiroyuki Yamada, Satoru Kaneko and Hiroo Taura

Geometric Discontinuities Identification in Hydrodynamic Bearings 895
Tiago H. Machado and Katia L. Cavalc

Measurement of Drag Torque, Lift off Speed and Rotordynamic Force Coefficients in a Shimmmed BFB 909
Luis San Andrés and Joshua Norsworthy

A Test Rig for Evaluating Tilting-Pad Journal Bearing Characteristics 921
Steven Chatterton, Paolo Pennacchi, Phuoc Vinh Dang and Andrea Vania

Identification Dynamic Force Coefficients of a Five-Pad Tilting-Pad Journal Bearing. 931
Steven Chatterton, Paolo Pennacchi, Phuoc Vinh Dang and Andrea Vania

Construction and Experimental Application of a Variable Geometry Journal Bearing (VGJB) for the Vibration Suppression of Rotors 943
Athanasios Chasalevris and Fadi Dohnal

Multiphysics TEHD Model of a Tilting-Pad Thrust Bearing with Polymeric Layer	955
Steven Chatterton, Paolo Pennacchi and Andrea Vania	
Efficient Thrust Bearing Model for High-Speed Rotordynamic Applications	969
I. Chatzisavvas, A. Boyaci and B. Schweizer	
Performances Degradation of Tilting-Pad Thrust Bearings Due to Electrical Pitting.	981
Steven Chatterton, Paolo Pennacchi and Andrea Vania	
A New Approach to Solve for Oil-Whirl and Oil-Whip Limit-Cycle Response	995
Min Zhang	
Dynamic Analysis of Rotors Supported on Journal Bearings by Solving Reynolds Equation Using Pseudospectral Method.	1009
Sudhakar Gantasala, I.R. Praveen Krishna and A.S. Sekhar	
Influence of Delayed Yielding of Magnetorheological Oils in Squeeze Film Dampers on the Vibration Attenuation of Rotors	1021
J. Zapoměl and P. Ferfecki	
Successful Elimination of a Pad-Fluttering Phenomenon	1033
Andrea Vania, Paolo Pennacchi and Steven Chatterton	
Investigation of the Thermal Effects of Tilting Pad Bearing Interacting with Fluid Seals on the Stability of Rotating Systems.	1045
Gregory Bregion Daniel, Antonio Carlos S.G.P. Carneiro and Katia Lucchesi Cavalca	
Geometrical Optimization of Hydrodynamic Journal Bearings with Validated Simulations and Artificial Intelligence Tools.	1057
Luca Gorasso, Liqin Wang and Chiara Gorasso	
A Theoretical Study on Frequency Effects on Tilting-Pad Journal Bearing Dynamic Coefficients	1069
Thomas Hagemann and Hubert Schwarze	
Stability Analysis of an Unbalanced Journal Bearing with Nonlinear Hydrodynamic Forces.	1081
Radhouane Sghir and Mnaouar Chouchane	

Analysis of the Influence of Fluid Temperature Variation on the Behavior of Turbocharger Lubricated Thrust Bearings.	1091
Leonardo C. Vieira, Paula N. Watanabe and Katia L. Cavalca	
Dynamics Analysis of Flexible Rotor Supported by Floating Ring Bearings	1103
Pavel Taranenko, Oleg Sliva and Elena Zadorozhnaya	
Control of Rotor Motion Using Active Fluid-Film Bearings	1115
Leonid Savin and Denis Shutin	
Thermal Effects in Hydrodynamic Cylindrical Bearings	1123
Diogo Stuari Alves, Gregory Bregion Daniel and Katia Lucchesi Cavalca	
Temperature Influence on the Behavior of a Magnetorheological Fluid Journal Bearing	1135
Dimitrios A. Bompos and Pantelis G. Nikolakopoulos	
Test Rig Characterization and Dynamic Testing of a Smart Electro-Magnetic Actuator Journal Integrated Bearing	1145
A. El-Shafei, A.S. Dimitri, T. Saqr and M. El-Hakim	
Effects of Rough Bearing Surface on the Stochastic Dynamics of a Rotor-Bearing System Subject to Random Fluid-Induced Forces	1157
Zigang Li and Jun Jiang	
 Part IX Gas Foil Bearings	
On the Dynamics of a Rigid Rotor with Static Unbalance Symmetrically Mounted in Compliant Air Bearings	1169
Christoph Baum, Hartmut Hetzler and Wolfgang Seemann	
Thermal Studies on Foil Bearings with a Sliding Coating Made of Plastic Material	1183
Jan Kicinski, Grzegorz Zywicka and Pawel Baginski	
Parametric Study of Dynamic Analysis Focusing on the Foil Structure of a Gas Foil Journal Bearing	1195
Bok Seong Choe, Se Na Jeong, Eo Jin Kim and Yong-Bok Lee	

Static and Dynamic Analyses of a Rotor with Aerostatic Ceramic Porous Journal	1207
Luis Renato Chiarelli and Zilda de Castro Silveira	
Fluid Flow and Thermal Features of Gas Foil Thrust Bearings at Moderate Operating Temperatures.	1223
Abdelrasoul M. Gad and Shigehiko Kaneko	
The Dynamics of the Laboratory Rotor Founded on the Gas Foil Bearings—Numerical Analysis.	1235
Slawomir Banaszek, Grzegorz Zywica, Jan Kicinski and Malgorzata Bogulicz	
Numerical and Experimental Investigation of Rotor-Simulator in Foil Gasdynamic Bearings for Compact Gas Turbine	1247
Joury Temis, Mikhail Temis, Andrey Egorov and Valentin Gavrillov	
Non-linear Stability Analysis of a Modified Gas Foil Bearing Structure.	1259
Robert Hoffmann, Tomasz Pronobis and Robert Liebich	
Prediction of Stiffness Coefficients for Foil Air Bearings to Perform Rotordynamic Analysis of Turbomachinery.	1277
Y.A. Ravikovich, Y.I. Ermilov, A.O. Pugachev, A.A. Matushkin and D.P. Kholobtsev	
Externally Pressurized Gas Journal Bearings with Asymmetric Gas Supply (Verification of Availability of Gas Pressure Control Using a Small Size Test Rig)	1289
Tomohiko Ise, Kazuya Imanishi, Toshihiko Asami, Takahiro Tokumiya, Naoyuki Takada, Fumiyoshi Kimura and Yoshiyuki Yamaguchi	
 Part X Geared Machine	
Dynamic Modelling of Gear System with Gyroscopic Effect and Crack Detection Analysis	1303
Omar D. Mohammed, Matti Rantatalo and Jan-Olov Aidanpää	
Study on Nonlinear Meshing Stiffness of Spline	1315
Guang Zhao, Juncong Su, Jingyu Zhai, Qingkai Han and Yanyan Shi	

Research on Dynamic Modeling and Analysis of the Coupled Planetary Gear and Rotor System	1323
Hong-Liang Yao, Yang Liu, Zhao-Hui Ren, Bang-Chun Wen and Chao-Feng Li	
Effect of Gear Tooth Breakage on the Dynamic Response in a Wind Turbine Drive Train Subjected to Stochastic Load Excitation.	1333
P. Srikanth and A.S. Sekhar	
On the Diagnostics of Planet Gear Bearings	1345
Gianluca D’Elia, Marco Cocconcelli, Emiliano Mucchi and Giorgio Dalpiaz	
Dynamic Characterization of Wind Turbine Gearboxes in Operational Conditions	1357
E. Di Lorenzo, S. Manzato, F. Vanhollebeke, S. Goris, B. Peeters, W. Desmet and F. Marulo	
The Torsional Stiffness of Involute Spur Planetary Gears	1369
Song Xue, Rodney Entwistle, Ilyas Mazhar and Ian Howard	
Planet Eccentricity Error on a Planetary Gear Transmission: Influence on Load Sharing.	1381
M. Iglesias, A. Fernández, A. de Juan, A. Díez, P. García and F. Viadero	
Rotordynamic Analysis for Integrally Geared Air Compressor Using Measured Dynamic Coefficients of Tilting Pad Journal Bearings	1391
Wonhyun Kim, Taeyoung Kim, Dohyeong Lim, Sangpyo Woo and Wonho Joo	
 Part XI Magnetic Bearings	
Rotor Active Vibration Control via Internal Magnetic Bearings and a Concentric Inner Shaft Coupling	1407
Chris Lusty, Necip Sahinkaya and Patrick Keogh	
Vibration Control of Rotor Shaft Systems Using Electromagnetic Actuator	1415
Shivang Shekhar, Nitish Sharma, Hemanta Kumar Roy, Anindya Sundar Das and Jayanta Kumar Dutt	

Experimental Estimation of Speed-Dependent Active Magnetic Bearing Rotordynamic Parameters.	1431
Rajiv Tiwari and Talatam Viswanadh	
Stability Study for Vibration Control of an Active Magnetic Bearing Supported Rotor Mounted on a Moving Base.	1441
Akash Vardhan, Anindya Sundar Das and Jayanta Kumar Dutt	
Eigenvalue Assignment for Stabilizing Unstable Conical Modes of Rigid Rotor-Active Magnetic Bearing System Over High Rotational Speed Range.	1453
Han-Wook Jeon and Chong-Won Lee	
Rotordynamic Behavior and Performance of Controllable Hybrid Foil-Magnetic Bearing	1465
Sena Jeong, Bok Seong Choe and Yong Bok Lee	
Passive Magnetic Bearings at the Rotary Application	1477
Aleksander Olejnik and Krzysztof Falkowski	
Dynamic Analysis of the High-Speed Flexible Rotors Supported on the Electrodynamic Passive Magnetic Bearings.	1489
Tomasz Szolc and Krzysztof Falkowski	
Experimental Assessment of Touchdown Bearing Contact Forces in Magnetic Bearing Systems	1501
Fawaz Y. Saket, M. Necip Sahinkaya and Patrick S. Keogh	
A Contact Event Model for an AMB-supported Rotor	1513
Oskari Halminen, Antti Kärkkäinen, Jussi Sopanen and Aki Mikkola	
 Part XII Miscellaneous	
Internal Sensing and Actuation Strategies for Smart Machine Rotors.	1527
Samuel Jiménez, Patrick Keogh and Matthew Cole	
Assessment of Numerical Model to Determination of Parameters to Stability Experimental Tests.	1539
Felipe W.S. Tuckmantel, Gregory B. Daniel, Hélio F. Castro and Katia L. Cavalca	

**Experimental Observations of Rotor Orbit Analysis
in Rotating Machines. 1551**
Akilu Yunusa-Kaltungo, Adrian D. Nembhard and Jyoti K. Sinha

**Experimental Study on the Dynamic Characteristics of Spline
Joint in Rotor System 1561**
Yanhong Ma, Wang Cun, Dayi Zhang and Jie Hong

Part XIII Modelling and Control

**Capturing the Dynamics of Rotating Machines: A Modern
Global Approach Based on SAMCEF Rotor 1573**
P. Morelle

**An Innovative Rotordynamical Model for Coupled
Flexural-Torsional Vibrations in Rotating Machines 1581**
Filippo Cangioli, Alice Innocenti, Lorenzo Marini, Enrico Meli,
Luca Pugi and Andrea Rindi

Vibration Control in Electrical Machines Using Built-in Actuator 1593
Karuna Kalita, Sivaramakrishnan Natesan, Gaurav Kumar
and Kari Tammi

**Inclusion of Unsteady Bow in a Model-Based Monitoring System
for Rotors 1605**
Markus Rossner, Thomas Thuemmel and Heinz Ulbrich

**Development and Validation of Efficient Rotordynamical Models
for Complex Rotating Systems 1617**
Filippo Cangioli, Alice Innocenti, Lorenzo Marini, Enrico Meli,
Luca Pugi and Andrea Rindi

Non-linear Analysis of the Defects of a Vertical Turbine 1629
Sébastien Denis, Mohamed-Amine Hassini and Mihaï Arghir

**A Method for Assessing the Turbine Generator Set Shaft-Line
Behavior in Accidental Situations 1641**
Nicolas Guilloteau, Ionel Nistor, Nabila Sellali-Haraigue,
Pierre-Yves Couzon and Pierre Verrier

**Effect of Unbalanced Rotor on the Dynamics of Cylindrical
Roller Bearings 1653**
Aditya Sharma, M. Amarnath and P.K. Kankar

Vibration Analysis of Fiber Reinforced Composite Discs	1665
K. Gupta, S.P. Singh, V. Tiwari, Savi Takkar, Rahul Dev and Anant Rai	
Numerical Studies of a Nonlinear Flexible Rotating System Under Harmonic Ground Motion	1677
Balram Choudhary and Barun Pratiher	
Analysis of Rotating Systems Using General-Purpose Multibody Dynamics	1689
Alessandro Tasora and Pierangelo Masarati	
Dynamic Absorbers for Rotating Machinery	1703
Pietro Borghesani, Tommaso Argentini, Marco Belloli and Fabio C. Robustelli	
Application of Optimization Methods in Rotor Dynamics	1715
Reinhard Helfrich and Nils Wagner	
Active Vibration Isolation of a Flexible Rotor Being Subject to Unbalance Excitation and Gyroscopic Effect Using $\mathcal{H}_\infty$-Optimal Control	1727
Fabian B. Becker, Stefan Heindel and Stephan Rinderknecht	
EHD Modeling of Angular Contact Ball Element Bearings	1741
Letícia Bizarre, Fábio Nonato de Paula and Katia L. Cavalca	
Controllers for Attenuation of Lateral Rotor Vibration Part I: Controller Design	1753
Rudolf Sebastian Schittenhelm and Stephan Rinderknecht	
Controllers for Attenuation of Lateral Rotor Vibration Part II: Controller Optimization and Comparison	1763
Rudolf Sebastian Schittenhelm and Stephan Rinderknecht	
Controlled Modal Energy Transfer in Torsional Systems Using Impulsive Parametric Excitation	1775
Thomas Pumhössel, Horst Ecker, Peter Hehenberger and Klaus Zeman	
Controlling Non-linear Axial Vibrations of a Turbine Rotor	1785
Nicolò Bachschmid, Davide Colombo and Andrea Monterisi	

Prediction of Rotor Dynamic Behavior of Synchronous Generators . . .	1797
J.S. Rao, Vijendra Gupta, Prachi Khullar and D. Srinivas	
Towards Determination of Critical Speeds of a Rotating Shaft with Eccentric Sleeves: Equations of Motion	1809
Antony Kirk, Fotios Georgiades and Chris Bingham	
Studying Continuum Dynamic Behaviour Through Rigid Multibody Dynamics	1823
Vikas Kumar Kharolia, J.K. Dutt, S.K. Saha and S.V. Shah	
Nonlinear Dynamic Analysis of Ball Bearings Due to Varying Number of Balls and Centrifugal Force	1831
V. Vakharia, V.K. Gupta and P.K. Kankar	
Sensitivity Analysis on the Dynamic Characteristics of a 1000 MW Turbo-Generator Rotor.	1841
Van Thanh Ngo, Danmei Xie, Yi Yang, Shang Gao and Jie Guo	
Prediction Capabilities of Coriolis and Gyroscopic Effects in Current Finite Element Software	1853
Valentina Ruffini, Christoph W. Schwingshackl and Jeffrey S. Green	
A Parameter Preserving Model Order Reduction Algorithm for Rotordynamic Systems	1863
Kristin Krenek	
Finite Element Modeling and Vibration Analysis of a Free Power Turbine Subjected to Non-synchronous Excitation	1875
A.O. Pugachev, A.V. Sheremetyev, V.V. Tykhomirov and O.I. Shpilenko	
 Part XIV Rolling Element Bearings	
Rotor-Dynamic Computer Simulations of Rolling Bearing in High-Speed Rotating Machinery.	1889
Giacomo Landi, Travis Shive and Fabrizio Mandrile	
Spherical Roller Bearing Simulation Model with Localized Defects	1899
Behnam Ghalamchi, Jussi Sopanen and Aki Mikkola	

Three Case Studies from the UKCS Gas Compressors: Combining Rotor Dynamic and Process Data as an Aid to Diagnosis	1911
Geraint Jones	

Correlation Between Friction Coefficient and Sound Characteristics for Cage Instability of Cryogenic Deep Groove Ball Bearings	1921
SolJi Ryu, BokSeong Choe, JeonKook Lee and YongBok Lee	

Part XV Rub—Rotor to Stator Contact

Experimental Analysis of Rotor-Stator Contact with Many Degrees of Freedom	1935
Oliver Alber	

Rotor-Stator Partial Rub Diagnosis Using Hilbert Huang Transform.	1945
Sanjin Braut, Roberto Žigulić, Goranka Štimac and Ante Skoblar	

Detecting Rub-Impact Fault of Rotor System Based on Variational Mode Decomposition	1955
Yanxue Wang and Richard Markert	

Effect of Rotor-Stator Contact on the Mass Unbalance Response.	1965
Celio Duran, Lionel Manin, Marie Ange Andrianoely, Céline Bordegaray, Frédéric Battle and Régis Dufour	

Dynamic Response of a High Speed Flexible Rotor Due to Sudden Large Unbalance.	1977
Xuan Haijun, Luo Ling, Guo Xiaojun and Li Guoqiang	

Part XVI Seals

Investigations on Non-steady Behaviour of Rotors Due to Light Rubbing to Brush Seals	1993
Daniel Kreuzer, Robert Fay, Robert Liebich, Sang Werner and Tobias Wiedemann	

Non-linear Analysis of Floating Ring Annular Seals: Stability and Impacts	2007
Mihai Arghir and Manh-Hung Nguyen	

Effects of Clearance on Leakage Flow Characteristics of Labyrinth Brush Seal	2019
Yuan Wei, Zhaobo Chen, Yinghou Jiao, Xin Du and Zhouqiang Zhang	

Dynamic Analysis of a Non-contacting Finger Seal	2031
Joury Temis, Alexey Selivanov and Ivan Dzeva	

Part XVII Stability

On the Stabilizing Effect of Support Asymmetry in Rotordynamics	2045
Giancarlo Genta	

Periodic Stability and Sensitivity Analysis of Rotating Machinery	2059
Aykut Tamer and Pierangelo Masarati	

Numerical Analysis on the Nonlinear Hysteresis Phenomenon Associated with Instability of a Steam Turbine Rotor-Bearing System	2071
Ying Cui, Yongliang Wang and Jingjun Zhong	

Stability Analysis and Assessment of Rotor Trains Using Operational Modal Analysis	2083
Eoin Peter Carden, Niklas Sehlstedt, Kenny Krogh Nielsen, Staffan Lundholm and Stefano Morosi	

Stability Analysis Based on Energy Balance of Motion of the Gyroscopic Exercise Tool	2095
Masahiko Aki, Yuki Takezaki, Kentaro Takagi and Tsuyoshi Inoue	

Part XVIII Supporting Structure Effects

Development and Validation of a Model to Describe the Bearings Interaction in Rotating Machines Due to Elastic Supporting Structures	2111
Enrico Meli, Giovanni Pallini, Andrea Rindi and Stefano Rossin	

Influence of the Supporting Structure Dynamic Behaviour on the Shaft Vibration of a Real Rotating Machine	2123
Andrea Vania, Paolo Pennacchi and Steven Chatterton	

Development and Preliminary Validation of a New Strategy to Model the Interaction Between Rotating Machines and Elastic Supporting Structure	2137
E. Meli, G. Pallini, A. Rindi, S. Rossin, F. Capanni, D. Zaffino, V. Peselli and D. Calsolaro	
Evaluation of Pedestal Stiffness Variations in Steel Supported Structures for Steam Turbines	2149
Raj Subbiah	
Modeling and Experimental Characterization of Resilient Supports for Turbomolecular Pumps	2165
Carmelo Quartarone, Flavio Cometti, Sara Drovandi, Nicola Amati, Angelo Bonfitto, Lester D. Suarez and Andrea Tonoli	
Experimental Evaluation of a Modal Parameter Based Foundation Identification Procedure.	2177
Minli Yu, Ningsheng Feng and Eric J. Hahn	
Modeling of Visco-elastic Supports for Hydropower Applications.	2189
Erik Synnegård, Rolf Gustavsson and Jan-Olov Aidanpää	
Theoretical Modeling for a Rotor-Bearing-Foundation System and Its Dynamic Characteristics Analysis	2199
Jie Hong, Konstantin Shaposhnikov, Dayi Zhang and Yanhong Ma	
Non-linear Behavior and Loading Capability of the Spring Support in Lateral Response	2215
Marcin Bielecki	
 Part XIX Thermal Effects	
Thermal Unbalance Behaviour of Turbogenerator Rotors	2231
Bartolomeus Irwanto, Lothar Eckert and Thorsten Prothmann	
New Mathematical Model for the Morton Effect Based on the THD Analysis	2243
B.S. Grigor'ev, A.E. Fedorov and J. Schmied	
Similarity Analysis of Spiral Vibration Behavior on Large Turbomachinery Shaft Lines	2255
Kris Matthys and Joachim Schmied	

A New Approach for Thermo-Elastic Equations to Predict Spiral Vibrations in Turbogenerator Shafts.	2267
Mateusz Golebiowski, Rainer Nordmann and Eric Knopf	
Thermoelastic Steam Turbine Rotor Control Based on Neural Network	2283
Krzysztof Dominiczak, Romuald Rzadkowski and Wojciech Radulski	

Proceedings of the 9th IFToMM International
Conference on Rotor Dynamics

Pennacchi, P. (Ed.)

2015, LX, 2294 p. 1542 illus. In 2 volumes, not available
