

Contents

1	Introduction	1
1.1	An Overview	1
1.2	Linear and 2-D Arrays	5
1.3	Modeling Ultrasonic Phased Array Systems	7
1.4	Book Outline	13
	References	15
2	Acoustic Field of a 1-D Array Element	17
2.1	Single Element Transducer Models (2-D)	17
2.2	Far Field Waves	23
2.3	Numerical Piston Element Models	27
2.4	Line Source Models	33
2.5	Radiation Through a Planar Interface	36
	References	44
3	Large, Single Element Transducer Models	45
3.1	The Paraxial Approximation and a Fresnel Integral Model	45
3.2	Beam Steering and Focusing of a Large Element	47
3.2.1	Beam Steering	48
3.2.2	Steering in the Far Field	50
3.2.3	Beam Focusing	51
3.2.4	Beam Steering and Focusing	57
3.3	Amplitude Weighting	60
3.4	Multi-Gaussian Beam Model	65
3.5	Summary	71
	References	72
4	Phased Array Beam Modeling (1-D Elements)	73
4.1	Phased Array Beam Models	73
4.1.1	Far Field Behavior of an Array	76
4.2	Array Beam Steering	80
4.3	Array Beam Focusing	85

4.4	Array Amplitude Weighting	87
4.5	Array Beam Modeling Examples	89
4.6	Use of Gaussians for Modeling Phased Array Beam Fields	91
4.7	Beam Steering and Focusing through a Planar Interface	94
	References	98
5	Time Delay Laws (2-D)	99
5.1	Delay Laws for a Single Medium	99
5.2	Steering and Focusing Through a Planar Interface	102
	References	111
6	Acoustic Field of a 2-D Array Element	113
6.1	Single Element Transducer Models (3-D)	113
6.2	Far Field Waves	117
6.3	Numerical Point Source Piston Model	119
6.4	Contact Transducer Element Modeling	122
6.5	Radiation Through a Planar Interface	124
6.6	Gaussian Beam Equivalent Point Source Modeling	138
	References	146
7	Phased Array Beam Modeling (2-D Elements)	147
7.1	Phased Array Beam Models—Single Medium	147
7.1.1	Far Field Behavior of an Array	151
7.1.2	Beam Steering in 3-D	152
7.2	Radiation Through a Planar Interface	156
7.3	Array Beam Modeling Examples	160
	Reference.....	168
8	Time Delay Laws (3-D)	169
8.1	Beam Steering in 3-D	169
8.2	Beam Steering and Focusing in 3-D	170
8.3	Beam Steering Through a Planar Interface	172
8.4	Beam Steering and Focusing Through a Planar Interface	173
	Reference.....	177
9	Linear System Modeling of Phased Arrays	179
9.1	Linear System Modeling and Sound Generation	180
9.2	Linear System Modeling and Sound Reception	184
9.3	The Reception Process and Grating Lobes	189
9.4	Linear System Model of the Complete Ultrasonic Measure- ment Process	191
	References	193

10 Phased Array System Functions	195
10.1 Acoustic/Elastic Transfer Function Models	195
10.2 Array Element System Functions	206
Reference.....	209
11 Measurement Models for Ultrasonic Arrays	211
11.1 Reciprocity Relations	212
11.2 An Ultrasonic Measurement Model for Immersion Setups	216
11.3 An Ultrasonic Measurement Model for Contact Setups	217
11.4 A Reduced Measurement Model for Small Flaws	218
11.5 Measurement Models for Quantitative Imaging	224
11.6 Measurement Models for 2-D Problems	234
References	240
12 Imaging with Phased Arrays—An Introduction	241
12.1 SAFT Imaging	241
12.2 TFM Imaging	244
12.3 The Image Formation Process	246
12.4 Far Field Imaging Measurement Models (2-D)	249
12.5 Imaging Simulations	263
References	277
13 Imaging Measurement Models	279
13.1 Pulse-Echo Imaging	279
13.2 Full Matrix Imaging	287
13.3 2-D Imaging with a Linear Array	293
13.4 Discussion	302
13.5 Summary of Imaging Measurement Models	304
References	310
14 Element Boundary Conditions and Other Modeling Issues	313
14.1 Finite Impedance Baffle Model	313
14.2 Line Source Model of an Element in a Finite Impedance Baffle ...	318
14.3 Other Modeling Issues	325
References	326
Appendices	327
A The Beylkin Determinant	327
A.1 The Beylkin Determinant for 3-D Imaging (Common Source Case)	327
A.2 The Beylkin Determinant for 3-D Imaging (Pulse-Echo Case)	330
A.3 The Beylkin Determinant for 2-D Imaging	331
A.4 References	334

B Angle-Area Ratios	334
B.1 Ratios for Inspection in a Single Medium	334
B.2 Ratios for Inspection Through a Planar Interface	335
B.3 References	339
C MATLAB® Functions and Scripts	340
C.1 Beam Models for Single Elements	340
C.2 Delay Laws and Apodization Laws	341
C.3 Beam Models for Arrays	341
C.4 Miscellaneous Functions	342
C.5 Code Listings	343
Index	375

Fundamentals of Ultrasonic Phased Arrays

Schmerr Jr, L.W.

2015, XII, 377 p. 266 illus., 38 illus. in color., Hardcover

ISBN: 978-3-319-07271-5
