1	The ER in Quantum Wells of HD Non-parabolic Semiconductors	1
1.1	Introduction	1
1.2	Theoretical Background	4
1.2.1	The ER in QWs of HD Non-linear Optical Semiconductors	4
1.2.2	The ER in QWs of HD III-V Semiconductors	17
1.2.3	The ER in QWs of HD II-VI Semiconductors	33
1.2.4	The ER from QWs of HD IV-VI Semiconductors	36
1.2.5	The ER from QWs of HD Stressed Kane Type Semiconductors	48
1.2.6	The ER from QWs of HD Te	55
1.2.7	The ER from QWs of HD Gallium Phosphide	61
1.2.8	The ER in QWs of HD Platinum Antimonide	65
1.2.9	The ER from QWs of HD Bismuth Telluride	69
1.2.10	The ER from QWs of HD Germanium	71
1.2.11	The ER from QWs of HD Gallium Antimonide	79
1.3	Result and Discussions	82
1.4	Open Research Problems	103
	References	110
2	The ER in Doping Super Lattices of HD Non-parabolic Semiconductors	117
2.1	Introduction	117
2.2	Theoretical Background	117
2.2.1	The ER in Doping Superlattices of HD Non-linear Optical Semiconductors	117
2.2.2	The ER in Doping Superlattices of HD III-V, Ternary and Quaternary Semiconductors	120
2.2.3	The ER in Doping Superlattices of HD II-VI Semiconductors	126
2.2.4	The ER in Doping Superlattices of HD IV-VI Semiconductors	127

2.2.5	The ER in Doping Superlattices of HD Kane Type Semiconductors	130
2.3	Result and Discussions	132
2.4	Open Research Problems.	137
	References	138
3	The ER in Accumulation and Inversion Layers of Non-parabolic Semiconductors	141
3.1	Introduction	141
3.2	Theoretical Background.	142
3.2.1	The ER in Accumulation and Inversion Layers of Non-linear Optical Semiconductors.	142
3.2.2	The ER in Accumulation and Inversion Layers of III-V, Ternary and Quaternary Semiconductors . . .	146
3.2.3	The ER in Accumulation and Inversion Layers of II-VI Semiconductors	152
3.2.4	The ER in Accumulation and Inversion Layers of IV-VI Semiconductors.	155
3.2.5	The ER in Accumulation and Inversion Layers of Stressed III-V Semiconductors	158
3.2.6	The ER in Accumulation and Inversion Layers of Ge	162
3.3	Result and Discussions	165
3.4	Open Research Problems.	170
	References	171
4	Suggestion for Experimental Determinations of 2D and 3D ERs and Few Related Applications	173
4.1	Introduction	173
4.2	Suggestion for the Experimental Determinations of the 3D and 2D ERs for HDS Having Arbitrary Dispersion Laws.	173
4.3	Different Related Applications	175
4.4	Open Research Problem	181
	References	181
5	Conclusion and Scope for Future Research	183
	References	186
6	Appendix A: The ER in HDS Under Magnetic Quantization	187
6.1	Introduction	187
6.2	Theoretical Background.	188
6.2.1	The ER in HD Nonlinear Optical Semiconductors Under Magnetic Quantization.	188

6.2.2	The ER in HD Kane Type III-V, Ternary and Quaternary Semiconductors Under Magnetic Quantization	192
6.2.3	The ER in HD II-VI Semiconductors Under Magnetic Quantization	198
6.2.4	The ER in HD IV-VI Semiconductors Under Magnetic Quantization	199
6.2.5	The ER in HD Stressed Kane Type Semiconductors Under Magnetic Quantization.	205
6.2.6	The ER in HD Tellurium Under Magnetic Quantization	207
6.2.7	The ER in HD Gallium Phosphide Under Magnetic Quantization	207
6.2.8	The ER in HD Platinum Antimonide Under Magnetic Quantization	208
6.2.9	The ER in HD Bismuth Telluride Under Magnetic Quantization	209
6.2.10	The ER in HD Germanium Under Magnetic Quantization	210
6.2.11	The ER in HD Gallium Antimonide Under Magnetic Quantization	211
6.2.12	The ER in HD II-V Materials Under Magnetic Quantization	212
6.2.13	The ER in HD Lead Germanium Telluride Under Magnetic Quantization.	214
6.3	Open Research Problems.	216
	References	220

7 Appendix B: The ER in Superlattices of HD Non-parabolic Semiconductors Under Magnetic Quantization

7.1	Introduction	223
7.2	Theoretical Background.	224
7.2.1	The ER in HD III-V Superlattices with Graded Interfaces Under Magnetic Quantization	224
7.2.2	The ER in HD II-VI Superlattices with Graded Interfaces Under Magnetic Quantization	230
7.2.3	The ER in HD IV-VI Superlattices with Graded Interfaces Under Magnetic Quantization	234
7.2.4	The ER in HD HgTe/CdTe Superlattices with Graded Interfaces Under Magnetic Quantization	237
7.2.5	The ER in HD Stained Layer Superlattices with Graded Interfaces Under Magnetic Quantization	241

7.2.6	The ER in HD III-V Effective Mass Superlattices Under Magnetic Quantization.	245
7.2.7	The ER in HD II-VI Effective Mass Superlattices Under Magnetic Quantization.	248
7.2.8	The ER in HD IV-VI Effective Mass Superlattices Under Magnetic Quantization.	250
7.2.9	The ER in HD HgTe/CdTe Effective Mass Superlattices Under Magnetic Quantization	252
7.2.10	The ER in HD Stained Layer Effective Mass Superlattices Under Magnetic Quantization	254
7.3	Open Research Problem	256
	References	256
8	Appendix C: The ER in HDS and Their Nano-Structures Under Cross-Fields Configuration	259
8.1	Introduction	259
8.2	Theoretical Background.	260
8.2.1	The ER in HD Nonlinear Optical Semiconductors Under Cross-Fields Configuration.	260
8.2.2	The ER in HD Kane Type III-V Semiconductors Under Cross-Fields Configuration.	263
8.2.3	The ER in HD II-VI Semiconductors Under Cross-Fields Configuration	267
8.2.4	The ER in HD IV-VI Semiconductors Under Cross-Fields Configuration	269
8.2.5	The ER in HD Stressed Semiconductors Under Cross-Fields Configuration	271
8.2.6	The ER in Ultrathin Films of HD Nonlinear Optical Semiconductors Under Cross-Fields Configuration.	274
8.2.7	The ER in Ultrathin Films of HD Kane Type III-V, Ternary and Quaternary Semiconductors Under Cross-Fields Configuration	276
8.2.8	The ER in Ultrathin Films of HD II-VI Semiconductors Under Cross-Fields Configuration	278
8.2.9	The ER in Ultrathin Films of HD IV-VI Semiconductors Under Cross-Fields Configuration	279
8.2.10	The ER in Ultrathin Films of HD Stressed Semiconductors Under Cross-Fields Configuration	280
8.3	Open Research Problems.	281
	References	282

9	Appendix D: The ER in HD III-V, Ternary and Quaternary Semiconductors Under Strong Electric Field . . .	283
9.1	Introduction	283
9.2	Theoretical Background.	283
9.2.1	The ER Under Strong Electric Field in HD III-V, Ternary and Quaternary Materials	283
9.2.2	The ER in the Presence of Quantizing Magnetic Field Under Strong Electric Field in HD III-V, Ternary and Quaternary Materials	289
9.2.3	The ER in Ultrathin Films of HD III-V, Ternary and Quaternary Materials Under Strong Electric Field	290
9.2.4	The ER in Accumulation Layers of HD III-V, Ternary and Quaternary Materials	291
9.2.5	The ER in Doping Superlattices of HD III-V, Ternary and Quaternary Materials Under Strong Electric Field	293
9.2.6	The Magneto ER in Effective Mass Superlattices of HD III-V, Ternary and Quaternary Materials Under Strong Electric Field	294
9.2.7	The Electro ER in Ultrathin Films of HD III-V, Ternary and Quaternary Materials Under Cross Fields Configuration	296
9.3	Open Research Problems.	298
	Reference	301
10	Appendix E: The ER for HD III-V, Ternary and Quaternary Semiconductors Under External Photo-Excitation	303
10.1	Introduction	303
10.2	Theoretical Background.	304
10.2.1	The Formulation of the Electron Dispersion Law in the Presence of Light Waves in III-V, Ternary and Quaternary Semiconductors	304
10.2.2	The ER in the Presence of Light Waves in HD III-V, Ternary and Quaternary Semiconductors	316
10.2.3	The Opto ER Under Magnetic Quantization in HD III-V, Ternary and Quaternary Semiconductors	318
10.2.4	The ER in the Presence of Cross-Field Configuration Under External Photo-Excitation in HD III-V, Ternary and Quaternary Semiconductors	321
10.2.5	The ER in Ultrathin Films of HD III-V, Ternary and Quaternary Semiconductors Under External Photo-Excitation	325

10.2.6	The ER in Doping Superlattices of HD III-V, Ternary and Quaternary Semiconductors Under External Photo-Excitation	328
10.2.7	The Magneto ER in Effective Mass Superlattices of HD III-V, Ternary and Quaternary Semiconductors Under External Photo-Excitation	331
10.3	Open Research Problems	337
	References	337
	Material Index	339
	Subject Index	341

Heavily-Doped 2D-Quantized Structures and the
Einstein Relation

P. Ghatak, K.; Bhattacharya, S.

2015, XL, 347 p. 58 illus., Hardcover

ISBN: 978-3-319-08379-7
