

Contents

1	Hydrogen Bonds of Hydrides and Specific Interactions of Alkyl Compounds of Main Group Elements	1
1.1	Hydrogen Bond Energies of Main Group Element Hydrides	1
1.2	Specific Interactions of Alkyls of Zinc Subgroup Elements	6
1.2.1	Zinc Alkyls	6
1.2.2	Alkyls of Cadmium and Mercury	10
1.3	Specific Interactions of Alkyls of Boron Subgroup Elements	13
1.4	Specific Intermolecular Interactions of Alkyls of the Nitrogen Subgroup Elements	21
1.4.1	Specific Interactions of Trialkyls and Trivinyls	21
1.4.2	Alkyl Hydrogens and Alkene Hydrogens of the Phosphorus Subgroup Elements	27
1.5	Energies of Specific Interactions of Selenium and Tellurium Alkyls and Their Unsaturated Analogs	31
1.5.1	Selenium and Tellurium Alkyls	31
1.5.2	Dialkenes of Selenium and Tellurium	36
1.5.3	Energies of Specific Interactions of Phenyl Selenides and Diphenylmercury	38
1.5.4	Energies of Specific Interactions of (Dimethyl-amino) methylarsine, Dimethylstibineborane, and Dimethyl (methylthio)borane	43
	References	46
2	Specific Intermolecular Interactions of Silanes and Their Derivatives	49
2.1	Types of Specific Interactions of Silanes and Compounds with a Tetrahedral Molecular Structure	49
2.1.1	Silanes $n = 4 + 9$ and Compounds with a Tetrahedral Molecular Structure	49
2.1.2	Energies of Specific Interactions of Liquid Trialkylsilanes, Ethyldialkylsilanes, and Methylalkylsilanes	57

2.1.3	Energies of Specific Interactions of Liquid Dimethylalkylsilanes, Diethylalkylsilanes, Propylbutylsilanes, and Vinylmethylsilane	68
2.2	Energies of Specific Interactions of Trisilyls of Nitrogen Main Group Elements and Disilazanes	73
2.3	Energies of Specific Interactions of Silanamines	76
2.4	Energies of Specific Interactions of Silanetriamine and Disilanylamine	81
2.5	Energies of Specific Interactions of Alkyldisilanes, Alkyldisilanylamines, and Alkyldisilanamine	84
2.6	Specific Interactions of Silacyclobutanes and 1,1-Dimethylsilacyclopentane	89
2.7	Energies of Specific Interactions of Oxygengenerated Silanes	93
2.7.1	Bis(Disilanyl)ether, Trimethylsilanol, and Methoxysilane	93
2.7.2	Methoxy-, Ethoxy-, Propoxy-, and Butoxysilanes and Silylacetylene	96
2.7.3	Phenoxytrimethylsilanes and (Methoxyphenyl)trimethylsilanes	101
2.7.4	Trimethoxy[(methylthio)alkyl]silanes, [(Ethylthio)alkyl] trimethoxysilanes, and Triethoxy[(ethylthio)alkyl]silane	106
2.7.5	1,3,7,5,4-Pentamethylcyclopentasiloxane and Decamethylcyclopentasiloxane	110
2.7.6	Energies of Specific Interactions of Methylldiphenylsilanes	111
	References	117
3	Specific Interactions of Elementorganic Compounds of Germanium Subgroup Elements	119
3.1	Specific Interactions of Germanium Organic Compounds and Their Energies	119
3.1.1	Energies of Specific Interactions of Compounds of Germanium with Alkyl Ligands	119
3.1.2	Energies of Hydrogen Bonds and Specific Interactions of Methylgermanium and Dimethylgermane	120
3.1.3	Energies of Hydrogen Bonds and Specific Interactions of Germanium Alkyl Compounds with Metal–Meta Bonds	123
3.1.4	Energies of Specific Interactions of Triethyl(diethylamino) germane	128
3.1.5	Energies of Specific Interactions of Methoxygermane, Ethoxygermane, Methylthiogermane, and Hexamethyldigermoxane	129
3.2	Energies of Specific Interactions of Tetraalkyltins and Tetramethyllead	133
3.3	Energies of Specific Interactions of Tetraphenyl and Hexaphenyl Silicon Subgroup Elements	136
	References	140

4 Specific Intermolecular Interactions of Sulfonated Organic Compounds	143
4.1 Energies of Specific Interactions of Sulfides and Disulfides	143
4.1.1 Symmetrical Sulfides with Normal Molecular Structure and Isostructural Methyl Groups	143
4.1.2 Asymmetrical Sulfides of Methyl-R with Normal Structure and Isostructural Methyl Group	148
4.1.3 Asymmetrical Sulfides of Ethyl-R with Normal Structure and Isostructural Methyl Group	152
4.1.4 Energies of Specific Interactions of <i>tert</i> -Butyl Sulfides . . .	155
4.1.5 Sulfides with Unsaturated Ligands	158
4.1.6 Disulfides with Saturated Ligands	160
4.2 Specific Interactions of Cyclopentyl Methylsulfide and Sulfides with Benzoic Cyclic Compounds	164
4.2.1 Cyclopentyl Methylsulfide	164
4.2.2 Phenyl Sulfides, Benzyl Methyl Sulfide, and (Thio)toluenes	166
4.3 Specific Intermolecular Interactions of Cyclic Sulfides	172
4.3.1 Thiiranes, Thiocyclobutanes, and Tetrahydrothiophenes . . .	172
4.3.2 Tetrahydro-2 <i>H</i> -thiopyranes	178
4.3.3 Liquid and Crystalline 2,3-Benzothiophene	181
4.3.4 Thiophenes	183
4.4 Hydrogen Bonds and Specific Intermolecular Interactions of Thieles	186
4.4.1 1-Propanethiol Series	186
4.4.2 Series of 2-Propanethiol and Alkylthiols with Isostructural Methyl Groups	189
4.4.3 1,2-Ethanedithiol Series	194
4.4.4 Cyclopentanethiol and Cyclohexanethiol	195
4.4.5 Benzenethiol(thiophenol), Methylbenzenethiols, and Benzenemethanethiol	198
4.5 Energies of Specific Intermolecular Interactions and Hydrogen Bonds of Dithianes and 4,5,6,7-Tetrahydro-1,4-benzodithiol-2-thione and Its Derivatives	201
4.5.1 Dithianes, 1,3,5-Tritiane, and 1,3-Dithian-2-thyone	201
4.5.2 4,5-Benzo-dithiol-thiones, Tetramethylene-dithiole-thyone, and 4,5-Tetramethylene-1,3-dithiolan-2-thyone	205
4.5.3 1,7,7-Trimethylbicyclo[2,2,1]heptane-2-thione and Trithiocarbonic Acid (Cyclic Ethylene Ester)	209
4.6 Energies of Specific Interactions of Alkylthioboranes	211
References	214

5	Specific Intermolecular Interactions of Sulfur, Oxygen, and Nitrogenated Organic Compounds	217
5.1	Specific Interactions of Sulfur and Oxygenated Organic Compounds	217
5.1.1	Carbonyl Sulfide, Carbon Disulfide, Dimethylsulfoxide, Divinylsulfoxide, and Diacetylsulfide BY-Oxythiane	217
5.1.2	1-(Methylthio)-2-(Vinyloxy)ethane, Thioacetyl Acid, and Acetic Acid	221
5.1.3	Alkyl Thiolactates	226
5.1.4	BY-Oxythiane and Thiopirans	227
5.1.5	1,3-Dithiol-2-one, 1,3-Dithiole-2-thione, and 1,3-Dithiolan-2-one	229
5.2	Energies of the Specific Interactions of Sulfones	232
5.2.1	Alkyl Sulfones and Divinylsulfone	232
5.2.2	Tetrahydrothiophene-1,1-dioxide(sulfolane), Thiete sulfone (2 <i>H</i> -thiete)-1,1-dioxide, and 2,5-Dihydro-2-methylthiophene-1,1-dioxide	235
5.2.3	Methylbenzylsulfone and Phenyl Sulfones with Unsaturated Ligands	239
5.2.4	Methyl- <i>p</i> -tolyl Sulfone and <i>p</i> -Tolyl Sulfone with Unsaturated Ligands	242
5.2.5	Diphenyl Sulfone, Dibenzyl Sulfone, and Di- <i>p</i> -tolyl Sulfone	245
5.2.6	2-Thiophene Carboxylic Acid	249
5.3	Specific Intermolecular Interactions of Sulfur and Nitrogenated Organic Compounds	249
5.3.1	Thiocyanate, Isothiocyanates, and Phenyl Isothiocyanate . . .	249
5.3.2	Sulfur Diimide, Thioacetamide, and Its Derivatives	253
5.3.3	Thiobenzamide and Its Derivatives	257
5.3.4	2,3,4,5-Tetrahydro-(methylthio)pyridine and 4-(Methylthio)pyridine	259
5.3.5	Specific Interactions of Sulfur and Nitrogen in Cyclic Thiazol and Its Derivatives	261
5.3.6	Energies of Specific Interactions of Trithiocarbonic Acid (Cyclic Ethylene Ester) and 4,5,6,7-Tetrahydro-1,4-benzodithiol-2-tione	264
5.3.7	2,1,3-Benzothiadiazole, Phenyl-1,2,3-selenadiazole, and 2-Methylthio-4-ethylamine-6-isopropylamino-1,3,5-triazine . .	266
5.4	Energies of Specific Interactions of Sulfur, Oxygen, and Nitrogenated Compounds	269
	References	273
	Index	275

Specific Intermolecular Interactions of Element-Organic
Compounds

Baev, A.K.

2015, XXIV, 278 p. 668 illus., Hardcover

ISBN: 978-3-319-08562-3
