

# Contents

<b>Malware and Machine Learning</b> . . . . .	1
Charles LeDoux and Arun Lakhotia	
<b>Soft Computing Based Epidemical Crisis Prediction</b> . . . . .	43
Dan E. Tamir, Naphtali D. Rishe, Mark Last and Abraham Kandel	
<b>An ACP-Based Approach to Intelligence and Security Informatics</b> . . .	69
Fei-Yue Wang, Xiaochen Li and Wenji Mao	
<b>Microfiles as a Potential Source of Confidential Information Leakage</b> . . . . .	87
Oleg Chertov and Dan Tavrov	
<b>Decision Support in Open Source Intelligence</b> . . . . .	115
Daniel Ortiz-Arroyo	
<b>Information Fusion Process Design Issues for Hard and Soft Information: Developing an Initial Prototype</b> . . . . .	129
James Llinas	
<b>Intrusion Detection with Type-2 Fuzzy Ontologies and Similarity Measures</b> . . . . .	151
Robin Wikström and József Mezei	
<b>A Multi-objective Genetic Algorithm Based Approach for Effective Intrusion Detection Using Neural Networks</b> . . . . .	173
Gulshan Kumar and Krishan Kumar	
<b>Cyber Insider Mission Detection for Situation Awareness</b> . . . . .	201
Haitao Du, Changzhou Wang, Tao Zhang, Shanchieh Jay Yang, Jai Choi and Peng Liu	

<b>A Game Theoretic Engine for Cyber Warfare . . . . .</b>	<b>219</b>
Allen Ott, Alex Moir and John T. Rickard	
<b>Mission Impact Assessment for Cyber Warfare . . . . .</b>	<b>239</b>
Jared Holsopple, Shanchieh Jay Yang and Moises Sudit	
<b>Uncertainty Modeling: The Computational Economists’ View on Cyberwarfare . . . . .</b>	<b>267</b>
Suchitra Abel	

Intelligent Methods for Cyber Warfare

Yager, R.R.; Reformat, M.; Alajlan, N. (Eds.)

2015, XII, 278 p. 58 illus., Hardcover

ISBN: 978-3-319-08623-1
