

# Contents

<b>1</b>	<b>Introduction: Background, Scope, and Context</b>	<b>1</b>
1.1	Background and Motivation	1
1.1.1	Why the Move to Multicore?	2
1.1.2	New Issues in Multicore Systems	4
1.1.3	Performance Improvement	5
1.2	Multiprocessor Platforms	8
1.3	Sporadic Tasks	9
1.4	Hard Real-time	10
1.5	Scope of This Book	10
1.6	Organization of This Book	11
<b>2</b>	<b>Preliminaries: Workload and Platform Models</b>	<b>13</b>
2.1	Workload Models	13
2.1.1	The Liu and Layland (LL) Task Model	14
2.1.2	The Three-Parameter Sporadic Tasks Model	15
2.1.3	The Sporadic DAG Tasks Model	16
2.2	A Taxonomy of Multiprocessor Platforms	17
2.2.1	Preemption and Migration	17
2.3	Discussion	18
2.3.1	The Restriction to Sporadic Task Models	18
2.3.2	The Task Independence Assumption	20
2.3.3	Preemption and Migration Costs	22
	Sources	22
<b>3</b>	<b>Preliminaries: Scheduling Concepts and Goals</b>	<b>23</b>
3.1	Feasibility and Schedulability	23
3.2	Priority Assignments	24
3.3	Sustainability and Predictability	26
	Sources	28

<b>4</b>	<b>A Review of Selected Results on Uniprocessors</b>	29
4.1	The Optimality of EDF on Preemptive Uniprocessors	29
4.2	FTP Scheduling Algorithms	30
4.3	The Synchronous Arrival Sequence	31
4.4	Intractability of Schedulability Analysis for Periodic Task Systems	32
	Sources	33
<b>5</b>	<b>Implicit-Deadline (L&amp;L) Tasks</b>	35
<b>6</b>	<b>Partitioned Scheduling of L&amp;L Tasks</b>	39
6.1	Utilization Bounds for Some Common Partitioning Algorithms	40
6.2	Speedup Factors for Some Common Partitioning Algorithms	42
6.3	A PTAS for Partitioning	44
6.4	Fixed-Task-Priority (FTP) Partitioned Scheduling	50
6.5	Semi-partitioned FTP Scheduling	51
	Sources	52
<b>7</b>	<b>Global Dynamic-Priority Scheduling of L&amp;L Tasks</b>	53
7.1	Overview	54
7.2	Definitions and Notation	54
7.3	The Existence of Pfair Schedules	56
7.4	A Pfair Scheduling Algorithm	62
	Sources	66
<b>8</b>	<b>Global Fixed-Job-Priority Scheduling of L&amp;L Tasks</b>	67
8.1	EDF Scheduling on Uniform Multiprocessors	68
8.2	Global EDF Scheduling	74
8.3	Global FJP Scheduling	77
8.3.1	A Pragmatic Improvement	82
	Sources	85
<b>9</b>	<b>Global Fixed-Task-Priority (FTP) Scheduling of L&amp;L Tasks</b>	87
9.1	Global RM Scheduling	87
9.2	Global FTP Scheduling	91
9.2.1	Upper Bounds	93
	Sources	93
<b>10</b>	<b>The Three-Parameter Sporadic Tasks Model</b>	95
10.1	The Three-Parameter Sporadic Task Model	96
10.2	Characterizing a Task's Demand	97
10.3	The Demand Bound Function	98
10.3.1	Approximating the demand bound function	99
10.4	The Forced-Forward Demand Bound Function	100
10.5	The Request-Bound Function	101
10.5.1	Relationship Between RBF* and DBF	101
	Sources	102

<b>11</b>	<b>Partitioned Scheduling</b>	103
11.1	Density-Based Partitioning	103
11.2	Partitioning Based on Approximations to DBF	104
11.2.1	Evaluation	108
11.3	Partitioned FTP Scheduling	110
	Sources	114
<b>12</b>	<b>Global Scheduling: General Comments</b>	115
12.1	Global Scheduling and Worst-Case Behavior	116
12.2	The Impossibility of Optimal Online Scheduling	118
	Sources	119
<b>13</b>	<b>Density-Based Global Schedulability Tests</b>	121
13.1	Density as a Performance Metric	121
13.2	Density-Based Tests for FJP Scheduling	122
13.3	Density-Based Tests for FTP Scheduling	123
	Sources	124
<b>14</b>	<b>A Strategy for Global Schedulability Analysis</b>	125
14.1	Description of the Strategy	125
14.2	Illustrating the Approach of Sect. 14.1: Uniprocessor EDF	126
14.3	Determining Workload Bounds	127
14.4	Interference	128
14.5	Comparing Different Schedulability Tests	129
14.5.1	Sustainability	130
	Sources	132
<b>15</b>	<b>The [BCL] and [BAR] Tests</b>	133
15.1	The [BCL] Test	134
15.2	The [BAR] Test	137
15.2.1	Run-Time Complexity	141
15.2.2	A Simpler Formulation	142
15.2.3	Non-preemptive Scheduling	142
	Sources	142
<b>16</b>	<b>The [BAK] Test</b>	143
16.1	Overview of the [BAK] Test	144
16.1.1	The Problem of Carry-ins	144
16.1.2	The [BAK] Breakthrough	144
16.2	Details	146
16.3	A Quantitative Bound	150
	Sources	153

<b>17</b>	<b>Response Time Analysis: The [RTA] Test</b>	155
17.1	Response Time Analysis [RTA]	155
17.1.1	[RTA] for Work-Conserving Schedulers	157
17.1.2	[RTA] for EDF	160
17.1.3	Computational Complexity	162
17.1.4	Reduction of Carry-in Instances	163
	Sources	164
<b>18</b>	<b>Global Fixed-Task-Priority Scheduling</b>	165
18.1	The [BCL] Test for FTP Algorithms	165
18.2	The [RTA] Test for FTP Scheduling	167
18.3	Reducing the Number of Carry-in Instances	168
18.3.1	Reducing the Number of Carry-in Instances for [BCL]	169
18.4	The Priority Assignment Problem	170
	Sources	172
<b>19</b>	<b>Speedup Bounds for Global Scheduling</b>	173
19.1	The Forced-Forward Demand Bound Function	174
19.2	Sufficient Schedulability Conditions	176
19.3	Determining Processor Speedup Factor	179
19.4	Improved Schedulability Tests	181
19.4.1	Bounding the Range of Time-Values that Must Be Tested	182
19.4.2	Choosing Potential Witnesses to Test	184
19.4.3	Putting the Pieces Together: The EDF Schedulability Test	186
19.4.4	Computing $\sigma_{\text{new}}$	187
	Sources	188
<b>20</b>	<b>Global Dynamic Priority Scheduling</b>	189
20.1	Least Laxity Scheduling	189
20.2	EDZL Scheduling	190
<b>21</b>	<b>The Sporadic DAG Tasks Model</b>	191
21.1	The Sporadic DAG Tasks Model	191
21.1.1	Parallelism in the DAG	193
21.1.2	Intractability of Feasibility Analysis	194
21.2	Implicit-Deadline DAGs	194
21.3	Normal Collections of Jobs	196
21.4	A Speedup Bound for EDF	197
21.5	A Speedup Bound for Deadline Monotonic (DM)	198
21.6	The Work Function	200
21.6.1	Computing the Work Function	201
21.7	Pseudo-Polynomial EDF-Schedulability Testing	202
21.8	Polynomial-Time Sufficient Schedulability Tests	204
	Sources	204

<b>22</b>	<b>Real-time Scheduling upon Heterogeneous Multiprocessors</b>	205
22.1	Task and Machine Model	206
22.2	Global Scheduling of Liu and Layland (LL) Task Systems	206
22.3	Partitioned Scheduling of LL Task Systems	207
22.3.1	A Linear-Programming Approach to Approximate Partitioning	207
22.3.2	Partitioning upon Limited Unrelated Multiprocessors	211
22.4	Partitioned Scheduling of Three-Parameter Sporadic Task Systems	211
<b>23</b>	<b>Looking Ahead</b>	213
23.1	Soft and Firm Real-Time Scheduling	213
23.2	Multiple Resource Types	214
23.3	Interprocessor Communication	214
	<b>References</b>	215
	<b>Index</b>	225

Multiprocessor Scheduling for Real-Time Systems

Baruah, S.; Bertogna, M.; Buttazzo, G.

2015, XV, 228 p. 45 illus., 4 illus. in color., Hardcover

ISBN: 978-3-319-08695-8
