Part I Introduction and Overview

| | | |
|----------|---|----------|
| 1 | Brief History and Overview of Intelligent Optimization Algorithms | 3 |
| 1.1 | Introduction | 3 |
| 1.2 | Brief History of Intelligent Optimization Algorithms | 5 |
| 1.3 | Classification of Intelligent Algorithms | 8 |
| 1.4 | Brief Review of Typical Intelligent Optimization Algorithms | 12 |
| 1.4.1 | Review of Evolutionary Learning Algorithms | 12 |
| 1.4.2 | Review of Neighborhood Search Algorithms | 16 |
| 1.4.3 | Review of Swarm Intelligence Algorithm | 20 |
| 1.5 | The Classification of Current Studies on Intelligent Optimization Algorithm | 23 |
| 1.5.1 | Algorithm Innovation | 23 |
| 1.5.2 | Algorithm Improvement | 24 |
| 1.5.3 | Algorithm Hybridization | 25 |
| 1.5.4 | Algorithm Parallelization | 26 |
| 1.5.5 | Algorithm Application | 26 |
| 1.6 | Development Trends | 28 |
| 1.6.1 | Intellectualization | 28 |
| 1.6.2 | Service-Oriented | 29 |
| 1.6.3 | Application-Oriented | 29 |
| 1.6.4 | User-Centric | 29 |
| 1.7 | Summary | 30 |
| | References | 31 |

| | | |
|----------|---|-----------|
| 2 | Recent Advances of Intelligent Optimization Algorithm | |
| | in Manufacturing | 35 |
| 2.1 | Introduction | 35 |
| 2.2 | Classification of Optimization Problems in Manufacturing . . . | 37 |
| 2.2.1 | Numerical Function Optimization | 38 |
| 2.2.2 | Parameter Optimization | 38 |
| 2.2.3 | Detection and Classification | 39 |
| 2.2.4 | Combinatorial Scheduling | 40 |
| 2.2.5 | Multi-disciplinary Optimization | 41 |
| 2.2.6 | Summary of the Five Types of Optimization Problems in Manufacturing | 42 |
| 2.3 | Challenges for Addressing Optimization Problems in Manufacturing | 44 |
| 2.3.1 | Balance of Multi-objectives | 44 |
| 2.3.2 | Handling of Multi-constraints | 46 |
| 2.3.3 | Extraction of Priori Knowledge | 47 |
| 2.3.4 | Modeling of Uncertainty and Dynamics | 48 |
| 2.3.5 | Transformation of Qualitative and Quantitative Features | 50 |
| 2.3.6 | Simplification of Large-Scale Solution Space | 51 |
| 2.3.7 | Jumping Out of Local Convergence | 52 |
| 2.4 | An Overview of Optimization Methods in Manufacturing | 52 |
| 2.4.1 | Empirical-Based Method | 53 |
| 2.4.2 | Prediction-Based Method | 54 |
| 2.4.3 | Simulation-Based Method | 55 |
| 2.4.4 | Model-Based Method | 55 |
| 2.4.5 | Tool-Based Method | 56 |
| 2.4.6 | Advanced-Computing-Technology-Based Method | 56 |
| 2.4.7 | Summary of Studies on Solving Methods | 57 |
| 2.5 | Intelligent Optimization Algorithms for Optimization Problems in Manufacturing | 58 |
| 2.6 | Challenges of Applying Intelligent Optimization Algorithms in Manufacturing | 64 |
| 2.6.1 | Problem Modeling | 64 |
| 2.6.2 | Algorithm Selection | 65 |
| 2.6.3 | Encoding Scheming | 66 |
| 2.6.4 | Operator Designing | 67 |
| 2.7 | Future Approaches for Manufacturing Optimization | 67 |
| 2.8 | Future Requirements and Trends of Intelligent Optimization Algorithm in Manufacturing | 68 |
| 2.8.1 | Integration | 68 |
| 2.8.2 | Configuration | 69 |
| 2.8.3 | Parallelization | 70 |
| 2.8.4 | Executing as Service | 71 |

| | | |
|-----|----------------------|----|
| 2.9 | Summary | 72 |
| | References | 74 |

Part II Design and Implementation

| | | |
|----------|--|------------|
| 3 | Dynamic Configuration of Intelligent | |
| | Optimization Algorithms | 83 |
| 3.1 | Concept and Mainframe of DC-IOA | 83 |
| 3.1.1 | Mainframe of DC-IOA | 84 |
| 3.1.2 | Problem Specification and Construction of Algorithm Library in DC-IOA | 85 |
| 3.2 | Case Study | 90 |
| 3.2.1 | Configuration System for DC-IOA | 90 |
| 3.2.2 | Case Study of DC-IOA | 93 |
| 3.2.3 | Performance Analysis | 95 |
| 3.2.4 | Comparison with Traditional Optimal Process | 102 |
| 3.3 | Summary | 103 |
| | References | 104 |
| 4 | Improvement and Hybridization of Intelligent | |
| | Optimization Algorithm | 107 |
| 4.1 | Introduction | 107 |
| 4.2 | Classification of Improvement | 109 |
| 4.2.1 | Improvement in Initial Scheme | 109 |
| 4.2.2 | Improvement in Coding Scheme | 110 |
| 4.2.3 | Improvement in Operator | 112 |
| 4.2.4 | Improvement in Evolutionary Strategy | 113 |
| 4.3 | Classification of Hybridization | 114 |
| 4.3.1 | Hybridization for Exploration | 115 |
| 4.3.2 | Hybridization for Exploitation | 116 |
| 4.3.3 | Hybridization for Adaptation | 117 |
| 4.4 | Improvement and Hybridization Based on DC-IA | 118 |
| 4.5 | Summary | 124 |
| | References | 124 |
| 5 | Parallelization of Intelligent Optimization Algorithm | 127 |
| 5.1 | Introduction | 127 |
| 5.2 | Parallel Implementation Ways for Intelligent Optimization Algorithm | 131 |
| 5.2.1 | Parallel Implementation Based on Multi-core Processor | 131 |
| 5.2.2 | Parallel Implementation Based on Computer Cluster | 132 |

| | | |
|-------|---|-----|
| 5.2.3 | Parallel Implementation Based on GPU | 132 |
| 5.2.4 | Parallel Implementation Based on FPGA | 133 |
| 5.3 | Implementation of Typical Parallel Topologies for Intelligent Optimization Algorithm | 134 |
| 5.3.1 | Master-Slave Topology | 134 |
| 5.3.2 | Ring Topology | 136 |
| 5.3.3 | Mesh Topology | 138 |
| 5.3.4 | Full Mesh Topology | 140 |
| 5.3.5 | Random Topology | 140 |
| 5.4 | New Configuration in Parallel Intelligent Optimization Algorithm | 142 |
| 5.4.1 | Topology Configuration in Parallelization Based on MPI | 144 |
| 5.4.2 | Operation Configuration in Parallelization Based on MPI | 146 |
| 5.4.3 | Module Configuration in Parallelization Based on FPGA | 147 |
| 5.5 | Summary | 152 |
| | References | 152 |

Part III Application of Improved Intelligent Optimization Algorithms

| | | |
|----------|--|------------|
| 6 | GA-BHTR for Partner Selection Problem | 157 |
| 6.1 | Introduction | 157 |
| 6.2 | Description of Partner Selection Problem in Virtual Enterprise | 160 |
| 6.2.1 | Description and Motivation | 160 |
| 6.2.2 | Formulation of the Partner Selection Problem (PSP) | 163 |
| 6.3 | GA-BHTR for PSP | 165 |
| 6.3.1 | Review of Standard GA | 165 |
| 6.3.2 | Framework of GA-BHTR | 166 |
| 6.3.3 | Graph Generation for Representing the Precedence Relationship Among PSP | 168 |
| 6.3.4 | Distribute Individuals into Multiple Communities. | 172 |
| 6.3.5 | Intersection and Mutation in GA-BHTR | 175 |
| 6.3.6 | Maintain Data Using the Binary Heap. | 177 |
| 6.3.7 | The Catastrophe Operation | 179 |
| 6.4 | Simulation and Experiment | 180 |
| 6.4.1 | Effectiveness of the Proposed Transitive Reduction Algorithm. | 181 |
| 6.4.2 | Effectiveness of Multiple Communities. | 182 |

| | | |
|----------|--|------------|
| 6.4.3 | Effectiveness of Multiple Communities While Considering the DISMC Problem | 183 |
| 6.4.4 | Effectiveness of the Catastrophe Operation | 184 |
| 6.4.5 | Efficiency of Using the Binary Heap | 184 |
| 6.5 | Summary | 187 |
| | References | 187 |
| 7 | CLPS-GA for Energy-Aware Cloud Service Scheduling | 191 |
| 7.1 | Introduction | 191 |
| 7.2 | Related Works | 193 |
| 7.3 | Modeling of Energy-Aware Cloud Service Scheduling in Cloud Manufacturing | 195 |
| 7.3.1 | General Definition | 196 |
| 7.3.2 | Objective Functions and Optimization Model. | 198 |
| 7.3.3 | Multi-Objective Optimization Model for the Resource Scheduling Problem | 200 |
| 7.4 | Cloud Service Scheduling with CLPS-GA | 202 |
| 7.4.1 | Pareto Solutions for MOO Problems. | 202 |
| 7.4.2 | Traditional Genetic Algorithms for MOO Problems. | 204 |
| 7.4.3 | CLPS-GA for Addressing MOO Problems. | 207 |
| 7.5 | Experimental Evaluation | 211 |
| 7.5.1 | Data and Implementation. | 211 |
| 7.5.2 | Experiments and Results | 213 |
| 7.5.3 | Comparison Between TPCO and MPCO | 214 |
| 7.5.4 | Improvements Due to the Case Library. | 217 |
| 7.5.5 | Comparison Between CLPS-GA and Other Enhanced GAs | 218 |
| 7.6 | Summary | 221 |
| | References | 222 |

Part IV Application of Hybrid Intelligent Optimization Algorithms

| | | |
|----------|--|------------|
| 8 | SFB-ACO for Submicron VLSI Routing Optimization with Timing Constraints | 227 |
| 8.1 | Introduction | 227 |
| 8.2 | Preliminary | 231 |
| 8.2.1 | Terminology in Steiner Tree | 231 |
| 8.2.2 | Elmore Delay. | 232 |
| 8.2.3 | Problem Formulation | 233 |
| 8.3 | SFB-ACO for Addressing MSTRO Problem | 237 |
| 8.3.1 | ACO for Path Planning with Two Endpoints | 237 |

| | | |
|----------|--|------------|
| 8.3.2 | Procedure for Constructing Steiner Tree Using SFB-ACO | 239 |
| 8.3.3 | Constraint-Oriented Feedback in SFB-ACO | 241 |
| 8.4 | Implementation and Results | 243 |
| 8.4.1 | Parameters Selection | 243 |
| 8.4.2 | Improvement of Synergy | 244 |
| 8.4.3 | Effectiveness of Constraint-Oriented Feedback. | 249 |
| 8.5 | Summary | 254 |
| | References | 254 |
| 9 | A Hybrid RCO for Dual Scheduling of Cloud Service and Computing Resource in Private Cloud | 257 |
| 9.1 | Introduction | 257 |
| 9.2 | Related Works | 260 |
| 9.3 | Motivation Example | 261 |
| 9.4 | Problem Description | 263 |
| 9.4.1 | The Modeling of DS-CSCR in Private Cloud. | 263 |
| 9.4.2 | Problem Formulation of DS-CSCR in Private Cloud | 267 |
| 9.5 | Ranking Chaos Algorithm (RCO) for DS-CSCR in Private Cloud | 270 |
| 9.5.1 | Initialization. | 271 |
| 9.5.2 | Ranking Selection Operator | 271 |
| 9.5.3 | Individual Chaos Operator | 273 |
| 9.5.4 | Dynamic Heuristic Operator | 275 |
| 9.5.5 | The Complexity of the Proposed Algorithm. | 277 |
| 9.6 | Experiments and Discussions | 277 |
| 9.6.1 | Performance of DS-CSCR Compared with Traditional Two-Level Scheduling. | 280 |
| 9.6.2 | Searching Capability of RCO for Solving DS-CSCR | 280 |
| 9.6.3 | Time Consumption and Stability of RCO for Solving DS-CSCR | 283 |
| 9.7 | Summary | 285 |
| | References | 286 |

Part V Application of Parallel Intelligent Optimization Algorithms

| | | |
|-----------|--|------------|
| 10 | Computing Resource Allocation with PEADGA | 291 |
| 10.1 | Introduction | 291 |
| 10.2 | Related Works | 294 |
| 10.3 | Motivation Example of OACR | 296 |
| 10.4 | Description and Formulation of OACR | 297 |

| | | |
|--|--|------------|
| 10.4.1 | The Structure of OACR | 298 |
| 10.4.2 | The Characteristics of CRs in CMfg | 300 |
| 10.4.3 | The Formulation of the OACR Problem | 301 |
| 10.5 | NIA for Addressing OACR | 308 |
| 10.5.1 | Review of GA, ACO and IA | 308 |
| 10.5.2 | The Configuration OfNIA for the OACR Problem | 311 |
| 10.5.3 | The Time Complexity of the Proposed Algorithms | 314 |
| 10.6 | Configuration and Parallelization of NIA | 316 |
| 10.7 | Experiments and Discussions | 318 |
| 10.7.1 | The Design of the Heuristic Information in the Intelligent Algorithms | 320 |
| 10.7.2 | The Comparison of GA, ACO, IA and NDIA for Addressing OACR | 322 |
| 10.7.3 | The Performance of PNIA | 326 |
| 10.8 | Summary | 328 |
| | References | 329 |
| 11 | Job Shop Scheduling with FPGA-Based F4SA | 333 |
| 11.1 | Introduction | 333 |
| 11.2 | Problem Description of Job Shop Scheduling | 335 |
| 11.3 | Design and Configuration of SA-Based on FPGA | 335 |
| 11.3.1 | FPGA-Based F4SA Design for JSSP | 335 |
| 11.3.2 | FPGA-Based Operators of F4SA | 339 |
| 11.3.3 | Operator Configuration Based on FPGA | 344 |
| 11.4 | Experiments and Discussions | 344 |
| 11.5 | Summary | 346 |
| | References | 346 |
| Part VI Future Works of Configurable Intelligent Optimization Algorithm | | |
| 12 | Future Trends and Challenges | 351 |
| 12.1 | Related Works for Configuration of Intelligent Optimization Algorithm | 351 |
| 12.2 | Dynamic Configuration for Other Algorithms | 353 |
| 12.3 | Dynamic Configuration on FPGA | 356 |
| 12.4 | The Challenges on the Development of Dynamic Configuration | 358 |
| 12.5 | Summary | 359 |
| | References | 360 |

Configurable Intelligent Optimization Algorithm
Design and Practice in Manufacturing
