# Contents

<b>1</b>	<b>Introduction . . . . .</b>	<b>1</b>
	Dénes Lóczy	
 <b>Part I Physical Environment</b>		
<b>2</b>	<b>Geological and Tectonic Background . . . . .</b>	<b>7</b>
	János Haas	
<b>3</b>	<b>Climate and Drainage . . . . .</b>	<b>19</b>
	Dénes Lóczy	
<b>4</b>	<b>Long-Term Geomorphological Evolution . . . . .</b>	<b>29</b>
	Gábor Csillag and Krisztina Sebe	
<b>5</b>	<b>Geomorphological Regions . . . . .</b>	<b>39</b>
	Dénes Lóczy	
 <b>Part II Landscapes and Landforms</b>		
<b>6</b>	<b>Hat Rock: Solution Features in Metamorphic Mountains . . . . .</b>	<b>47</b>
	Márton Veress, Zoltán Zentai, and Zoltán Unger	
<b>7</b>	<b>Kab Mountain: Karst Under a Basalt Cap . . . . .</b>	<b>55</b>
	Márton Veress and Zoltán Unger	
<b>8</b>	<b>Buttes in the Tapolca Basin . . . . .</b>	<b>63</b>
	Péter Gadányi	
<b>9</b>	<b>Thermal Spring Cones of the Tihany Peninsula . . . . .</b>	<b>71</b>
	Márton Veress, Péter Gadányi, and Gábor Tóth	
<b>10</b>	<b>Kál Basin: Pseudokarren on Sandstone . . . . .</b>	<b>79</b>
	Márton Veress and Gábor Tóth	
<b>11</b>	<b>Granite Weathering in the Velence Hills . . . . .</b>	<b>89</b>
	Gábor Mezősi	
<b>12</b>	<b>The Somogybabod Gully: Hidden Erosion (Piping) in the Somogy Hills . . .</b>	<b>97</b>
	Gergely Jakab and Zoltán Szalai	

<b>13 Kapos Valley: The Most Asymmetrical in Hungary . . . . .</b>	<b>105</b>
Dénes Lóczy, Ervin Pirkhoffer, and Péter Gyenizse	
<b>14 Dunaszekcső Castle Hill: Landslides Along the Danubian Loess Bluff . . . .</b>	<b>113</b>
István Péter Kovács, Szabolcs Ákos Fábián, Bertalan Radvánszky, and Gábor Varga	
<b>15 Caves in the Buda Mountains . . . . .</b>	<b>121</b>
Szabolcs Leél-Őssy	
<b>16 Danube Bend: Miocene Half-Caldera and Pleistocene Gorge. . . . .</b>	<b>129</b>
Dávid Karátson	
<b>17 Anthropogenic Geomorphosites in the Karancs–Medves Region . . . . .</b>	<b>139</b>
Zoltán Karancsi, Gergely Horváth, László Sütő, and Gábor Csüllög	
<b>18 Rhyolite Badland at Kazár . . . . .</b>	<b>149</b>
Zoltán Pintér, Gergely Horváth, Gergely Jakab, and Zoltán Karancsi	
<b>19 The Vajdavár Hills: Sandstone Cliffs, Hoodoos and Gorges . . . . .</b>	<b>157</b>
Gergely Horváth, Zoltán Utasi, András Hegedűs, and Zoltán Pintér	
<b>20 Baradla-Domica: Large Cave System on the Hungarian-Slovak Border. . .</b>	<b>167</b>
Márton Veress and Zoltán Unger	
<b>21 Uppony Mountains: High Geomorphological Diversity Within a Small Area . . . . .</b>	<b>177</b>
Gábor Demeter and Katalin Szalai	
<b>22 Bükk Plateau: A Karst Landscape. . . . .</b>	<b>189</b>
László Sütő, Richard W. McIntosh, Attila Hevesi, and Márton Veress	
<b>23 Travertine Mound of Egerszalók: The Hungarian Pamukkale . . . . .</b>	<b>201</b>
Borbála Benkhard	
<b>24 Beehive Rocks in the Bükk Foothills: A Landscape Born in Fire. . . . .</b>	<b>209</b>
Csaba Baráz	
<b>25 Loess Features on Tokaj Hill. . . . .</b>	<b>219</b>
Attila Kerényi	
<b>26 Megyer Hill: Old Millstone Quarry . . . . .</b>	<b>227</b>
János Szepesi and Zsuzsanna Ésik	
<b>27 Hortobágy Puszta: Microtopography of Alkali Flats. . . . .</b>	<b>237</b>
Csaba Tóth, Tibor Novák, and János Rakonczai	
<b>28 The Crater Lake of Nagyhegyes . . . . .</b>	<b>247</b>
Dénes Lóczy, József Szabó, and Csaba Tóth	
<b>29 Lyukas Mound: One of the Many Prehistoric Tumuli in the Great Plain. . . . .</b>	<b>255</b>
Csaba Tóth, Katalin Joó, and Attila Barczy	

---

<b>30 Parabolic Dunes of the Southern Nyírség . . . . .</b>	<b>263</b>
Tímea Kiss and József Lóki	
<b>31 Mártély Lake: An Oxbow of the Lower Tisza River . . . . .</b>	<b>271</b>
Tímea Kiss and György Sipos	
 <b>Part III Geoheritage</b>	
<b>32 Geoheritage, Geoconservation, Geomorphosites in Hungary . . . . .</b>	<b>281</b>
Gergely Horváth and Dénes Lóczy	
<b>Index . . . . .</b>	<b>289</b>
