# Contents

## Part I Keynote

<b>1</b>	<b>Urban Landslides: Challenges for Forensic Engineering Geologists and Engineers. . . . .</b>	<b>3</b>
	S.F. Burns	
<b>2</b>	<b>Large-Scale Thematic Geological Mapping of Moscow Area . . . . .</b>	<b>11</b>
	Victor Osipov	
<b>3</b>	<b>Remote Sensing Role in Emergency Mapping for Disaster Response . . . . .</b>	<b>17</b>
	Piero Boccardo and Fabio Giulio Tonolo	
<b>4</b>	<b>Underground Urban Development: An Overview . . . . .</b>	<b>25</b>
	Eduardo F.J. De Mulder, C.C. Derk F. Van Ree and Kenny Wang	

## Part II Aggregates: The Most Widely Used Raw Material

<b>5</b>	<b>A Study of Fine Aggregate Properties and Their Effect on the Quality of Cementitious Composite Materials. . . . .</b>	<b>33</b>
	Revekka Fournari, Ioannis Ioannou and Dimitris Vatyliotis	
<b>6</b>	<b>Assessment of Concrete Aggregate for ASR Potential by Petrography. The Work Developed by RILEM TC-ACS (2007–2013) . . . . .</b>	<b>37</b>
	Isabel Fernandes, Maria dos Anjos Ribeiro, Helena Martins, Maarten Broekmans, Ian Sims, Philip Nixon and Fernando Noronha	
<b>7</b>	<b>Environmental Impact and Sustainability in Aggregate Production and Use. . . . .</b>	<b>41</b>
	S.W. Danielsen and E. Kuznetsova	
<b>8</b>	<b>Contrast Behavior of Sandstone from Mount Nemrut (Adiyaman-Turkey) After the Accelerated Weathering Tests. . . . .</b>	<b>45</b>
	Tamer Topal and Burcu Ertas Deniz	
<b>9</b>	<b>The ReAVA Project: Assessment of the Potential Alkali-Reactivity of Volcanic Aggregates from Azores Islands. . . . .</b>	<b>51</b>
	Sara Medeiros, João Carlos Nunes, Tetsuya Katayama, Isabel Fernandes, António Santos Silva, Vidália Miranda and Dora Soares	

<b>10</b>	<b>Potential Reactivity to Alkalis of Portuguese Volcanic Aggregates for Concrete. . . . .</b>	<b>55</b>
	Violeta Ramos, Isabel Fernandes, Fernando Noronha, Tetsuya Katayama, Dora Soares and António Santos Silva	
<b>11</b>	<b>Production of Lightweight Aggregates from Phosphate Washing Plant Sludge. . . . .</b>	<b>59</b>
	Emna Fakhfakh, Imen Khiari, Walid Hajjaji, Mounir Medhioub, Fernando Rocha, Alberto López-Galindo and Fakher Jamoussi	
<b>12</b>	<b>Some Variations in Petrography of South African Karoo Dolerites and the Effects Thereof on Aggregate Properties . . . . .</b>	<b>65</b>
	Robert Leyland	
<b>13</b>	<b>Environmental Issues Connected to the Quarry Lakes and Chance to Reuse Fine Materials Deriving from Aggregate Treatments. . . . .</b>	<b>71</b>
	Sara Castagna, Giovanna Antonella Dino, Manuela Lasagna and Domenico Antonio De Luca	
<b>14</b>	<b>The Aggregates from Tunnel Muck and their Use as Secondary Raw Material: The Case Study of Turin Underground. . . . .</b>	<b>75</b>
	Rossana Bellopede, David Colaiacomo, Paola Marini, Pierpaolo Oreste and Oscar Radis	
<b>15</b>	<b>Alkali Aggregate Reaction for Concrete Made with Tunnel Muck: Experimental Investigations. . . . .</b>	<b>81</b>
	Rossana Bellopede, Marco Francini, Paola Marini, Alessandra Migheli, Enrico Moretti and Pierpaolo Oreste	
<b>16</b>	<b>Mix Design Parameters of Restoration Mortars: The Effect of Aggregate Characteristics . . . . .</b>	<b>85</b>
	Maria Amenta, Ioannis Karatasios, Anna Kalagri, Pagona Maravelaki-Kalaitzaki and Vassilis Kilikoglou	
<b>17</b>	<b>Treatment and Exploitation of Waste Coming from Quarry Industries: Reuse as Aggregate . . . . .</b>	<b>89</b>
	Giovanna Antonella Dino and Massimo Marian	
<b>18</b>	<b>The Effect of Feldspar, Mica and Clay Minerals on Compressive Strength of Mortar . . . . .</b>	<b>93</b>
	Atiye Tugrul, Selahattin Hasdemir and Murat Yılmaz	
<b>19</b>	<b>Petrographic Examination of Mortar Bars of Swedish Aggregates Exposed to RILEM AAR2. . . . .</b>	<b>97</b>
	Karin Appelquist, Jan Trägårdh, Magnus Döse and Mattias Göransson	
<b>20</b>	<b>Risk Assessment of Swedish Concrete as a Construction Material in Relation to Naturally Occurring Radiation from Different Aggregates . . . . .</b>	<b>101</b>
	Magnus Döse	

<b>21</b>	<b>Aggregate Quality Mapping of Sustainable Substitutes for River Sand for Concrete Production in Eastern Botswana . . . . .</b>	<b>107</b>
	Mattias Göransson, Lena Persson, Vincent Lekula and Onkgopotse Ntibinyane	
<b>22</b>	<b>Influence of Geological Characteristics on Mechanical Properties of Crushed Stone Aggregates Produced from Meta-Volcanic Rocks in Finland. . . . .</b>	<b>111</b>
	Torppa Akseli and Seppo Leinonen	
<b>23</b>	<b>Los Angeles and Micro-Deval Values of Volcanic Rocks and Their Use as Aggregates, Examples from Hungary . . . . .</b>	<b>115</b>
	Ákos Török	
<b>24</b>	<b>Polished Stone Value of Volcanic Rocks Used as Aggregates: A Case Study from the Bohemian Massif, Czech Republic . . . . .</b>	<b>119</b>
	Kateřina Krutilová and Richard Přikryl	
 <b>Part III Analysis and Control of Ground Deformations by Remote Monitoring</b>		
<b>25</b>	<b>Land Subsidence Due to Deep Groundwater Withdrawal in Northern Yangtze River Delta Area . . . . .</b>	<b>125</b>
	Guang-ya Wang, Dan Zhang, Jin-shun Feng, Ming-zhu Chen and Wei-hua Shan	
<b>26</b>	<b>Observing Dam's Movements with Spaceborne SAR Interferometry . . . .</b>	<b>131</b>
	Milan Lazecký, Daniele Perissin, Wang Zhiying, Lei Ling and Qin Yuxiao	
<b>27</b>	<b>Deformation Monitoring Using Ground-Based SAR Data . . . . .</b>	<b>137</b>
	Michele Crosetto, Oriol Monserrat, Guido Luzi, María Cuevas and Núria Devanthery	
<b>28</b>	<b>Map and Monitoring Slow Ground Deformation in NW Italy Using PSI Techniques . . . . .</b>	<b>141</b>
	Davide Notti, Claudia Meisina, Francesco Zucca, Alessio Colombo and Luca Paro	
<b>29</b>	<b>Integrated Use of Advanced InSAR and GPS Data for Subsidence Monitoring . . . . .</b>	<b>147</b>
	G. Bitelli, F. Bonsignore, S. Del Conte, F. Novali, I. Pellegrino and L. Vittuari	
<b>30</b>	<b>Observation of Expansive Clay Movement with DInSAR . . . . .</b>	<b>151</b>
	M. Kurka and K.H. Gutjahr	
<b>31</b>	<b>Analysis of a Subsidence Process by Integrating Geological and Hydrogeological Modelling with Satellite InSAR Data . . . . .</b>	<b>155</b>
	Francesca Bozzano, Carlo Esposito, Stefania Franchi, Paolo Mazzanti, Daniele Perissin, Alfredo Rocca and Emanuele Romano	

<b>32</b>	<b>Satellite and Terrestrial Radar Interferometry for the Measurement of Slope Deformation . . . . .</b>	<b>161</b>
	Tazio Strozzi, Hugo Raetzo, Urs Wegmüller, Jessica Papke, Rafael Caduff, Charles Werner and Andreas Wiesmann	
<b>33</b>	<b>Satellite and Ground-Based Interferometric Radar Observations of an Active Rockslide in Northern Norway . . . . .</b>	<b>167</b>
	H.Ø. Eriksen, T.R. Lauknes, Y. Larsen, J.F. Dehls, T. Grydeland and H. Bunkholt	
<b>34</b>	<b>The Ligosullo (UD, Italy) Landslide, Revisiting of Past Data and Prospects from Monitoring Activities. . . . .</b>	<b>171</b>
	Luca Gandolfo, Alessandro Brunetti, Francesca Bozzano, Antonio Bratus, Enrico Busnardo, Mario Floris, Rinaldo Genevois, Paolo Mazzanti and Federico Saporito	
<b>35</b>	<b>Advanced Characterization of a Landslide-Prone Area by Satellite a-DInSAR. . . . .</b>	<b>177</b>
	Alfredo Rocca, Paolo Mazzanti, Francesca Bozzano and Daniele Perissin	
<b>36</b>	<b>Integration of Geotechnical and Remote Monitoring Systems for the Analysis and Control of Ground Deformation in Marble Quarrying (Apuan Alps, Italy). . . . .</b>	<b>183</b>
	Riccardo Salvini, Claudio Vanneschi, Domenico Gulli, Federico Forchione, Silvia Riccucci and Mirko Francioni	
<b>37</b>	<b>Terrestrial SAR Interferometry Monitoring of Natural Slopes and Man-Made Structures. . . . .</b>	<b>189</b>
	Paolo Mazzanti, Francesca Bozzano, Alessandro Brunetti, Carlo Esposito, Salvatore Martino, Alberto Prestininzi, Alfredo Rocca and Gabriele Scarascia Mugnozza	
<b>38</b>	<b>Monitoring Swelling Soils in Eastern Paris (France) Through DinSAR and PSI Interferometry: A Synthesis . . . . .</b>	<b>195</b>
	B. Deffontaines, F. Kaveh, B. Fruneau, A. Arnaud and J. Duro	
 <b>Part IV Building Stones &amp; Ornamental Rocks—Resource Evaluation, Technical Assessment, Heritage Designation</b>		
<b>39</b>	<b>A Global Heritage Stone Province in Association with the UNESCO World Heritage City of Salamanca, Spain . . . . .</b>	<b>205</b>
	Dolores Pereira and Barry Cooper	
<b>40</b>	<b>Characterization of the Natural Variability of Macael Serpentine (Verde Macael) (Almería, South of Spain) for Their Appropriate Use in the Building Industry . . . . .</b>	<b>209</b>
	Rafael Navarro, Dolores Pereira, Ana Gimeno and Santiago del Barrio	
<b>41</b>	<b>Some Examples of Heritage Stones from Australia . . . . .</b>	<b>213</b>
	Barry Cooper	

<b>42</b>	<b>Granites from South West England: A Global Heritage Stone Resource</b> . . . . .	<b>219</b>
	Marker Brian	
<b>43</b>	<b>The Karst Region of Slovenia: A Potential Global Heritage Stone Province</b> . . . . .	<b>223</b>
	Sabina Kramar, Breda Mirtič, Ana Mladenović, Mojca Bedjanič, Boštjan Rožič and Andrej Šmuc	
<b>44</b>	<b>The Natural Stone in the Historic Buildings of the City of Granada (Southern Spain). Features as a Possible Candidate for the Designation of “Global Heritage Stone Province”</b> . . . . .	<b>229</b>
	Rafael Navarro, Josefina Sánchez-Valverde and José Manuel Baltuille	
<b>45</b>	<b>Petrographic, Physical–Mechanical and Radiological Characterisation of the <i>Rosa Beta</i> Granite (Corsica-Sardinia Batholith)</b> . . . . .	<b>233</b>
	S. Cuccuru and A. Puccini	
<b>46</b>	<b>Changes in Marble Quality After Sodium Sulphate Crystallization and Long-Lasting Freeze-Thaw Testing</b> . . . . .	<b>237</b>
	Tatiana Durmeková, Peter Ružička, Miroslav Hain and Mária Čaplovičová	
<b>47</b>	<b>Assessment of Potential Natural Stone Deposits</b> . . . . .	<b>243</b>
	Hannu Luodes, Heikki Sutinen, Paavo Härmä, Heikki Pirinen and Olavi Selonen	
<b>48</b>	<b>P-T-XCO<sub>2</sub> Pseudosection Modelling of Talc-Magnesite Soapstone</b> . . . . .	<b>247</b>
	Seppo Leinonen	
<b>49</b>	<b>Adnet ‘Marble’, Untersberg ‘Marble’ and Leitha Limestone—Best Examples Expressing Austria’s Physical Cultural Heritage</b> . . . . .	<b>253</b>
	Beatrix Moshhammer, Christian Uhler, Andreas Rohatsch and Michael Unterwurzacher	
<b>50</b>	<b>The Wiborg Granite Batholith—The Main Production Area for Granite in Finland</b> . . . . .	<b>259</b>
	Paavo Härmä, Olavi Selonen and Hannu Luodes	
<b>51</b>	<b>Methods for Evaluating the Natural Stone Weathering Condition in Selected Historical Buildings Within the Project “Efficient Use of Natural Stone in the Leningrad Region and South–East Finland”</b> . . . . .	<b>263</b>
	Nike Luodes, Hannu Luodes, Heikki Pirinen, Paavo Härmä, Heikki Sutinen, Aleksei Shkurin and Claudio De Regibus	
<b>52</b>	<b>Granites of the Verbano-Cusio-Ossola District (Piedmont, Northern Italy): Possible Candidates for the Designation of “Global Heritage Stone Province” and a Proposal of a Geotouristic Route</b> . . . . .	<b>267</b>
	Alessandro Cavallo and Giovanna Antonella Dino	

<b>53</b>	<b>Building Stone Evaluation Applied to Weathered Granites—The Example of <i>Amarelo Real</i> Granite (Northern Portugal)</b> . . . . .	273
	LMO Sousa and JMM Lourenço	
<b>54</b>	<b>Production of Granitic Press Rollers in Finland</b> . . . . .	279
	Arto Peltola, Olavi Selonen and Paavo Härmä	
<b>55</b>	<b>The Uses of Natural Stone in the Building of Canberra, Australia's National Capital City</b> . . . . .	283
	Wolf Mayer	
<b>56</b>	<b>Fire on the Rocks: Heat as an Agent in Ancient Egyptian Hard Stone Quarrying</b> . . . . .	291
	Tom Heldal and Per Storemyr	
<b>57</b>	<b>Environmental Background in Apricena Quarries (Apulia, Southern Italy)</b> . . . . .	297
	Alessandro Reina and Maristella Loi	
<b>58</b>	<b>Size Effect in Flexural Strength Test on Dimension Stones</b> . . . . .	303
	Rossana Bellopede, Paola Marini and Lorenzo Collaro	
<b>59</b>	<b>CE-Marking of Natural Stone—Practical Application and Solutions in Sweden</b> . . . . .	309
	Linus Brander and Björn Schouenborg	
<b>60</b>	<b>Hierarchical Approaches Toward Safeguarding Heritage Building Stone Resources in England and Wales</b> . . . . .	313
	Ian A. Thomas and Barry J. Cooper	
<b>61</b>	<b>The Relation Between the Petrographic, Physico-Mechanical Properties and the Use of Some Deposit Paving in Algeria</b> . . . . .	319
	Chentout Malika, B. Alloul and D.J. Belhai	

## **Part V Communicating Engineering Geology with Urban Planners**

<b>62</b>	<b>Geohazard Studies for Urban Planning in the Santiago Metropolitan Region, Chile: Some Lessons for Future Interactions Between Engineering Geoscientists and Urban Planners in Developing Countries</b> . . . . .	327
	Sergio A. Sepúlveda, Sofía Rebolledo, Ximena Bórquez, Joel Prieto and Juan A. Muñoz	
<b>63</b>	<b>A Decision Support System Suggestion for the Optimum Railway Route Selection</b> . . . . .	331
	C. Gokceoglu, H.A. Nefeslioglu and N. Tanyildiz	
<b>64</b>	<b>Communication of Geological Information in Planning of Urban Areas</b> . . . . .	335
	Marker Brian	

<b>65</b>	<b>The Use of a Spatial Multi—Criteria Technique for Urban Suitability Assessment, Due to Extensive Mass Movements. The Case Study of Vitala Village, Kimi, Euboea, Greece . . . . .</b>	<b>339</b>
	P. Tsangaratos, D. Rozos, I. Ilia and K. Markantonis	
<b>66</b>	<b>Communicating Applied Geoscientific Expertise to Rural and Urban Planners: Some Lessons Learned . . . . .</b>	<b>345</b>
	Eduardo F.J. De Mulder	
<b>67</b>	<b>Urban Engineering Geological Maps for Bradford, UK . . . . .</b>	<b>351</b>
	M.G. Culshaw and K.J. Northmore	
<b>68</b>	<b>The COMCOM Process: Informing and Transforming Communities in the Developing World Through Geotechnical Information. . . . .</b>	<b>355</b>
	Lionel E. Jackson Jr., Mike Ellerbeck and Fernando Munoz Carmona	
<b>69</b>	<b>3D Mapping of Geological Base Data and Its Utilization for Urban Planning in Straubing, Germany . . . . .</b>	<b>359</b>
	Silvia Beer, Gerhard Lehrberger and Kurosch Thuro	
 <b>Part VI Complexity in Hazard and Risk Assessment</b>		
<b>70</b>	<b>Geotechnical Basis for Building Instability and Failure: Case Study from Lagos, Nigeria . . . . .</b>	<b>365</b>
	Ibrahim Adewuyi Oyediran and Julius Omotayo Famakinwa	
<b>71</b>	<b>Applying the Disruption Index Procedure to Evaluate the Urban Seismic Risk in the Mt. Etna Area (Italy). . . . .</b>	<b>371</b>
	G. Zonno, R. Azzaro, F. Meroni, S. D’Amico, T. Tuvè, M.A. Ferreira, F. Mota de Sá, C.S. Oliveira, C. Brambilla, R. Rotondi and E. Varini	
<b>72</b>	<b>Environmental Impact Assessment of Geological Processes in Russia. . . . .</b>	<b>375</b>
	Kharkina Marina, Barykina Olga and Shanina Viyaleta	
<b>73</b>	<b>Complexity in Seismic Risk Assessment at Different Levels with GIS Technology Application. . . . .</b>	<b>381</b>
	Nina Frolova, Jean Bonnin, Valery Larionov and Aleksander Ugarov	
<b>74</b>	<b>Landslide Susceptibility of the La Catola Torrent Catchment Area (Daunia Apennines, Southern Italy): A New Complex Multi-step Approach . . . . .</b>	<b>387</b>
	Gioacchino Francesco Andriani, Giuseppe Diprizio and Vito Pellegrini	
<b>75</b>	<b>Microzonation of Gölbaşı Special Environmental Protection Area with Respect to Geoenvironmental Criteria . . . . .</b>	<b>393</b>
	Şule Tüdeş, Derya Polatkan and Kadriye Burcu Yavuz	
<b>76</b>	<b>The Role of Rockfall Protection Barriers in the Context of Risk Mitigation: The Case of the Autonomous Province of Bolzano . . . . .</b>	<b>397</b>
	Govoni Laura and Claudia Strada	

<b>77</b>	<b>Integrated Study of Landslides in the Southern Apennines (Val d'Agri: Basilicata Region) Using a Multidisciplinary Approach . . . .</b>	<b>401</b>
	Summa Vito, Colaiacono Rosy, Giannossi Maria Luigia and Margiotto Salvatore	
<b>78</b>	<b>Master Plan of Hazard Assessment in Ijen Volcano Complex . . . . .</b>	<b>405</b>
	Ade Triyunita, Shaskia Herida Putri and Dicky Muslim	
<b>79</b>	<b>Sinkholes Susceptibility Assessment in Urban Environment Using Heuristic, Statistical and Artificial Neural Network (ANN) Models in Evaporite Karst System: A Case Study from Lesina Marina (Southern Italy) . . . . .</b>	<b>411</b>
	Annachiara D'Angella, Filomena Canora and Giuseppe Spilotro	
<b>80</b>	<b>Geomorphological Complexity in Landslide Susceptibility Modelling . . . .</b>	<b>415</b>
	Giuseppe Spilotro and Roberta Pellicani	
<b>81</b>	<b>Analysis of Interaction Between Waves and Cliff Along the Adriatic Coast of Polignano (Apulia, Italy) . . . . .</b>	<b>421</b>
	Giuseppe Spilotro, Roberta Pellicani, Daniela Miccoli and Filomena Canora	
<b>82</b>	<b>Hazard of Karstic Sinkhole Formation in an Area South of Pretoria, South Africa . . . . .</b>	<b>427</b>
	Anna Catharina Oosthuizen	

## **Part VII Engineering Geology in Rural Infrastructure Planning**

<b>83</b>	<b>Review of Soil Degradation in the Region of Nazareno, Minas Gerais: Brazil . . . . .</b>	<b>433</b>
	L.F. Sampaio, M.P.P. Oliveira, V.G.S. Rodrigues and O.J. Pejon	
<b>84</b>	<b>Subsidence of Buried Soils in Cyclic Loess Sequences of the Northern Eurasia . . . . .</b>	<b>439</b>
	V.T. Trofimov, S.D. Balykova, T.V. Andreeva and A.V. Ershova	
<b>85</b>	<b>An Overview of Engineering Geology and Sustainable Rural Infrastructure Development . . . . .</b>	<b>443</b>
	Jasper Cook, Gareth Hearn, Phil Paige-Green and Dominic Hagues	
<b>86</b>	<b>Changes in the Natural Drainage Channel System Due to Anthropogenic Land Uses: Itaqueri Region, State of São Paulo, Brazil . . . . .</b>	<b>447</b>
	Cláudia Marisse dos Santos Rotta and Lázaro Valentin Zuquette	

## **Part VIII Engineering Problems in Karst**

<b>87</b>	<b>Determination of Priorities and Importance of Some Geotechnical Factors in Grouting of Karst in Large Dam Sites with Decision Tree Model (CART). The Case Study of Salman Farsi Dam, Fars Province, Southern Iran . . . . .</b>	<b>453</b>
	Mehrdad Rahnemaei, Kouros Yazdjerdi and Farzan Faraz	

<b>88</b>	<b>Earthen Dike Leakage at the Dead Sea . . . . .</b>	<b>461</b>
	Damien Closson and Najib Abou Karaki	
<b>89</b>	<b>Mapping of Salt Consolidation and Permeability Using MASW Method in the Dead Sea Sinkhole Problem. . . . .</b>	<b>465</b>
	Michael Ezersky and Anatoly Legchenko	
<b>90</b>	<b>Subsurface Dams as a Solution for Supplementary Recharge and Groundwater Storage in Karst Aquifers in Arid Areas . . . . .</b>	<b>471</b>
	Zoran Stevanovic	
<b>91</b>	<b>Analysis of Condition of Underground Cavities, Odessa (Ukraine) . . . . .</b>	<b>475</b>
	Olena Dragomyretska, Oleksandr Dragomyretsky and Mikhail Skipa	
<b>92</b>	<b>Facing Engineering Problems in the Fragile Karst Environment . . . . .</b>	<b>479</b>
	Mario Parise, Damien Closson, Francisco Gutiérrez and Zoran Stevanovic	
<b>93</b>	<b>Geological and Geophysical Techniques for the Identification of Subterranean Cavities . . . . .</b>	<b>483</b>
	Pietro Pepe, Vincenzo Martimucci and Mario Parise	
<b>94</b>	<b>Engineering Geological Characterization of the Antalya Karstic Rocks . . . . .</b>	<b>489</b>
	Sopaci Evrim and Akgün Haluk	
<b>95</b>	<b>Tectonics versus Karst Relationships in the Salento Peninsula (Apulia, Southern Italy): Implications for a Comprehensive Land-Use Planning . . . . .</b>	<b>493</b>
	Vincenzo Festa, Antonio Fiore, Maria Nilla Miccoli, Mario Parise and Luigi Spalluto	
<b>96</b>	<b>Problems with Caves During Tunneling in Dinaric Karst (Croatia) . . . . .</b>	<b>497</b>
	Mladen Garašić and Davor Garašić	
<b>97</b>	<b>Sinkholes and Land Use Regulation in South Africa . . . . .</b>	<b>503</b>
	G.J. Heath and S. Constantinou	
<b>98</b>	<b>Geophysical Investigation to Delineate Hazardous Cavities in Al-Hassa Karstic Region, Kingdom of Saudi Arabia . . . . .</b>	<b>507</b>
	Tareq Abdallatif, Abdel-Samad A.B. Khafagy and Ashraf Khozym	
<b>99</b>	<b>Environmental Aspects of Proposed Engineering Solution for Inter-basin Transfer in East Herzegovina . . . . .</b>	<b>515</b>
	Marina Cokorilo, Zoran Stevanovic and Vesna Ristic Vakanjac	
<b>100</b>	<b>General Engineering-Geological Principles of Karst Risk Assessment . . .</b>	<b>521</b>
	Victor Khomenko, Alexander Potapov and Vladimir Tolmachev	
<b>101</b>	<b>Assessing Karst Hazards for a Nuclear Power Plant Site, Southern Appalachian Mountains, U.S.A.. . . . .</b>	<b>525</b>
	J.M. Sowers, J.S. Hoeft, D.F. Fenster, W.H. Godwin and R. Cutsinger	

<b>102</b>	<b>Current Status and Strategic Planning of Sinkhole Collapses in China</b> . . . . .	529
	Mingtang Lei, Yongli Gao and Xiaozhen Jiang	
<b>103</b>	<b>Validation of Rated Sinkhole Span for Building in Covered Karst Areas.</b> . . . .	535
	Stanislav Makhnatov and Mikhail Utkin	
<b>104</b>	<b>Potential Karst Collapse Assessment Along a Bridge Foundation of High-Speed Rail, Anshan, China</b> . . . . .	539
	Xiaozhen Jiang, Mingtang Lei and Yongli Gao	
<b>105</b>	<b>Uncertainties in the Application of Rock Mass Classification and Geomechanical Models for Engineering Design in Carbonate Rocks</b> . . . . .	545
	Gioacchino Francesco Andriani, Mario Parise and Giuseppe Diprizio	
<b>106</b>	<b>Karst Remediation in the Variant to the National Road 9 Between Cascais and Abuxarda, Portugal</b> . . . . .	549
	Bernardo P.B. Monteiro, João Azevedo, Isabel Caspurro and Paulo Durão	
<b>107</b>	<b>Sinkhole Field Above Karst Caves: Detection and Analysis Through Integrated Techniques.</b> . . . .	553
	Stefano Margiotta, Sergio Negri, Mario Parise and Tatiana A.M. Quarta	
<b>108</b>	<b>Evaluating the Potentialities of Hydro-stratigraphic, Geomorphological and Geophysical Analyses to Detect Underground Cavities.</b> . . . .	559
	Stefano Margiotta, Sergio Negri, Mario Parise and Tatiana A.M. Quarta	
<b>109</b>	<b>With the Rich Experience Gained in the Construction of Motorways We are Planning the Course of the 5th European Railway Corridor Crossing the Classical Karst (Slovenia)</b> . . . . .	563
	Martin Knez, Mitja Prelovšek and Tadej Slabe	
<b>110</b>	<b>Experience of Quantitative Assessment of Karst Risk in Russia.</b> . . . .	567
	Vladimir Yolkin	
<b>111</b>	<b>Study on Groundwater System Effect of Tunnel Drainage Control in Karst Valley.</b> . . . .	571
	Xiaoguang Jin, Yayong Li, Hongwei Liu and Yuan Jin	
<b>112</b>	<b>Safeguarding of Assets Roads and Protection of Land in the Valley of Acquaresi. Deepening and Widening of the Studies the Area Subject to Risk Sinkhole. Proposal for Monitoring. (Italy: Sardinia)</b> . . . .	577
	Mureddu Alessio and Corda Angelo Salvatore	
<b>113</b>	<b>Challenges of Renewable Energy Source Utilisation at Section of Future Highway E-763 Belgrade-Southern Adriatic Across Karst Plateau of Pešter Plateau (Western Serbia)</b> . . . . .	581
	Milenic Dejan, Stevanovic Zoran, Dragisic Veselin, Vranjes Ana and Savic Nevena	

<b>114</b>	<b>Some Considerations on 3-D and 2-D Numerical Models for the Assessment of the Stability of Underground Caves</b> . . . . .	<b>585</b>
	Lollino Piernicola, Parise Mario and Vattano Marco	
<b>115</b>	<b>Speleological and Hydrogeological Factors of Urbanization and Development of Road Network on Mountain Zlatibor (Western Serbia)</b> . . . . .	<b>589</b>
	Milenic Dejan, Djuro Milankovic, Nenad Doroslovac, Bojan Doncevic and Marina Jovanovic	
<b>116</b>	<b>Engineering Problems in Karst: Three Case History.</b> . . . .	<b>595</b>
	Vigna Bartolomeo and Marchionatti Federico	
<b>117</b>	<b>Karst Risk Assessment for Underground Engineering: Comparison of the KarstALEA Method with a Random Karst Distribution Approach.</b> . . . .	<b>603</b>
	Marco Filipponi	
<b>118</b>	<b>The Role of Tectonic Structures and Density-Driven Groundwater Flow for Salt Karst Formation</b> . . . . .	<b>609</b>
	Peter Huggenberger, Ali Zidane, Eric Zechner and Daniel Gechter	
<b>Part IX Excavation in Potentially Asbestos-Bearing Rocks: Methodologies for Risk Evaluation and Safety Management</b>		
<b>119</b>	<b>Asbestiform Amphiboles in a Serpentine Quarry in Operation, Province of Córdoba, Argentina</b> . . . . .	<b>615</b>
	L. Lescano, A. Bonalumi, P. Maiza, J. Sfragulla and S. Marfil	
<b>120</b>	<b>Geological and Analytical Procedures for the Evaluation of Asbestos-Related Risk in Underground and Surface Rock Excavation.</b> . . . .	<b>619</b>
	Francesco Turci, Roberto Compagnoni, Fabrizio Piana, Luca Delle Piane, Maura Tomatis, Bice Fubini, Sergio Tallone, Stefano Fuoco and Massimo Bergamini	
<b>121</b>	<b>The Asbestos Risk in Meta-Ophiolitic Rocks: A Protocol for Preliminary Field and Laboratory Investigations During Geological Mapping</b> . . . . .	<b>623</b>
	Marescotti Pietro, Crispini Laura, Poggi Eugenio, Capponi Giovanni and Solimano Monica	
<b>122</b>	<b>Geological Characterization of Potentially Asbestos-Bearing Rocks for the Project “Hydraulic and Structural Works for Embankment of the Varenna Stream, Genoa Pegli”</b> . . . . .	<b>627</b>
	Sara Bini and Giorgio Grassano	

## **Part X Experiences and Potentialities of Data-Driven Modeling in Earth Science Issues**

- 123 Variational Data Assimilation with TELEMAC. Proof of Concept for Model State Correction on the Berre Lagoon 3D-Model . . . . .** 633  
S. Ricci, A. Piacentini, A. Weaver, R. Ata and Nicole Goutal
- 124 Developing an Adequate Approach to Model the Geotechnical Parameters for Reducing the Ventures of Underground City Development . . . . .** 639  
Mei Dong, Christoph Neukum, Hui Hu and Rafiq Azzam
- 125 Calculation of Water Retention Curves of Rock Samples by Differential Evolution . . . . .** 643  
Maria C. Caputo, Sabino Maggi and Antonietta C. Turturro
- 126 Data Mining and Data-Driven Modelling in Engineering Geology Applications. . . . .** 647  
Angelo Doglioni, Annalisa Galeandro and Vincenzo Simeone
- 127 Predicting Landslide Displacements by Multi-objective Evolutionary Polynomial Regression . . . . .** 651  
Angelo Doglioni, Giovanni B. Crosta, Paolo Frattini, Nicola L. Melidoro and Vincenzo Simeone
- 128 Data-Driven Analysis of Discharge Variations at Mercure Spring South Italy . . . . .** 655  
Salvatore Grimaldi, Giuseppina Cristino, Angelo Doglioni, Gianpietro Summa and Vincenzo Simeone

## **Part XI Geohazard in Urban Scenarios: Forecasting and Protective Monitoring**

- 129 Landslide Processes of Active Phase of under Conditions of Technogenesis with the Example of Pridneprovsk Industrial Region of Ukraine. . . . .** 663  
T.P. Mokritskaya and V.M. Shestopalov
- 130 Discussion on Geological Hazards Caused by Exploitation of Deep Groundwater in North China . . . . .** 667  
Xiuyan Wang and Lin Sun
- 131 Assessment of Geo-hazards Triggered by both Natural Events and Human Activities in Rapidly Urbanized Areas. . . . .** 675  
A. Kaitantzian, C. Loupasakis and D. Rozos
- 132 Pre-identification of Staging Areas for Probable Earthquake of Tehran (Municipality No.5) Using OWA Method . . . . .** 681  
Bahram Mohaghegh, Fatemeh Mahshadnia and Shabnam Aghnianejad

U. de S. Jayawardena and H.M.L. Indratilaka	
<b>244 Asbestiform Amphiboles in a Marble Quarry: A Case Study from the Province of Córdoba (Argentina). . . . .</b>	<b>1281</b>
Francisco Locati, Leticia Lescano, Juan Murra, Silvina Marfil, Pedro Maiza and Edgardo Baldo	
<b>245 An Experimental Study for Evaluating the Disintegration Behavior of Clay-Bearing Rocks under Field Conditions . . . . .</b>	<b>1285</b>
Tej P. Gautam and Abdul Shakoor	
<b>246 Methods to Increase Effectiveness of Injective Chemical Stabilisation of Loess Soils . . . . .</b>	<b>1289</b>
Abramova Tamara and Larionova Nina	
<b>247 Experimental Study on Rock Deterioration by Repetition of Freezing and Thawing, and by Repetition of Dry and Wet in Cold Region . . . . .</b>	<b>1293</b>
Yoshihiko Ito, Yuki Kusakabe and Shuji Anan	
<b>248 The Pinhole Test for Dispersive Soil Identification . . . . .</b>	<b>1299</b>
Amrita Maharaj and Philip Paige-Green	
<b>249 Dust from Mineral Extraction: Regulation of Emissions in England . . . .</b>	<b>1305</b>
Marker Brian	
<b>250 Industrial Chance to Recover Residual Sludge from Dimension Stones in Civil and Environmental Applications . . . . .</b>	<b>1309</b>
Giovanna Antonella Dino, Paolo Clemente, Manuela Lasagna, Iride Passarella, Franco Ajmone Marsan and Domenico Antonio De Luca	

<b>251</b>	<b>The District Tourism Lake of Castel Volturno: An Example of Territorial Requalification of Abandoned Quarries . . . . .</b>	<b>1315</b>
	Marina Maura Calandrelli and Roberto Calandrelli	
<b>252</b>	<b>The Effect of Temperature and Moisture Content on the Behaviour of Pyritic Fill: Development of an In Situ Monitoring System . . . . .</b>	<b>1321</b>
	Amy J. Taylor, John C. Cripps and Samuel D Clarke	
<b>253</b>	<b>Investigations into the Self-Healing of Desiccation Cracks in Compacted Clays . . . . .</b>	<b>1327</b>
	John C. Cripps and Krishna K. Parmar	
<b>254</b>	<b>Study of Moisture and Cement Rates Influence on Hydraulic Conductivity of a Stabilized Sandy Soil by Means of a Factorial Design of Experiments . . . . .</b>	<b>1333</b>
	F.C. Loch and O.J. Pejon	
<b>255</b>	<b>Weathering of Pyritic Clay in the Vicinity of Concrete Undergoing Thauasite Sulphate Attack . . . . .</b>	<b>1337</b>
	J.C. Cripps, F. Abubaker, C.J. Lynsdale and A.J. Taylor	
<b>256</b>	<b>An Investigation of Noise Effects on Natural Heritage and Historic Building Materials . . . . .</b>	<b>1343</b>
	Adil Binal	

## **Part XXII Aquifer Vulnerability and Springs/Wells Protection Zones**

<b>257</b>	<b>Wellfields under Heavy Urban Pressure—Monitoring, Simulation, Maintenance . . . . .</b>	<b>1349</b>
	Algirdas Klimas and Marius Gregorauskas	
<b>258</b>	<b>Groundwater Protection for Human Consumption and Its Integration in Regional Planning: Gpz Method . . . . .</b>	<b>1353</b>
	A. Jiménez-Madrid, C. Martinez and F. Carrasco	
<b>259</b>	<b>Vulnerability of Mountain Springs Affect by Climatic Change: A New Method in a Porous Media Aquifer in Regione Automa Valle d'Aosta . . . . .</b>	<b>1357</b>
	Gianpiero Amanzio, Enrico Suozzi and Marina De Maio	
<b>260</b>	<b>Natural Occurrence of Sulphates in Ground and Surface Waters in Aosta Plain (Italy) . . . . .</b>	<b>1361</b>
	Marina De Maio, Laura Pia Lodi and Enrico Suozzi	
<b>261</b>	<b>Hydrochemistry Applied to Water Supply System: A Case Study from a Brazilian Urban Area . . . . .</b>	<b>1365</b>
	Sandra Gabas Garcia, Giancarlo Lastoria and Cavazanna Guilherme Henrique	

<b>262</b>	<b>Effects of Peri-Urban Occupation in the Recharge Area of the Guarani Aquifer in São Carlos, São Paulo, Brazil . . . . .</b>	<b>1369</b>
	Geisy Candido da Silva, Denise Balestrero Menezes and Marcilene Dantas Ferreira	
<b>263</b>	<b>Global Warming in the Alps: Vulnerability and Climatic Dependency of Alpine Springs in Italy, Regione Valle d'Aosta and Switzerland, Canton Valais. . . . .</b>	<b>1375</b>
	Gianpiero Amanzio, Davide Bertolo, Marina de Maio, Laura Pia Lodi, Luca Pitet and Enrico Suozzi	
<b>264</b>	<b>The Importance of Monitoring for the Determination of Aquifer Vulnerability and Spring Protection Areas. . . . .</b>	<b>1379</b>
	C. Banzato, M. Governa, M. Petricig and B. Vigna	
<b>265</b>	<b>Vulnerability Assessment of Mazzoccolo Spring Aquifer (Central Italy), Combined with Geo-Chemical and Isotope Modeling. . . .</b>	<b>1387</b>
	Giuseppe Sappa, Sibel Ergul and Flavia Ferranti	
	<b>Author Index . . . . .</b>	<b>1393</b>

Engineering Geology for Society and Territory - Volume  
5

Urban Geology, Sustainable Planning and Landscape  
Exploitation

Lollino, G.; Manconi, A.; Guzzetti, F.; Culshaw, M.;  
Bobrowsky, P.T.; Luino, F. (Eds.)

2015, XXXV, 1400 p. 748 illus., 616 illus. in color. In 2  
volumes, not available separately., Hardcover

ISBN: 978-3-319-09047-4
