

Contents

Part I Markets, Regulation, and Model Risk

A Random Holding Period Approach for Liquidity-Inclusive Risk Management	3
Damiano Brigo and Claudio Nordio	
Regulatory Developments in Risk Management: Restoring Confidence in Internal Models	19
Uwe Gaumert and Michael Kemmer	
Model Risk in Incomplete Markets with Jumps	39
Nils Detering and Natalie Packham	

Part II Financial Engineering

Bid-Ask Spread for Exotic Options under Conic Finance	59
Florence Guillaume and Wim Schoutens	
Derivative Pricing under the Possibility of Long Memory in the supOU Stochastic Volatility Model	75
Robert Stelzer and Jovana Zavišin	
A Two-Sided BNS Model for Multicurrency FX Markets	93
Karl Friedrich Bannör, Matthias Scherer and Thorsten Schulz	
Modeling the Price of Natural Gas with Temperature and Oil Price as Exogenous Factors	109
Jan Müller, Guido Hirsch and Alfred Müller	

Copula-Specific Credit Portfolio Modeling	129
Matthias Fischer and Kevin Jakob	
Implied Recovery Rates—Auctions and Models.	147
Stephan Höcht, Matthias Kunze and Matthias Scherer	
Upside and Downside Risk Exposures of Currency Carry Trades via Tail Dependence	163
Matthew Ames, Gareth W. Peters, Guillaume Bagnarosa and Ioannis Kosmidis	
 Part III Insurance Risk and Asset Management	
Participating Life Insurance Contracts under Risk Based Solvency Frameworks: How to Increase Capital Efficiency by Product Design	185
Andreas Reuß, Jochen Ruß and Jochen Wieland	
Reducing Surrender Incentives Through Fee Structure in Variable Annuities.	209
Carole Bernard and Anne MacKay	
A Variational Approach for Mean-Variance-Optimal Deterministic Consumption and Investment	225
Marcus C. Christiansen	
Risk Control in Asset Management: Motives and Concepts	239
Thomas Dangel, Otto Randl and Josef Zechner	
Worst-Case Scenario Portfolio Optimization Given the Probability of a Crash	267
Olaf Menkens	
Improving Optimal Terminal Value Replicating Portfolios	289
Jan Natolski and Ralf Werner	
 Part IV Computational Methods for Risk Management	
Risk and Computation.	305
Rüdiger U. Seydel	

Extreme Value Importance Sampling for Rare Event Risk Measurement.	317
D.L. McLeish and Zhongxian Men	
A Note on the Numerical Evaluation of the Hartman–Watson Density and Distribution Function	337
German Bernhart and Jan-Frederik Mai	
Computation of Copulas by Fourier Methods	347
Antonios Papapantoleon	
 Part V Dependence Modelling	
Goodness-of-fit Tests for Archimedean Copulas in High Dimensions	357
Christian Hering and Marius Hofert	
Duality in Risk Aggregation.	375
Raphael Hauser, Sergey Shahverdyan and Paul Embrechts	
Some Consequences of the Markov Kernel Perspective of Copulas.	393
Wolfgang Trutschnig and Juan Fernández Sánchez	
Copula Representations for Invariant Dependence Functions.	411
Jayme Pinto and Nikolai Kolev	
Nonparametric Copula Density Estimation Using a Petrov–Galerkin Projection	423
Dana Uhlig and Roman Unger
