Part I Plate Kinematics

1	Composition of the Crust and the Mantle	3
1.1	Crust and Mantle Minerals	3
1.2	Continental Crust	4
1.3	Oceanic Crust	7
1.4	Lithospheric Mantle	14
1.5	Asthenosphere	16
1.6	Transition Zone	20
1.7	Lower Mantle	22
	Problems	25
	References	25
2	Plate Motions	29
2.1	The Continuum Mechanics Representation	29
2.2	Euler's Theorem and Rigid Rotations	30
2.3	Reference Frames	34
2.4	Plate Boundaries	36
2.5	Triple Junctions	45
2.6	Tectonic Elements	49
2.7	Plate Circuits and Rotation Models	54
2.8	Plate Tectonic Reconstructions	59
2.9	Current Plate Motions	69
	Problems	77
	References	78
3	Magnetization and Magnetic Minerals	81
3.1	Electric Currents	81
3.2	Magnetic Moments	83
3.3	Maxwell's Equations for the Magnetic Field	85
3.4	Magnetization	87
3.5	Magnetic Properties of Rocks	92
	Problems	101
	References	101
4	The Geomagnetic Field	103
4.1	Source of the Main Geomagnetic Field	103
4.2	The Geodynamo	107

4.3	Secular Variation of the Core Field	112
4.4	Polarity Inversions, Chrons, and Geomagnetic Timescales	115
4.5	Ionosphere and Magnetosphere	118
4.6	Crustal Magnetic Field	123
4.7	The Geomagnetic Potential	126
4.8	Spherical Harmonic Expansion of the Geomagnetic Field and the IGRF	130
	Problems	140
	References	140
5	Marine Magnetic Anomalies	143
5.1	Magnetic Anomalies	143
5.2	Acquisition and Pre-processing of Raw Magnetic Data	145
5.3	Levelling Techniques	148
5.4	Modelling of Marine Magnetic Anomalies	149
5.5	Forward Modelling Procedures	157
5.6	Construction of Isochron Maps	164
5.7	Determining Finite Rotations	168
5.8	Data Transformations	170
	Problems	175
	References	176
6	Paleomagnetism and Earth History	177
6.1	Néel's Theory of Single-Domain TRM	177
6.2	Paleomagnetic Sampling and Cleaning Procedures	182
6.3	Paleomagnetic Directions	185
6.4	Paleopoles and Apparent Polar Wander Paths	188
6.5	Paleomagnetic Reference Frames	199
6.6	True Polar Wander	203
6.7	Velocity Fields and Acceleration Fields During the Cenozoic and the Mesozoic	205
6.8	Non-dipole Paleomagnetic Fields	217
	Problems	221
	References	221

Part II Dynamics of the Lithosphere and the Mantle

7	Stress and Strain	227
7.1	The Stress Tensor	227
7.2	Displacement Fields and Strain	232
7.3	Cauchy Momentum Equation	235
7.4	Basic Rheological Models and Constitutive Equations	237
	Problems	244
	References	244
8	Elasticity of the Earth	245
8.1	Hooke's Law	245
8.2	Equations of Motion for Elastic Media	246

8.3	Seismic Waves.....	247
8.4	Seismic Energy.....	253
	Problems.....	255
	References.....	255
9	Seismic Rays.....	257
9.1	The Eikonal Equation.....	257
9.2	Geometrical Spreading.....	259
9.3	Snell's Law.....	262
9.4	1-D Velocity Models.....	263
9.5	Travel Time Curves.....	268
9.6	Low-Velocity Zones.....	270
9.7	Seismic Phases Nomenclature.....	272
	Problems.....	278
	References.....	278
10	Earthquakes.....	279
10.1	Reid's Model.....	279
10.2	Faults and Focal Mechanisms.....	284
10.3	Moment Tensor.....	292
10.4	Earthquake Magnitude.....	297
10.5	Gutenberg-Richter Law.....	297
	Problems.....	298
	References.....	299
11	Seismic Deformation of the Lithosphere.....	301
11.1	Kostrov's Formula.....	301
11.2	The Asymmetric Strain Tensor.....	303
11.3	Global Pattern of Lithospheric Deformation.....	304
11.4	Bending of Slabs.....	306
	Problems.....	314
	References.....	315
12	Heat Flow and Thermodynamics of the Lithosphere.....	317
12.1	Fourier's Law.....	317
12.2	Continental Geotherms.....	320
12.3	Non-steady State Heat Conduction.....	323
12.4	Cooling of the Oceanic Lithosphere.....	326
12.5	Driving Mechanism of Plate Tectonics: Slab Pull and Ridge Push.....	332
	Problems.....	335
	References.....	336
13	Flow and Fluid Behaviour of the Mantle.....	337
13.1	Continuity Equation.....	337
13.2	Navier-Stokes Equations.....	339
13.3	Energy Balance.....	341
13.4	Flow in the Asthenosphere.....	344

13.5	Stream Functions and Two-Dimensional Flows	348
13.6	Rayleigh-Bénard Convection	354
	Problems	361
	References	361
14	Gravity Field of the Earth	363
14.1	Gravity Field and Geopotential	363
14.2	Spherical Harmonic Expansion of the Geopotential: The Geoid	364
14.3	Geoid and Ellipsoid	365
14.4	MacCullagh's Formula	370
14.5	Gravity Measurements and Reduction of Gravity Data . . .	372
14.6	Isostasy and Dynamic Topography	375
	Problems	377
	References	377
	Appendix 1: Vector Calculus	379
A1.1	Scalar Fields	379
A1.2	Vector Fields	379
A1.3	Integrals Theorems	382
A1.4	Spherical Coordinates	384
A1.5	Index Notation	385
	Appendix 2: Algorithms and Data Structures	387
A2.1	Algorithms	387
A2.2	Data Structures	388
A2.3	Trees	392
	Index	395

Quantitative Plate Tectonics

Physics of the Earth - Plate Kinematics - Geodynamics

Schettino, A.

2015, XIV, 403 p. 284 illus., 119 illus. in color. With
online files/update., Hardcover

ISBN: 978-3-319-09134-1
