

# Contents

<b>1</b>	<b>Overview of Climate Change Science</b>	<b>1</b>
1.1	Introduction	2
1.2	Weather and Climate	5
1.3	The Intergovernmental Panel on Climate Change	5
1.4	Representative Concentration Pathways	8
1.5	Radiative Forcing	9
1.6	Earth's Energy Imbalance and Energy Flow	10
1.7	Rising Temperature	12
1.8	Solar Irradiance	14
1.9	Carbon Dioxide's Role in the Greenhouse Effect	15
1.10	Carbon Dioxide and Carbon	16
1.10.1	The Enhanced Greenhouse Effect	18
1.10.2	Climate Sensitivity	18
1.10.3	Carbon Capture and Sequestration	19
1.10.4	Tipping Points	20
1.11	Climate Forcing, and Climate Feedbacks	22
1.11.1	Climate Forcing	23
1.11.2	Climate Feedbacks	23
1.11.3	Charles David Keeling and the Keeling Curve	24
1.12	Climate Models	24
1.13	Earth's Atmosphere	26
1.14	Land Surface	27
1.15	The World Ocean	28
1.16	Ocean-Atmosphere Interface	28
1.17	Ocean Acidification	30
1.18	Land-Atmosphere Interface	32
1.19	Paleoclimates and Paleoclimatology	33
1.20	Rising Sea-Level	33
1.21	The Cryosphere and Melting Glaciers	35
1.21.1	Glaciers	36
1.21.2	Greenland Ice Sheet	36

1.22	More Violent Storms . . . . .	37
1.23	Deforestation . . . . .	38
1.24	Desertification . . . . .	38
1.25	Species Migration. . . . .	39
1.26	Species Extinctions . . . . .	39
1.27	Changing Seasons and Disruption of Life Cycles . . . . .	40
	References and Additional Reading . . . . .	40
<b>2</b>	<b>Status of Climate Change Research . . . . .</b>	<b>43</b>
2.1	Introduction . . . . .	43
2.2	Research in Weather and Climate . . . . .	44
2.3	The Intergovernmental Panel on Climate Change . . . . .	45
2.4	Representative Concentration Pathways . . . . .	45
2.5	Radiative Forcing . . . . .	46
2.5.1	Research in Radiative Forcing . . . . .	46
2.6	Earth's Energy Imbalance and Energy Flow . . . . .	47
2.6.1	Research into Earth's Energy Imbalance and Energy Flow . . . . .	47
2.7	Earth's Rising Temperatures . . . . .	48
2.7.1	Current and Recent Research . . . . .	49
2.7.2	The BEST Study . . . . .	50
2.7.3	The Global Historical Climatology Network. . . . .	51
2.7.4	National Climatic Data Center. . . . .	51
2.7.5	The Climate Research Unit at the University of East Anglia, U.K. . . . .	52
2.7.6	The "Hockey Stick" . . . . .	52
2.8	Solar Irradiance . . . . .	53
2.8.1	Research in Solar Irradiance . . . . .	53
2.9	Carbon Dioxide's Role in the Greenhouse Effect . . . . .	54
2.9.1	Research in Carbon Dioxide and Other Greenhouse Gases . . . . .	54
2.10	Carbon Dioxide and Carbon. . . . .	57
2.10.1	The Carbon Cycle . . . . .	57
2.10.2	Current and Recent Research on Carbon . . . . .	57
2.10.3	The Enhanced Greenhouse Effect . . . . .	59
2.10.4	Climate Sensitivity Research . . . . .	59
2.10.5	Carbon Capture and Sequestration or Carbon Capture and Storage. . . . .	61
2.10.6	Tipping Points . . . . .	62
2.11	Climate Forcing and Climate Feedbacks . . . . .	62
2.11.1	Research into Climate Forcing and Climate Feedbacks . . .	63
2.12	Climate Models . . . . .	63
2.12.1	Current and Recent Research. . . . .	64
2.13	Earth's Atmosphere . . . . .	66
2.14	Earth's Land Surface . . . . .	67

2.15	The World Ocean . . . . .	68
2.16	Atmosphere-Land Surface-Ocean Interfaces . . . . .	68
2.16.1	Current and Recent Research . . . . .	68
2.16.2	Ocean Acidification . . . . .	70
2.16.3	Ocean Acidification Research . . . . .	70
2.16.4	The “Pause” in Surface Temperature . . . . .	71
2.17	The Cryosphere—Current and Recent Research . . . . .	72
2.17.1	Sea Ice . . . . .	73
2.17.2	Current and Recent Research . . . . .	74
2.17.3	Ice Shelves . . . . .	75
2.17.4	Icebergs . . . . .	76
2.17.5	Current and Recent Research . . . . .	76
2.17.6	Permafrost . . . . .	77
2.17.7	Current and Recent Research . . . . .	78
2.18	Rising Sea Level. . . . .	78
2.19	The Paleocene-Eocene Thermal Maximum . . . . .	80
2.19.1	Global Warming 56 Million Years Ago . . . . .	82
2.19.2	PETM Versus Modern Greenhouse Gas Emissions . . . . .	83
2.19.3	PETM Warming Versus Current Warming . . . . .	83
2.19.4	PETM Ocean Circulation . . . . .	83
2.19.5	PETM Sea Level Rise . . . . .	84
2.19.6	PETM Permafrost and Methane Hydrates . . . . .	84
2.19.7	PETM Ocean Acidification . . . . .	84
2.20	Species Extinction . . . . .	84
2.21	Deforestation . . . . .	85
2.22	Ecosystem Impacts . . . . .	86
2.23	Research Programs . . . . .	87
2.24	Status of Climate Change Science—End of February 2014 . . . . .	87
2.25	Projections of Future Climate . . . . .	96
	References and Additional Reading . . . . .	97
<b>Appendix A: Geologic Time . . . . .</b>		<b>101</b>
<b>Appendix B: The Metric System . . . . .</b>		<b>105</b>

Modern Climate Change Science

An Overview of Today's Climate Change Science

Farmer, G.Th.

2015, XXV, 106 p. 38 illus., 37 illus. in color., Softcover

ISBN: 978-3-319-09221-8
