

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Modelling in Hydrology	3
1.1.1	Model Classification	4
1.2	Stochastic Modelling Case Studies in This Book	5
1.2.1	Data Driven Rainfall-Runoff Modelling	5
1.2.2	Data Driven Solar Radiation Modelling	7
1.2.3	Data Driven Evapotranspiration Modelling	8
1.3	Why Do You Read This Book?.	10
	References	13
<b>2</b>	<b>Hydroinformatics and Data-Based Modelling Issues in Hydrology</b>	<b>19</b>
2.1	Hydroinformatics	20
2.2	Why Overfitting and How to Avoid	21
2.3	Input Variable (Data) Selection	24
2.4	Redundancy in Input Data and Model	26
2.5	Data-Based Modeling—Complexity, Uncertainty, and Sensitivity	29
2.5.1	Modeling Uncertainty	30
2.5.2	Model Complexity	31
2.5.3	Training Data Requirements	32
2.5.4	Flexibility for a Model	33
2.5.5	Sensitivity of a Model	34
2.5.6	Predictive Error of a Model	34
2.5.7	Identifiability of a Model	34
2.6	Index of Model Utility (U)	35
2.7	Conclusions	36
	References	36

<b>3</b>	<b>Model Data Selection and Data Pre-processing Approaches . . . . .</b>	<b>41</b>
3.1	Implementation of Gamma Test. . . . .	41
3.1.1	Background on Gamma Statistic, V-Ratio, and M-Test. . . . .	42
3.1.2	Assumptions in the Gamma Test. . . . .	44
3.1.3	Data Analysis Using Gamma Test. . . . .	44
3.1.4	Delta Test . . . . .	46
3.2	Implementation of Entropy Theory. . . . .	46
3.2.1	Multidimensional Extensions of Entropy Theory . . . . .	49
3.2.2	Application of Entropy Theory . . . . .	51
3.3	Implementation of AIC and BIC . . . . .	52
3.4	Implementation of Cluster Analysis . . . . .	54
3.4.1	Hierarchical Tree Cluster Analysis. . . . .	55
3.4.2	Partition Clustering (K-Means Clustering) . . . . .	59
3.5	Implementation of Principal Component Analysis . . . . .	61
3.6	Traditional Approaches in Data and Model Selection . . . . .	63
3.6.1	The Holdout Method . . . . .	63
3.6.2	Random Sub-sampling . . . . .	64
3.6.3	K-Fold Cross-Validation. . . . .	65
3.6.4	Leave-One-Out Cross-Validation. . . . .	66
3.6.5	Cross-Correlation Method. . . . .	66
3.7	Conclusions . . . . .	67
	References . . . . .	67
<b>4</b>	<b>Machine Learning and Artificial Intelligence-Based Approaches. . .</b>	<b>71</b>
4.1	Transfer Function Models . . . . .	73
4.1.1	Autoregressive Model . . . . .	74
4.1.2	Moving Average Model. . . . .	74
4.1.3	Autoregressive Moving Average Model: ARMA (P, Q). . . . .	74
4.1.4	Autoregressive Moving Integrated Average Model: ARIMA (P, Q) . . . . .	75
4.1.5	AutoRegressive with eXogenous Input (ARX) Model . . .	75
4.1.6	AutoRegressive Moving Average with EXogenous Input (ARMAX) Model . . . . .	76
4.2	Local Linear Regression Model . . . . .	77
4.3	Artificial Neural Networks Model . . . . .	78
4.3.1	Feed-Forward Neural Network Architecture . . . . .	79
4.3.2	Recurrent Artificial Neural Networks . . . . .	81
4.3.3	Elman Artificial Neural Networks . . . . .	81
4.3.4	Jordan Artificial Neural Networks . . . . .	82
4.3.5	Hopfield Networks . . . . .	82
4.3.6	Long Short Term Memory Networks . . . . .	84

4.4	Training Algorithms . . . . .	85
4.4.1	Conjugate Gradient Algorithm . . . . .	86
4.4.2	Broyden–Fletcher–Goldfarb–Shanno Algorithm . . . . .	87
4.4.3	Levenberg–Marquardt Algorithms . . . . .	88
4.5	Discrete Wavelet Transforms . . . . .	89
4.6	Hybrid Models . . . . .	93
4.6.1	Neural Network Autoregressive with Exogenous Inputs (NNARX) Model . . . . .	94
4.6.2	Fuzzy Inference System . . . . .	94
4.6.3	Adaptive Neuro-Fuzzy Inference System (ANFIS) Model . . . . .	96
4.6.4	Support Vector Machines . . . . .	98
4.6.5	Neuro-Wavelet Model . . . . .	103
4.6.6	Wavelet-ANFIS Model (W-ANFIS) . . . . .	104
4.6.7	Wavelet-Support Vector Machines (W-SVM) Model . . . .	104
	References . . . . .	105
<b>5</b>	<b>Data Based Solar Radiation Modelling . . . . .</b>	<b>111</b>
5.1	Introduction . . . . .	111
5.1.1	The River Brue Catchment . . . . .	112
5.1.2	Data from the Hydrological Radar Experiment (HYREX) Project . . . . .	113
5.1.3	Details of River Brue Catchment Data . . . . .	115
5.2	Statistical Indices for Data Based Model Comparison . . . . .	115
5.3	Data Based Six-Hourly Solar Radiation Modelling . . . . .	117
5.3.1	Input Data and Training Data Length Selection Using Entropy Theory . . . . .	117
5.3.2	Data Selection Results from the Gamma Test . . . . .	120
5.3.3	Data Selection Results from the AIC and BIC . . . . .	122
5.3.4	Modelling Results Using ANN and LLR on 6-Hourly Records . . . . .	123
5.4	Data Based Daily Solar Radiation on Beas Database . . . . .	126
5.4.1	Data Analysis and Model Input Selection Based on the Gamma Test . . . . .	127
5.4.2	Non-linear Model Construction and Testing Results . . . .	129
5.5	Model Selection in Daily Solar Radiation Estimation in Terms of Overall Model Utility . . . . .	144
5.6	Discussions and Conclusions . . . . .	147
	References . . . . .	149
<b>6</b>	<b>Data Based Rainfall-Runoff Modelling . . . . .</b>	<b>151</b>
6.1	Introduction . . . . .	151
6.2	Study Area: Brue Catchment . . . . .	152
6.3	Statistical Indices for Comparison . . . . .	153

6.4	Data Selection Approaches in Data Based Rainfall-Runoff Modelling . . . . .	154
6.4.1	Gamma Test for Data Length Selection and Input Identification . . . . .	155
6.4.2	Entropy Theory for Data Length Selection and Input Identification . . . . .	157
6.4.3	Data Length Selection and Input Identification with Traditional Approaches . . . . .	160
6.4.4	Model Data Selection Using AIC and BIC for Daily Rainfall Runoff Modelling . . . . .	162
6.5	Data Based Rainfall: Runoff Modelling . . . . .	164
6.5.1	Modelling with ARX, ARMAX and ANN . . . . .	164
6.5.2	Influence of Data Interval on Data Based Real Time Flood Forecasting . . . . .	167
6.5.3	Data Driven Modelling with LLR, NNARX and ANFIS . . . . .	170
6.5.4	Data Driven Rainfall-Runoff Modelling with Neuro-Wavelet (NW) Model . . . . .	173
6.5.5	Rainfall-Runoff Modelling with SVM, W-ANFIS and W-SVM Models . . . . .	174
6.6	Conclusions . . . . .	180
	References . . . . .	181
<b>7</b>	<b>Data-Based Evapotranspiration Modeling . . . . .</b>	<b>183</b>
7.1	Introduction . . . . .	183
7.2	Study Area . . . . .	184
7.2.1	Santa Monica CIMIS Station . . . . .	184
7.2.2	Brue Catchment, United Kingdom . . . . .	185
7.2.3	The Sistan Region, Iran . . . . .	187
7.3	Statistical Indices for Model Comparison . . . . .	189
7.4	Modelling with Traditional Reference Evapotranspiration Models . . . . .	190
7.4.1	Mathematical Details of the $ET_0$ Models . . . . .	190
7.4.2	Model Performance Analysis Relative to FAO56-PM. . . . .	194
7.5	Data-Based Evaporation Modeling: Data Selection Approaches . . . . .	207
7.5.1	Gamma Test for Input Selection in Evaporation Modeling . . . . .	207
7.5.2	Entropy Theory for Data Analysis in Evaporation Modeling . . . . .	211
7.5.3	AIC and BIC for Data Analysis in Evaporation Modeling . . . . .	213
7.5.4	Data Analysis in Evaporation Modeling with Data Splitting and Cross Correlation Approaches . . . . .	215

7.6	Data-Based Modeling in Evaporation Modeling . . . . .	216
7.6.1	Data-Based Evaporation Modeling with LLR, ANNs, ANFIS, and SVMs . . . . .	216
7.6.2	Evaporation Modeling with Hybrid Models NNARX, NW, W-ANFIS, and W-SVM . . . . .	221
7.7	Evaporation Data Model Selection in Terms of Overall Model Utility . . . . .	224
7.8	Discussions and Conclusions . . . . .	227
	References . . . . .	229
<b>8</b>	<b>Application of Statistical Blockade in Hydrology . . . . .</b>	<b>231</b>
8.1	Introduction: Statistical Blockade . . . . .	231
8.2	Statistical Blockade Steps . . . . .	234
8.3	Case Study in Hydrology . . . . .	238
8.3.1	Study Area . . . . .	238
8.3.2	Application of Statistical Blockade . . . . .	238
8.3.3	Application of Artificial Neural Network . . . . .	241
8.3.4	Application of Support Vector Machines . . . . .	244
8.4	Conclusions . . . . .	246

Hydrological Data Driven Modelling

A Case Study Approach

Remesan, R.; Mathew, J.

2015, XV, 250 p. 172 illus., 59 illus. in color., Hardcover

ISBN: 978-3-319-09234-8
