1	Population Assessments: 2013–2050–2100:	
	Growth, Stability, Contraction	1
1.1	Introduction	1
1.2	Reasons for the Exponential Growth in the Earth's Population	2
1.2.1	Human Female Population	2
1.2.2	Fertility	3
1.2.3	Life Expectancy	5
1.2.4	Obstacles to Reduction in Global Fertility Rate	6
1.3	Projections for Near-Future (One–Two Generations) Populations	6
1.4	Afterword	7
	References	7
2	Options to Increase Freshwater Supplies and Accessibility	9
2.1	Introduction	9
2.2	The Earth's H ₂ O Inventory: Liquid, Solid, Gas	9
2.3	Volumes of Water for Some Agricultural, Industrial, Commercial, and Domestic Use	10
2.4	Per Capita Water Allowances in 2012 with Recalculations for 2050	11
2.5	Strategies to Improve Water Supplies	14
2.5.1	Import/Export Freshwater	14
2.5.2	Find New Freshwater Sources	15
2.5.3	Recycle Wastewater into the Freshwater Inventory	17
2.5.4	Create/Extend Freshwater	23
2.6	Benefits/Costs of Improved Water Supply	27
2.6.1	Support Research	28
2.7	Afterword	28
	References	29

3 Strategies to Increase Food Supplies for Rapidly Growing Populations: Crops, Livestock, and Fisheries	31
3.1 Introduction	31
3.2 Strategies to Increase Crops	32
3.2.1 Increase the Acreage of Arable Land that Can Be Tilled	32
3.2.2 Increase Crop Yield and Nutritional Value: Improve Seed that Protect Crops from Harm by Biological, Physical, and/or Chemical Agents	33
3.3 Agricultural Practices to Prevent Soil Erosion and Maintain Soil Fertility Managing Water and Farming Methods that Protect Soil and Nearby Ecosystems	37
3.3.1 Soil Preparation for Planting, Cultivating, and Harvesting Crops	37
3.3.2 Increasing Livestock (Protein) Contribution to the Global Food Supply	42
3.3.3 Fishery Contributions to Global Food Stocks Can Help Feed Growing Populations	44
3.3.4 The Impacts of Global Warming/Climate Change on the World's Food Supply	46
3.4 Afterword	49
References	50
 4 Shelter: Proactive Planning to Protect Citizens from Natural Hazards	53
4.1 Introduction	53
4.2 Foresight in Site Selection from Studies of Past and More Recent Hazard Events	53
4.2.1 Earthquakes	54
4.2.2 Volcanic Eruptions	55
4.2.3 Floods	56
4.2.4 Mass Movements	57
4.2.5 Extreme Weather Events	58
4.3 Sociopolitical and Economic Methods to Discourage Habitation of High Hazard Zones	59
4.4 Practices to Protect Citizens/Property from Occasional Battering by Natural Hazards	60
4.4.1 Building Codes	60
4.4.2 Protective Infrastructure	61
4.5 Prediction	62
4.5.1 Earthquakes	63
4.5.2 Volcanic Activity	63
4.5.3 Floods	64
4.5.4 Tsunamis	64
4.5.5 Extreme Weather Events	66

4.6	Pre-planning Post-hazard Responses: Citizen Care, Search, and Rescue Operations	66
4.7	Afterword	67
	References	67
5	Development Planning: A Process to Protect People, Ecosystems, and Business Productivity/Longevity	69
5.1	Introduction	69
5.2	The Planning Process	69
5.3	Goals of Development Planning	70
5.4	Attracting Development Projects	71
5.5	Stages in Development Planning	72
5.6	Afterword	74
	References	74
6	Exertion of Political Influence by Commodity-Based Economic Pressure: Control of Energy and Mineral Natural Resources	75
6.1	Introduction	75
6.2	Energy	75
6.3	Earth Materials: Metals, Minerals, Rocks	76
6.3.1	Critical Metals—Strategic Resources	76
6.3.2	Metals with Specialized Uses: Industry, National Security, Development, Public Health	77
6.3.3	Industrial Minerals and Rocks: Critical and Strategic	78
6.4	Control of Critical/Strategic Materials—Potential Conflict Among Nations, Among Users	79
6.5	Causes of Supply Deficits	79
6.6	Improve or Extend Critical/Strategic Materials Inventory	80
6.7	Geopolitical Strategies to Access Critical Metals and Strategic Resources	81
6.8	Mediation Between Suppliers and Users for Access to Critical/Strategic Materials	81
6.8.1	Negotiator Role	81
6.8.2	Example of Conflict that Has to Be Negotiated	82
6.8.3	A Negotiation Process	82
6.8.4	Commodities Not Used for Economic Gain or Political Persuasion	82
6.9	Afterword	83
	References	83
7	Global Perils that Reduce the Earth's Capacity to Sustain and Safeguard Growing Populations—Tactics to Mitigate or Suppress Them	85
7.1	Introduction	85

7.2	Global Warming/Climate Change	85
7.2.1	Rising Sea Level	87
7.2.2	Warmer Ocean Surface Waters and Shifts in Ocean Currents	87
7.2.3	Organism Migration: Consequences for Human Populations	88
7.2.4	Increased Spread of Infectious and Other Diseases to Human Populations	90
7.2.5	Effects of Global Warming/Climate Change in Agricultural Zones	92
7.2.6	Increase in Frequency and Intensity (Force) of Extreme Weather Events	94
7.3	Ozone Layer Degradation—Reconstruction	99
7.3.1	Cause of the Loss of Ozone	99
7.3.2	Effects of Ozone Layer Thinning: Global Strategy to Halt and Reverse It	100
7.4	Erosion, Loss of Fertility, and Other Causes of Soil Degradation	101
7.5	Pollution Threats from Air, Water, and Soil—Human Activities and Natural Sources	103
7.5.1	Atmosphere Perils	103
7.5.2	Waterborne Dangers	108
7.5.3	Chemical Threats to Human Populations from Soils	114
7.5.4	Biological/Health Dangers for Populations and Ecosystems	116
7.6	Afterword	117
	References	118
8	Stressors on Citizens and Ecosystems: Alleviation Tactics	121
8.1	Stress Defined	121
8.2	Stress on Humans	122
8.2.1	From Growing Populations	122
8.2.2	From Economic Conditions	122
8.2.3	From Sociopolitical Strains	124
8.3	Ecosystem Stressors: From Human Activities/from Nature	126
8.3.1	Human Activities	127
8.3.2	Natural Hazards—Primary, Triggered	132
8.4	Human Actions/Inactions that Intensify and Concentrate Impacts of Natural Hazards	135
8.5	Stress Reduction	135
8.6	Afterword	136
	References	136

9 Progressive Adaptation: The Key to Sustaining a Growing Global Population	137
9.1 Adaptation	137
9.2 Adaptation to Population Changes	137
9.3 Adaptation to Natural Hazards	140
9.3.1 Earthquakes	140
9.3.2 Volcanoes	141
9.3.3 Floods	141
9.3.4 Extreme Weather Conditions	142
9.3.5 Wildfires	143
9.3.6 Preparedness Against Natural Hazards	144
9.4 Adaptation to the Effects of Global Warming/Climate Change on Our Earth's Inhabitants	144
9.4.1 Cause of Global Warming	144
9.4.2 Effects of Global Warming	145
9.5 Adaptation to the Threat or Onset of Endemic, Epidemic, and Pandemic Disease	149
9.5.1 Adapting to Global Health Threats	149
9.5.2 Adapting to Regional Disease Outbreaks	152
9.5.3 Adaptation to Localized (National, City) Health Threats	155
9.5.4 Planning Ahead to Stem Future Health Threats	155
9.6 Afterword	157
9.7 Epilogue	158
References	159
Index	161

Countering 21st Century Social-Environmental Threats
to Growing Global Populations

Siegel, F.R.

2015, XV, 164 p. 1 illus., Softcover

ISBN: 978-3-319-09685-8
