

# Contents

<b>1</b>	<b>Introduction</b> . . . . .	<b>1</b>
	References . . . . .	4
<b>2</b>	<b>Causes of Beach Erosion</b> . . . . .	<b>7</b>
2.1	Reduction in Sediment Supply from Eroding Cliffs . . . . .	9
2.2	Reduction of Fluvial Sediment Supply to the Coast . . . . .	11
2.3	Reduction of Sediment Supply from the Sea Floor . . . . .	12
2.4	Reduction of Sand Supply from Inland Dunes . . . . .	14
2.5	Submergence and Increased Wave Attack . . . . .	16
2.6	Increased Wave Energy . . . . .	17
2.7	Losses of Beach Sediment Alongshore . . . . .	17
2.8	A Change in the Angle of Incidence of Waves . . . . .	20
2.9	Interception of Longshore Drift by Breakwaters . . . . .	21
2.10	Increased Losses of Beach Sediment to the Backshore . . . . .	21
2.11	Beach Weathering, Including Attrition of Beach Sediment . . . . .	22
2.12	A Rise in the Beach Water Table . . . . .	23
2.13	Removal of Beach Sediment by Runoff . . . . .	23
2.14	Increased Scour by Wave Reflection from an Artificial Structure . . . . .	24
2.15	Extraction of Sand and Shingle from the Beach . . . . .	24
	References . . . . .	27
<b>3</b>	<b>Responses to Beach Erosion</b> . . . . .	<b>29</b>
3.1	Structural Engineering . . . . .	29
3.2	Non-structural Methods . . . . .	36
	References . . . . .	38
<b>4</b>	<b>Beach Renourishment Principles</b> . . . . .	<b>41</b>
4.1	The Need for Preliminary Investigations . . . . .	41
4.2	Sources of Sediment for Beach Renourishment . . . . .	44
4.2.1	Sediment from Land Quarries . . . . .	45
4.2.2	Sediment from Other Beaches . . . . .	45

4.2.3	Sediment from Harbours . . . . .	46
4.2.4	Sediment from Coastal Lagoons . . . . .	47
4.2.5	Sediment from River Channels and Alluvial Plains. . . . .	47
4.2.6	Sediment from Tidal Inlets. . . . .	48
4.2.7	Sediment from the Sea Floor . . . . .	48
4.2.8	Sediment from Distant Sources . . . . .	51
4.2.9	Sediment from Mining Waste. . . . .	52
4.2.10	Artificial Sediment. . . . .	54
4.3	Methods of Beach Renourishment. . . . .	54
4.3.1	Direct Placement . . . . .	55
4.3.2	Emplacement by Longshore Drift . . . . .	61
4.3.3	Bypassing. . . . .	65
4.3.4	Recycling . . . . .	66
4.3.5	Use of Shoreward Drift . . . . .	68
4.3.6	Backpassing and Beach Re-shaping. . . . .	70
4.3.7	Overfill . . . . .	72
4.3.8	Shore Profile Renourishment . . . . .	72
4.3.9	Part-Renourishments . . . . .	74
4.3.10	Use of Structures . . . . .	75
4.4	Design Considerations . . . . .	79
4.4.1	Introduction . . . . .	79
4.4.2	Grain Size and Grading . . . . .	79
4.4.3	Cross-Shore Profile and Determination of Volume . . . . .	82
4.4.4	Beach Configuration and Orientation. . . . .	83
4.5	Monitoring Changes After Beach Renourishment. . . . .	84
4.6	Assessment of Beach Performance . . . . .	87
4.7	Modelling of Beach Renourishment . . . . .	90
	References. . . . .	94
<b>5</b>	<b>Beach Renourishment for Coast Protection . . . . .</b>	<b>101</b>
	Reference. . . . .	106
<b>6</b>	<b>Planning Considerations. . . . .</b>	<b>107</b>
6.1	Environmental Impacts of Beach Renourishment . . . . .	107
6.1.1	Source Impacts. . . . .	109
6.1.2	Impacts During Transportation . . . . .	110
6.1.3	Impacts of Beach Emplacement. . . . .	111
6.2	Costs and Benefits of Beach Renourishment. . . . .	113
6.3	Response of Renourished Beaches to Climate Change and a Rising Sea Level. . . . .	117
	References. . . . .	119
<b>7</b>	<b>Review of International Practices . . . . .</b>	<b>123</b>
7.1	United States . . . . .	123
7.2	Australia and New Zealand . . . . .	124

7.3	Mainland Europe . . . . .	127
7.4	United Kingdom. . . . .	129
7.5	Africa . . . . .	129
7.6	Asia . . . . .	130
7.7	Central and South America . . . . .	132
7.8	Summary . . . . .	132
	References. . . . .	132
8	<b>Conclusion</b> . . . . .	137
