

Contents

1	Introduction	1
1.1	Mapping of Planetary Surface	1
1.2	Observation of 3D-Objects	1
1.3	Radio Repeater Allocation	2
1.4	Imaging of Living Cells	2
1.5	Health-Monitoring and Control of Micro-distributed Systems	2
1.6	Surveillance and Exploration via Mobile Observers	3
1.7	Optical Imaging of Global Air Circulation	3
1.8	Asteroid Observation	3
1.9	Path Planning on Structured Network	4
	References	5
2	Mathematical Preliminaries	7
2.1	Objects Under Observation	7
2.2	Notions of Visibility	10
2.3	Observation of Complex Objects	26
2.4	Concluding Remarks	30
	References	34
3	Static Optimal Visibility Problems	35
3.1	Single Point-Observer Static Optimal Visibility Problems	35
3.2	Multiple Point-Observer Static Optimal Visibility Problems	45
3.2.1	Simply-Connected Objects	47
3.2.2	Non-simply Connected Objects	49
3.3	Computational Algorithms	57
3.4	Numerical Examples	62
	References	78

4	Visibility-Based Optimal Path Planning	79
4.1	Observation of Two-Dimensional Objects	79
4.1.1	Existence of Solutions	82
4.1.2	Optimality Conditions	85
4.1.3	Numerical Algorithms	88
4.1.4	Numerical Examples	90
4.2	Observation Of Three-Dimensional Objects	96
	References	99
5	Visibility-based Optimal Motion Planning	101
5.1	Particular Case	102
5.1.1	Statement of Problems	105
5.1.2	Existence of Solutions	106
5.1.3	Optimality Conditions	109
5.1.4	Numerical Algorithms	116
5.1.5	Simple Example	118
5.2	Optimal Control Problems Involving Set Measures.	124
5.2.1	Statement of Problems	125
5.2.2	Optimality Conditions	126
5.3	Asteroid Observer Optimal Motion Planning Problem.	129
5.4	Real-Time Observer Motion Planning.	134
	References	139
6	Multiple Observer Cooperative and Non-cooperative Optimal Motion Planning	141
6.1	Preliminaries	141
6.2	Cooperative Observation.	142
6.2.1	Observer-Clusters	147
6.3	Non-cooperative Observation.	179
6.4	Problems for Further Study	186
6.4.1	Observation of Objects with Time-Varying Shapes	186
6.4.2	Cooperative Observation Involving Multiple Point-Observers with Communication Time-Delays	187
6.4.3	Generalized Visibility-Based Optimal Path and Motion Planning Problems	187
	References	189
	Appendix A: Set Covering Problem	191
	Appendix B: Art Gallery Problems.	193
	Appendix C: Delaunay Triangulation	195
	Index	197

Visibility-based Optimal Path and Motion Planning

Wang, P.K.-C.

2015, VIII, 198 p. 124 illus., Hardcover

ISBN: 978-3-319-09778-7
